Abstract

Racial discriminations are not limited to five or nine rather it is unlimited as in India origin of different castes is the part of racialism.. All are originated from soil by unconditioned thought expression which is regulated and triggered by TM (time mindness) . It has nothing to do with genetic back grounds or concept of race is not grounded in genetics [1] rather it is related with atomicgenetics or mind or CCP which is triggered and regulated by time mindness (TM) present on basic building blocks of universe (Fig 1) . Variation in racism or casts are grounded in atomicgenetics of both homo sapiens and Trinities .

Life effects are nothing but higher thought expression of B.B.Bs. Formation of atoms and particles are due to lower thought expressions . During the origin of life , it was unconditioned thought expressions that lead to formation of first life i.e. green blue algae on earth. . It was due to fed thoughts and feeding was done in pre creation era by Highest center of the universe . . Highest center has only power to trigger same phenomenon by unconditioned working of nature as It did 3.5 billions years back when first life appeared on earth by formation of blue green algae. If this prediction gets true , the entire hypothesis would be confirmed and dead cells could be made alive.

Before civilizations (Harappa) (appeared on Earth 8000 years back) , Devi , Devtas and Rakshas used to live in India and they lived thousands of years and now they are the part of Mythology . About 7000 years back Lord Ram (Trinity) came and He made Adam's bridge which is a man made bridge . About 5000 years back , Lord Krishna (Trinity) appeared and cited Gita Updesh which is about Mind reality (Fig 1) in nature . Then came era of modern civilization (kal yug) . Hence Lord Ram was Aryan means noble man . So invasion theory of Indian Aryan is obsolete theory . His , Lord Ram's descendents are still living in India .

And Divine MONB Theory

Introduction

Thomas Huxley's racial definitions^[edit] [1]

[Huxley's](#) map of racial categories from *On the Geographical Distribution of the Chief Modifications of Mankind* (1870).

1: [Bushmen](#)

2: [Negroes](#)

3: [Negritoes](#)

4: [Melanochroi](#) (including [Hamites](#) and [Moors](#))

5: [Australoids](#)

6: [Xanthochroi](#)

7: [Polynesians](#)

8: [Mongoloids A](#)

8: [Mongoloids B](#)

8: [Mongoloids C](#)

9: [Esquimaux](#)

Huxley states: 'It is to the Xanthochroi and Melanochroi, taken together, that the absurd denomination of "Caucasian" is usually applied'.^[22] He also indicates that he has omitted certain areas with complex ethnic compositions that do not fit into his racial paradigm, including much of the Horn of Africa and the Indian subcontinent.^[23] Huxley's Melanochroi eventually comprised various other dark Caucasoid populations, including the Hamites and Moors.^[24]

[Thomas Huxley](#) (1825 –1895) wrote one paper, "On the Geographical Distribution of the Chief Modifications of Mankind" (1870), in which he proposed a distinction within the human species ('races'), and their distribution across the earth. He also acknowledged that certain geographical areas with more complex ethnic compositions, including much of the Horn of Africa and the India subcontinent, did not fit into his racial paradigm. As such, he noted that: "I have purposely omitted such people as the Abyssinians and the Hindoos, who there is every reason to believe result from the intermixture of distinct stocks."^[23] By the late nineteenth century, Huxley's Xanthochroi group had been redefined as the [Nordic race](#), whereas his Melanochroi became the [Mediterranean race](#). His Melanochroi thus eventually also comprised various other dark Caucasoid populations, including the [Hamites](#) (e.g. Berbers, Somalis, northern Sudanese, ancient Egyptians) and [Moors](#).^[24]

Huxley's paper was rejected by the [Royal Society](#), and this became one of the many theories to be advanced and dropped by the early exponents of [evolution](#).

Despite rejection by Huxley and the science community, the paper is sometimes cited in support of racialism.^[25] Along with Darwin, Huxley was a monogenist, the belief that all humans are part of the same species, with morphological variations emerging out of an initial uniformity. (Stepan, p. 44). This view contrasts polygenism, the theory that each race is actually a separate species with separate sites of origin.

Despite Huxley's monogenism and his abolitionism on ethical grounds, Huxley assumed a hierarchy of innate abilities, a stance evinced in papers such as "Emancipation Black and White" and his most famous paper, "Evolution and Ethics".

In the former, he writes that the "highest places in the hierarchy of civilization will assuredly not be within the reach of our dusky cousins, though it is by no means necessary that they should be restricted to the lowest". (Stepan, p. 79–80).

