Index Terms - Quality, Communication Skill, Methodology, Bilingual, Dedication, Strategies, Proficiency, Learning Material, Broad Knowledge, Professional.

INTRODUCTION

In the 21st century, a teacher is a mirror of the world. Chief Education Officer-Department of public information said - “ Teachers are the backbone of our society”. But researchers' experiences say Teachers are the backbone of the school, college, university, educational institutions and the educational world. Without teachers, we can't imagine developing the life of human sense, discipline, personality and behaviour. Teaching is a way or bridge of human life successively and positively developed. All humans in the world are successful through the gift of knowledge provided by the teacher. The teacher profession is one of the best and noblest professions in the world other than. From childhood to before the end of human life, the entire knowledge learnt by teachers is important everywhere to solve problems of the career. A teacher is the only person who shares your self-knowledge with others without any cost. Those days when teachers do not share any knowledge, that day the whole world goes into darkness. God blessed all types of knowledge to give only a person of teacher unlimited.

Nowadays the role of a teacher is very important from primary level School to a higher level of educational institutions such as school, colleges and universities. All educational institutions provide the best knowledge through their best teachers. All private and government organisations or institutions want to give the best knowledge and every institution achieved name and fame through the best results, the success of the students, management of the schools, colleges and universities fully depends upon teachers. In a private institution competing to achieve more and more success and whole success only depends on the best, hard worker, patience, knowledgeable dedicated person that is a teacher also. So the

teacher is the maker of the person or human life. Here we know about the qualities of teachers given below according to the 21st century.

1. **Good, Expert and Simple Communication Skills**

In the current scenario and demand of society, educational institutions, any situation or moment, every teacher should develop good, expert and simple communication skills. Communication is the best skill to understand the subject, topic and any type of knowledge or matter. Communication is the most important weapon of every successful teacher. Without communication, none of the teachers is successful in the classroom, schools and the journey of the teaching profession.

2. **Broad knowledge of the subject/ topic who taught**

In the 21st century every teacher wants to be successful but many teachers do not find success because of so many reasons. Everybody knows about the work or role of the teacher. The teacher taught any topic related to the subject in the classroom at the institutions every day according to their routine. If every teacher wants to make a good teacher then he will study more and more time on any one topic whenever that topic does not understand who taught the daily classroom. That means deep knowledge plus a clear concept of the subject or topic is mandatory or essential or compulsory for every teacher every day.

3. **The secret/deep knowledge of the subject methodology**

Every subject has many methods or techniques available in the books, library and websites at teachers training institutions. In the 21st century, if one has chosen the profession of teaching every teacher must have the methodology of earning more than one or every teaching method and technique available in the subject methodology of the books. Why is every teacher learning necessary? Because in the classroom different categories or types of the student take admission in the school. Some are brilliant, some are average and some are so weak. A good teacher always took a weak or average student together in the classroom. For example - In a classroom, when a teacher taught any topic in their subject, but sometimes may occur or something happens when many students do not understand your topic taught one method or technique, those you are using, that time or that situation you use another method or technique if you already learnt or knew about another method or technique. So we can say that the knowledge of the methodology is very useful to every teacher who had a teaching profession

4. **Your Key To Success: Bilingual language**

In the 21st century every teacher should have to know about bilingual skills. Bilingual skills are very profitable and fruitful for every teacher who chooses the profession of teaching. Everybody knows, in the market t, the maximum books are available in Hindi and English language in India and the language of the website or maximum best material are available in English only. In that situation, if the teacher

does not know about that language all materials are useless and worthless for him. We also know the two types of mediums (Hindi and English) are available in Indian institutions. Also know that in the classroom two mediums of the students are present iSo I said that the knowledge of the bilingual language for every teacher is very important. Lack of bilingual skills we can't satisfy the knowledge of the students.

5. **Use knowledge of the computer for preparing teaching material/new things**

Today is the era of computers, mobile and on the internet. Today knowledge of the computer is essential for every teacher. If those teachers want to achieve the objectives of every day, the topic of the subject or objectives of the teaching education, in the classroom. Today many private and government institutions are running smart classes. The smart classes are fully equipped with computer technology and a projector. Without knowledge of the technology, nobody can operate these techniques easily. PowerPoint Presentation (PPT) is the most common presentation of either computer or projector. Nowadays preparation of the PPT is also very tough work for everyone and without PPT we can't present our topic easily or smartly. So knowledge of computers is compulsory for every smart teacher in the 21st century.

