Abstract: Nowadays we know that many people have problems. The statistics of homelessness, hunger and lack of daily needs in childcare centers are increasing day by day. By providing this platform, we are trying to solve these issues faced. Here, in this Web Application donors, NGOs and Fundraiser will be at the same place. From the list of NGOs listed in the system, donors can select the organization to which they wish to make a donation. Donor can to that by just clicking on a single "Make a Donation" button. There are currently many fraud issues with donors wishing to donate for NGOs. Some unscrupulous people will admit that they donate to the needy, but all these donations are used for their own pleasure. Donors can now simply donate anything without worrying about their money or donations going to the incorrect location thanks to the provision of this method. This platform not only makes it easy to receive donations from donors, but also makes it easier for NGOs and Fundraiser to receive donation from donors without waiting, because the system gives the date and time donation done to the respective individual or NGO.

Index Terms – Online, charity, donation, platform

I. INTRODUCTION

There are lots of websites for charity donations, so people can donate money, food, or clothes for the needy. Donations can be made to support those in need who are impacted by a natural disaster, a conflict, or any other cause. The adage "the more we give, the more we get" is accurate since more people are becoming aware of the benefits of charitable giving. Giving a donation to someone strengthens the relationship between the giver and the recipient in addition to ensuring the donor is satisfied. In terms of fundraising, it can be utilized to generate money for those who are unable to support themselves and must seek money from outside sources. But there are a few non-integrity people who like to cheat on others. The theme behind this project is to bring the charities, fundraisers and NGOs at one place making it easier for the donor to donate. We have a lot of charity donation websites, but there are very few that provide fundraising as well, so using the web application, people can donate as well as raise funds for people in need and affected by natural causes or wars. Currently in India, the majority of NGO's has experienced difficulties in getting funds to help those who are needy. Getting donor is a very hard task, and sometime dealing with some donor's conditions can be a big challenge for NGO's. This system will help both NGOs to find donors and donors to find NGO's and contribute some funds to those who really need it

II. PURPOSE

Charity is an act of generosity, where a person with more than he needs donates part of his surplus in cash to meet the needs of the underserved There are many NGOs that help children, the elderly and old men, women, men and animals

III.SCOPE

The project aims to make the system more accessible to everyone, and ultimately encourage donations or solicitation of donations from NGOs in need. Online verification will be done of the NGO and donors by admin on successful uploading their valid documents. This charity management system will help NGOs to find donors easily and donors i.e., people who wants to help others but do not find the right place or people to help. This system will have four main modules such as Admin, NGO, Donors and Online Appointment. This system will also have an option for donors to search for listed NGOs, make an appointment to visit their organization, give feedback on the system regarding their visit to the NGO, rate NGO's by giving them stars in the system and make payment online or offline. If donor's make the payment online, they will choose online payment option but if they visit the organization and make offline payment then they have to choose offline payment option and upload the receipt in the system.

IV.APPLICABILITY

This system will be easily available to user as it will be a web application. This web application will be built using the open source Dot Net Platform. Achievements: Organization of Report: Next, we will be explaining more in detail about Requirements Analysis and further more Survey of Technologies

V.ACKNOWLEDGMENT

The success and final outcome of any project requires a lot of guidance from many people and we are extremely privileged to have this all along with the completion of my project. We owe our deep gratitude to our project guide Ms. Apeksha Shirke who took interest in our project work and guided us all along till the completion of our project work by providing all the necessary information for developing a good system.

I would like to extend my sincere and heartfelt thanks towards all those who have helped me in making this project. Without their active guidance, help, cooperation and encouragement, I would not have been able to present project in time

I also acknowledge with a deep sense of reverence, my gratitude towards Ms. Apeksha Ma'am for their insightful advice that helped me complete my project

Significance of "Helping Hands, Helping Smiles":

Accessibility and Inclusivity: The system provides a user-friendly platform accessible to individuals worldwide, breaking down geographical barriers to charitable giving. It promotes inclusivity by accommodating various payment methods and supporting multiple languages, ensuring that people from diverse backgrounds can participate.

Transparency and Accountability: Transparent reporting mechanisms enable donors to track their contributions and understand how their funds are utilized. Rigorous accountability measures, such as financial audits and impact assessments, ensure that donations are used efficiently and ethically.

Community Engagement and Empowerment: "Helping Hands, Helping Smiles" fosters a sense of community among donors, beneficiaries, and volunteers, creating a network of support and solidarity. It empowers individuals to take meaningful action on causes they care about, promoting a culture of empathy and social responsibility.

Conclusion

Online charity donations and fundraisers have revolutionized the way we contribute to social causes, bringing convenience, transparency, and global reach to philanthropic endeavors. "Helping Hands, Helping Smiles" is a pioneering initiative in this domain, aiming to bridge the gap between donors and beneficiaries while fostering a culture of giving and compassion.