Carleton Coon[edit]

Distribution of the races after the [Pleistocene](#) according to [Carleton Coon](#).

 [Caucasoid race](#)

 [Congoid race](#)

 [Capoid race](#)

 [Mongoloid race](#)

 [Australoid race](#)

[Carleton Stevens Coon](#) (1904–1981) was an American [physical anthropologist](#), Professor of Anthropology at the [University of Pennsylvania](#), lecturer and professor at [Harvard](#), and president of the [American Association of Physical Anthropologists](#).^[29]

In 1939, Coon published [The Races of Europe](#), in which he concluded:^[30]

1. The Caucasian race is of dual origin consisting of Upper Paleolithic (mixture of [Homo sapiens](#) and [Neanderthals](#)) types and [Mediterranean](#) (purely *Homo sapiens*) types.
2. The Upper Paleolithic peoples are the truly indigenous peoples of Europe.
3. Mediterraneans invaded Europe in large numbers during the Neolithic period and settled there.
4. The racial situation in Europe today may be explained as a mixture of Upper Paleolithic survivors and Mediterraneans.
5. When reduced Upper Paleolithic survivors and Mediterraneans mix, then occurs the process of [dinarization](#), which produces a hybrid with non-intermediate features.

6. The Caucasian race encompasses the regions of [Europe](#), [Central Asia](#), [South Asia](#), the [Near East](#), [North Africa](#), and the [Horn of Africa](#).
7. The Nordic race is part of the Mediterranean racial stock, being a mixture of Corded and Danubian Mediterraneans.

In 1962, Coon also published *The Origin of Races*, wherein he offered a definitive statement of the [polygenist](#) view. He also argued that human fossils could be assigned a date, a race, and an evolutionary grade. Coon divided humanity into five races and believed that each race had ascended the ladder of human evolution at different rates.^[20]

3. THE RACE ISSUE

There's No Scientific Basis for Race—It's a Made-Up Label

It's been used to define and separate people for millennia. But the concept of race is not grounded in genetics. [1]

Over the past few decades, genetic research has revealed two deep truths about people. The first is that all humans are closely related—more closely related than all chimps, even though there are many more humans around today. Everyone has the same collection of genes, but with the exception of identical twins, everyone has slightly different versions of some of them. Studies of this genetic diversity have allowed scientists to reconstruct a kind of family tree of human populations. That has revealed the second deep truth: In a very real sense, all people alive today are Africans. Our species, *Homo sapiens*, evolved in Africa—no one is sure of the exact time or place. The most recent fossil find, from Morocco, suggests that anatomically modern human features began appearing as long as 300,000 years ago. For the next 200,000 years or so, we remained in Africa, but already during that period, groups began to move to different parts of the continent and become isolated from one another—in effect founding new populations.

4.

R1a origins (Underhill 2010;^[198]R1a migration to Eastern Europe; R1a1a diversification (Pamjav 2012); and R1a1a oldest expansion and highest frequency (Underhill 2014)

Haplogroup R1a and related haplogroups

R1a origins (Underhill 2010;^[198]R1a migration to Eastern Europe; R1a1a diversification (Pamjav 2012); and R1a1a oldest expansion and highest frequency (Underhill 2014)

Main article: [Haplogroup R1a](#)

The distribution and proposed origin of haplogroup R1a, more specifically R1a1a1b, is often being used as an argument pro or contra the Indo-Aryan migrations. It is found in high frequencies in Eastern Europe (Z282) and south Asia (Z93), the areas of the Indo-European migrations. The place of origin of this haplogroup may give an indication of the "homeland" of the Indo-Europeans, and the direction of the first migrations.^[199]

[Cordeaux et al. \(2004\)](#), based on the spread of a cluster of haplogroups (J2, R1a, R2, and L) in India, with higher rates in northern India,^[200] argue that agriculture in south India spread with migrating agriculturalists, which also influenced the genepool in south India.^{[201][200]}

[Sahoo et al. \(2006\)](#), in response to Cordeaux et al. (2004), suggest that those haplogroups originated in India, based on the spread of these various haplogroups in India. According to Sahoo et al. (2006), this spread "argue[s] against any major influx, from regions north and west of India, of people associated either with the development of agriculture or the spread of the Indo-Aryan language family".^[200] They further propose that "the high incidence of R1* and R1a throughout Central Asian and East European populations (without R2 and R* in most cases) is more parsimoniously explained by gene flow in the opposite direction",^[202] which according to Sahoo et al. (2006) explains the "sharing of some Y-chromosomal haplogroups between Indian and Central Asian populations".^[200]

