## CONSUMER PREFERENCE AND SATISFACTION TOWARDS ONLINE SHOPPING AMONG COLLEGE STUDENTS IN THENI

<sup>1</sup>Mrs.N.Nalini, <sup>2</sup>Dr.T.Ramalakshmi, <sup>1</sup>Research Scholar, <sup>2</sup>Assistant Professor, <sup>1&2</sup>Cardamom Planters Association College, Bodi.

#### **ABSTRACT**

In today's world technology improvement plays an important role in all the area. Like that technology development also plays a vitalrole in marketing field also. The technology impacted commerce is simply known as E-commerce. In E-commerce online shopping is one of the key elements. The direct marketing is going down because of rapid growth in online shopping. In this study the researcher studies the impact of online shopping among college students and the preference and satisfaction of online shopping among college students.

#### INTRODUCTION

Online shopping or e-shopping is a form of electronic commerce which allows consumers to directly buy goods or services from a seller over the Internet using a web browser. Alternative names are: e-web-store, e-shop, e-store, Internet shop, web-shop, web-store, online store, online storefront and virtual store. Mobile commerce (or m-commerce) describes purchasing from an online retailer's mobile optimized online site or app.

An online shop evokes the physical analogy of buying products or services at a bricks-and-mortarretailer or shopping center; the process is called business-to-consumer (B2C) online shopping. In the case where a business buys from another business, the process is called business-to-business (B2B) online shopping. The largest of these online retailing corporations are Alibaba, Amazon.com and eBay. Retail success is no longer all about physical stores. This is evident because of the increase in retailers now offering online store interfaces for consumers. With the growth of online shopping, comes a wealth of new market footprint coverage opportunities for stores that can appropriately cater to offshore market demands and service requirements.

#### **OBJECTIVE OF THE STUDY**

The researcher provides the following objectives for the present study.

- > To know the preference of the respondent towards online shopping.
- To analysis the level of satisfaction towards online shopping.
- To know about most preferred E-retailer by the sample respondent.

#### RESEARCH METHODOLOGY

The study will mainly be descriptive in nature based on survey method. Both primary and secondary data will extensively be used. Primary data will be collected with the help of well-constructed, pretested Questionnaire from sample respondents. It is also proposes to select a sample of 110 college students at random from the study area. The secondary data will be collected from published and unpublished sources, newspapers, journals, research publications, books and websites.

| 10.  | Others                   | 10                      | 9                                     |  |
|      | Total                    | 110                     | 100                                   |  |

Table 1.3 inferred that out of 110 respondents, 24% of the (26) respondents have bought books; 22% of the (24) respondents have bought Toys and gifts; 13% of the (14) respondents have bought mobile; 11% of the (12) respondents have bought cosmetics; 9% of the (10) respondents have bought others products; 7% of the (8) respondents have bought Electrical and Electronics; 5% of the (6) respondents have bought Cloth and Accessories and remaining 2% of the (2) respondents have bought IPod and Ornaments.

The study shows that out of 110 respondents, 24% of the (26) respondents have bought books through online shopping.

Table 1.4
Price range of products that purchased through online

| S.No  | Purchase Amount   | Number of  | Percentage of |  |
|-------|-------------------|------------|---------------|--|
|       |                   | Respondent | Respondent    |  |
| 1.    | Upto ₹1000        | 36         | 33            |  |
| 2.    | ₹ 1001 to ₹2500   | 44         | 40            |  |
| 3.    | ₹ 2501 to ₹ 5000  | 22         | 20            |  |
| 4.    | ₹ 5001 to ₹.10000 | 6          | 5             |  |
| 5.    | Above ₹10000      | 2          | 2             |  |
| Total |                   | 110        | 100           |  |

Table 1.4 shows that out of 110 sample respondent 40% of sample respondent (44) are purchasing goods for ₹1001 to ₹2500; 33% of the sample respondents (36) are purchasing goods for below ₹1000; 20% of the sample

respondents (22) are purchasing goods for ₹2501 to ₹5000; 5% of the sample respondents (6) are purchasing goods for ₹5001 to ₹10000; and 2% of the sample respondents (2) are purchasing goods for Above ₹10000.

The study inferred that out of 110 respondents, 40% of the respondents are purchased the product with the price range of ₹1001 to ₹2500.

Table 1.5
Relationship between gender and E-retailers

| S.No  | Gender preference on | Male   | Female | Total |
|-------|----------------------|--------|--------|-------|
|       | E-retailers          |        |        |       |
| 1.    | Amazon               | 6(15)  | 10(14) | 16    |
| 2.    | Ebay                 | 10(25) | 10(14) | 20    |
| 3.    | Flipkart             | 6(15)  | 8(11)  | 14    |
| 4.    | Jungle               | 6(15)  | 6(9)   | 12    |
| 5.    | Zabang               | 6(15)  | 4(6)   | 10    |
| 6.    | Homeshop18           | 6(15)  | 12(17) | 18    |
| 7.    | Others               | 0(0)   | 20(29) | 20    |
| Total | 100                  | 40     | 70     | 110   |

Among 40 male 10 respondents prefer Ebay for shopping. 6 respondents prefer Amazon, Flipkart, jungle, Zabang and Homeshop18; among 70 female respondents 20 respondents prefer Ebay and some other E-retailers; 18 respondents are prefer Homeshop18; 16respondents are prefer Amazon. 14 respondents are prefer Flipkart. 12 respondents are prefer Junglee. 10 respondents are prefer Zabang.

It is concluded from the research that majority of the male and female respondents are prefer Ebay and some other E-retailers.

| 9.          | Buying                   | 56                         | 40                   | 10                  | 2                       | 2  | 476  | , II |
|             | information              | 280                        | 160                  | 30                  | 4                       | 2  | 16.30  |      |

The table 1.6 shows that satisfaction in online shopping. The Quality of the product purchased is main factor for satisfaction; Buying information is the second factor for satisfaction; Convenient, easy & quick purchase procedure is the third reason for satisfaction in online shopping; Saves physical effort is fourth reason for satisfaction; More choices is the fifth reason for satisfaction; Try new materials and Gift & Discount are the sixth reason for satisfaction; Anywhere shopping is the seventh reason for satisfaction in online shopping and Product comparison is the eighth reason for satisfaction in online shopping.

#### **CONCLUSION**

From this study the researcher concludes that all e-retailers take necessary promotional activities to increase their marketing share and reduce the communication gap with their consumers. The e-retailers try to attract male consumer because female consumer only maximum prefer online shopping for that they try to attract male consumers too. Online shopping is secured purchase behavior to improve its efficiency it attract more customer and also good market share in future. The online shopping behavior among college students in Theni district is good and to retain its customer they improve their promotional activities to lead it.