6. **Believe in your self-confidence**

For a teaching profession, the need for self-confidence, self-stream self-assurance is very important. Its quality to improve, develop and trust increases dependence on totally yourself. Nobody improves your self-confidence. In other words, to say that self-confidence has internal skills and abilities of the human and sense of control in your life. It helps you develop a positive view of yourself. This quality sometimes depends upon genetics or sometimes depends upon our social, family or academic backgrounds for some time depending upon our hard-working or self practising or environment.

7. **Your Key To Success: Hardworking**

Success in any field fully depends on your hard work. For teaching, the professional quality of hard work is necessary, mandatory or compulsory for every teacher. In the past decade, so many successful or ideal teachers were available in our society. Hard-working quality or skill has a story of every successful teacher because we all know that "no shortcut way of success" and teaching professionals is also hard, So hard working for every teacher is mandatory.

8. **Dedication in the professional**

The teaching profession is always a royal profession. Those people selected this professional as the luckiest man or woman in the world because they are builders or constructors of human beings or professions. The teacher is the origin of the entire discovery in the world through human knowledge. While the smallest or largest thing is because teachers have lots of knowledge and knowledge is the main source of all

things. Every teacher should be dedicated, honest and loyal to your teaching professional now and forever.

9. To develop strategies of student learning/understanding

Being a good teacher and well-educated person to develop a better understanding of your students, this skill shows the ability of the teacher qualities. In the classroom, every student talks about teachers' personality, behaviour, teaching style, communication style, style of explaining topics etc. We all know that each student is different and expresses themselves in their unique way. We also know every student has a unique and different personality to bring your heredity, social, friends group, family, culture, caste, religion, area and academic background. So we say that every student's behaviour is unique. In the teaching profession knowledge of child behaviour and psychology is very helpful to all teachers. Knowledge of psychology is very important for every teacher to understand and helps students learn easily.

10. Knowledge about all reference books related to the subject is essential for Teachers

Being a wise teacher, it is additional parameters of the teacher to develop positive and sound knowledge about whole reference books, latest or immediately prior books, qualities and peculiarities of the books, available books in library pop your institution schools college and also know about available, accessible and obtainable in the markets, the right name of the books, writer, author, editor, scribbler of the books, materials and substance available in the books, standards requirements of the books, edition of the books, cost and amount of the books, publisher, journalist and publicist of the books, available contents in the books, but many teachers ignore it. Some reason after a job teacher mostly stopped reading, writing, refreshing and updating books they using, accepting, adapting, applying only a specific book it is not sufficient for teaching professional that behaves is not good for becoming a reputable teacher, knowledge of the books is essential for every teacher, without knowledge of the books you don't make an ideal teacher through the eyes of the Students. Super eminent teachers always help to choose, to suggest, read, to follow, to give references to many books and to calm students ' knowledge.

11. The proficiency to solve every problem of the teaching professional

In a teaching professional, the teacher is a very good counsellor for a student pursuit for study, for selecting a subject, for the suggestion, the guidance of related topic, day to a daily life problem, some health problem, some changes in the human body, problems of classroom management, any other difficulties that related to the academic profession, personality, several problems teaching professional. It is also said that the teacher is the builder of our career and the problem solver of the stud professional teacher. It is always remembered in their hearts.

12. Always remember the objective of the teaching professional

Being good and for the objective or goal of the teaching, without objective, teaching had an aimlessness. Every teacher knew about the background of the objective of the topics or subjects those who taught in the classroom every day. In other words, every topic brings one new objective per day, for example, the mathematics teacher does teach one new formula and puts up with one example. That means the objective of the mathematics teacher is to learn one new formula by taking one or two examples only and providing some examples of practising for the day. Otherwise, if the mathematics teacher takes more than one formula and many examples then all students are confused. So every teacher should take only one objective in a day for each lesson.

Conclusion: In the 21st-century professional development of teaching and learning are very important for teachers. In the above described we learn so many things about the quality of the teaching profession responsibility. A teaching professional is a practical, Pragmatic and empirical field. Every successful teacher, educator, mentor and instructor found many benefits of the above-mentioned following parameters. If the teachers do meditation, hard work and follow the above described then immediately several problems are removed automatically in the teaching profession and no one can stop you from being successful in life.