Sengupta et al. (2006) also comment on Cordeaux et al. (2004), stating that "the influence of Central Asia on the pre-existing gene pool was minor", and arguing for "a peninsular origin of Dravidian speakers than a source with proximity to the Indus and with significant genetic input resulting from demic diffusion associated with agriculture".^[203]

Sharma et al. (2009) found a high frequency of R1a1 in India. They therefore argue for an Indian origin of R1a1, and dispute "the origin of Indian higher most castes from Central Asian and Eurasian regions, supporting their origin within the Indian subcontinent".^[204]

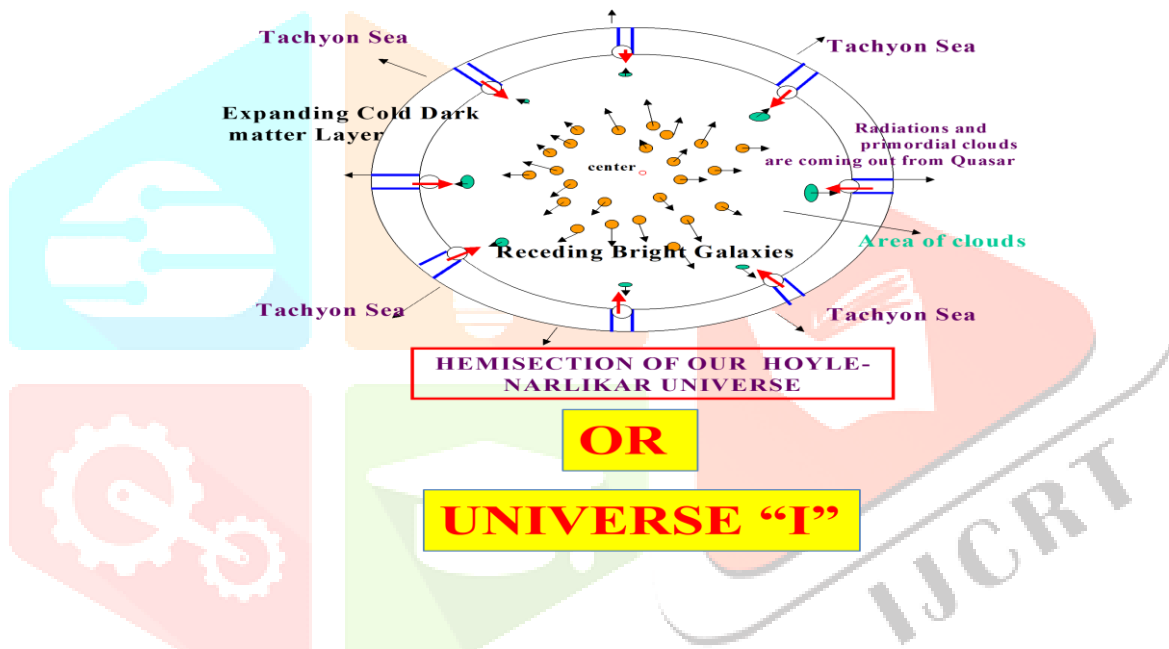

Underhill et al. (2014/2015) conclude that R1a1a1, the most frequent subclade of R1a, split into Z282 (Europe) and Z93 (Asia) at circa 5,800 before present.^[205] According to Underhill et al. (2014/2015), "[t]his suggests the possibility that R1a lineages accompanied [demic expansions](#) initiated during the Copper, Bronze, and Iron ages."^[206] They further note that the diversification of Z93 and the "early urbanization within the Indus Valley also occurred at this time and the geographic distribution of R1a-M780 (Figure 3d) may reflect this".^[206]

Palanichamy et al. (2015), while responding to Cordeaux et al. (2004), Sahoo et al. (2006) and Sengupta et al. (2006), elaborated on Kivisild et al.'s (1999) suggestion that West Eurasian haplogroups "may have been spread by the early Neolithic migrations of proto-

Dravidian farmers spreading from the eastern horn of the Fertile Crescent into India".^[207] They conclude that "the L1a lineage arrived from western Asia during the Neolithic period and perhaps was associated with the spread of the Dravidian language to India", indicating that "the Dravidian language originated outside India and may have been introduced by pastoralists coming from western Asia (Iran)".^[208] They further conclude that two subhalogroups originated with the Dravidian speaking peoples, and may have come to South India when the Dravidian language spread.^[209]

Poznik et al. (2016) note that "striking expansions" occurred within R1a-Z93 at ~4,500–4,000 years ago, which "predates by a few centuries the collapse of the Indus Valley Civilisation".^[210] Mascarenhas et al. (2015) note that the expansion of Z93 from Transcaucasia into South Asia is compatible with "the archeological records of eastward expansion of West Asian populations in the 4th millennium BCE culminating in the so-called Kura-Araxes migrations in the post-Uruk IV period".^[211]

Hoyle Narlikar Universe - OR -- Universe "I"

What is New Physics or Physics of Mind ?

Hoyle - Narlikar Universe

ORIGIN OF THE UNIVERSE
CONTINUOUS CREATION THEORY—
HOYLE AND NARLIKAR THINK THAT NEW MATTER IS BEING CREATED DUE TO 'IMPROLSON' TO BALANCE THE EXPANSION OF THE UNIVERSE, WHICH ASTRONOMERS HAVE OBSERVED. INSIDE QUASAR STRINGS GRAVITATIONAL COLLAPSES MAY FORM SOME MATTER IN THE UNIVERSE. THE HUGE LUMINOSITY AND THE RADIOEMISSION FROM THESE QUASAR STRINGS APPEAR TO BE 'GRAVITY POWERED' UNLIKE ORDINARY STARS WHICH DERIVE THEIR ENERGY FROM NUCLEAR REACTIONS

DEVELOPMENT OF THE UNIVERSE

Special Theory of Relativity (1905) is not Physics of very fast . It has distorted concept of Basic Quantities of MLT . Hence it is illusive Theory

Very Fast Means—Tachyons Particles
FTL Phenomenon

All three Work by
Divine mechanics

MODEL OF BASIC BUILDING BLOCKS OF THE UNIVERSE

Divine Mechanics Connects All three

Very Massive Means— Hoyle Narlikar Universe
And Divine MOND (Gravity Theory)

Very Small Means— Basic Building Blocks
God Particles

Theory of General Relativity (1916) and Big bang are not Physics of very massive . It is illusive Theory of Gravity and universe origin

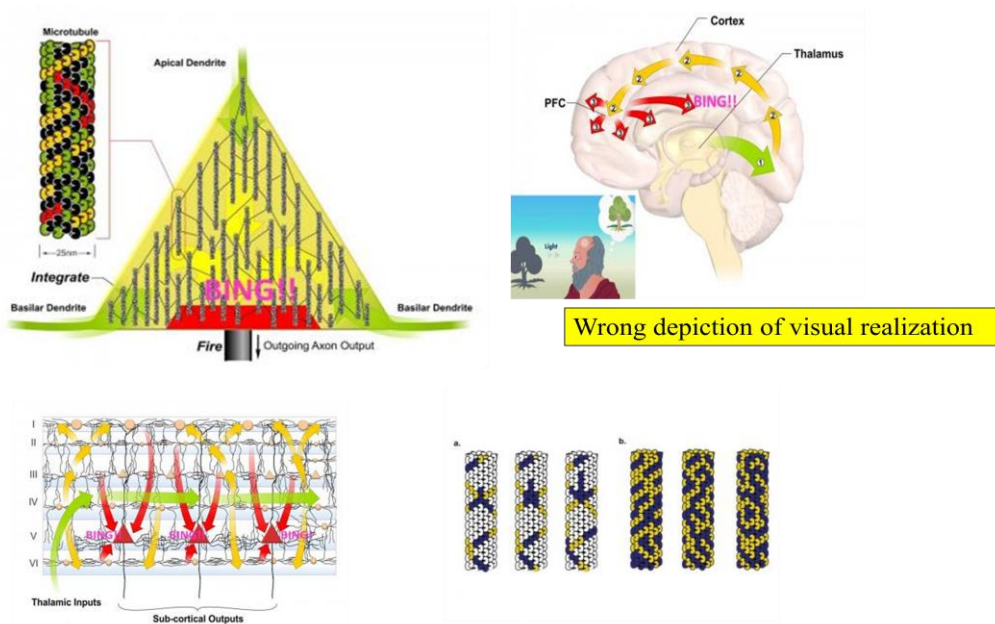

Quantum Mechanics (1925) is not Physics of very Small . Superposition and Dual nature of light and matter are illusive theory

Physics of very fast , very massive and very small
Is participatory Science Or Mind Incorporation in Physics

Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate

across scale, control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation.

Colleagues Travis Craddock and Jack Tuszyński and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders. Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

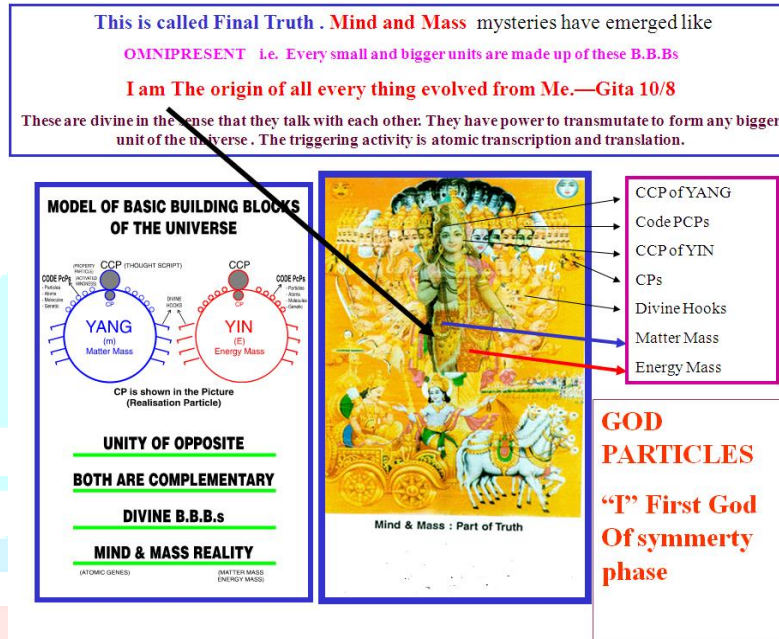

Fig. 1 Divine Mechanics Unit – CCP, CP and information s – Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations . New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “I” about 5000 years back to Arjuna in Mahabharata.as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties conscious ness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation . In all, it is automatic system of the universe . The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side) . These are named as code PCPs or messenger atomic genes . The central face is CCP or Thought script where all thoughts of the universe are banked . It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles . It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes) . That translates the messages and realizes it and reacts accordingly.[2]

1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

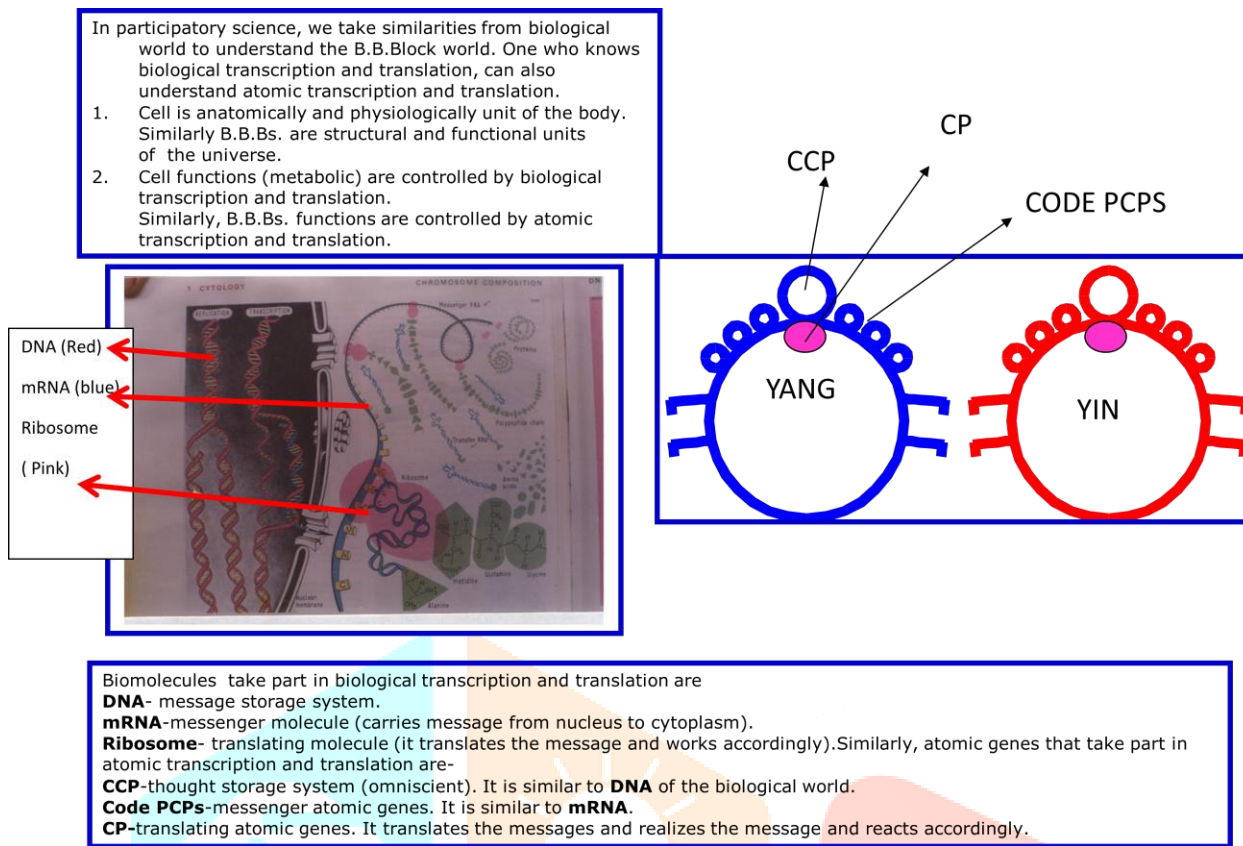

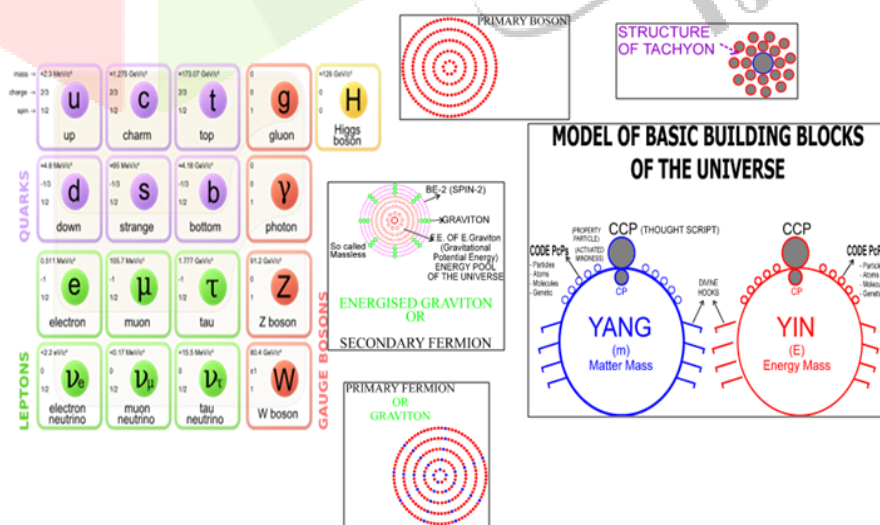

Fig. 2 Parallel teaching by participatory science

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons , primary fermions, primary bosons , Basic Building Blocks , Mind and Tachyons as shown in Fig 3

Standard model completed with Fundamental particles and Mind And Tachyons

Fig. 3 standard Model chart [3]

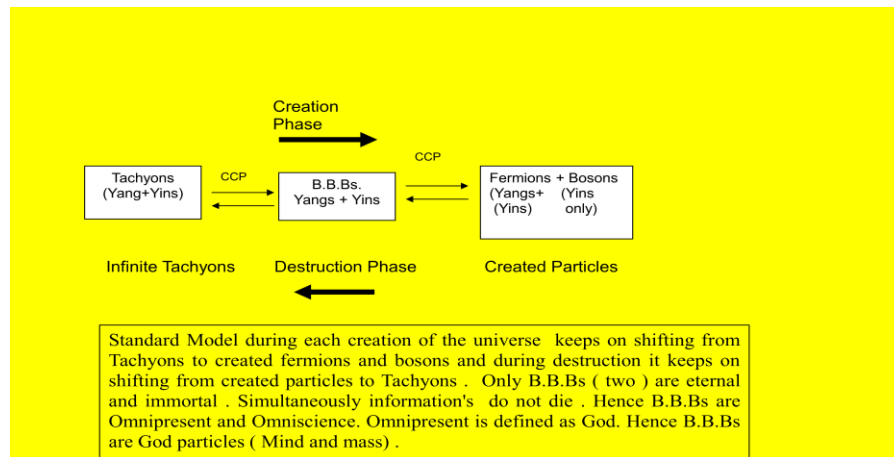

Fig 3.1 one creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1. Mass - The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.
2. Matter :-Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.
3. Inertial mass :-Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.
4. Gravitational mass :- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.
5. Pure m (matter) mass :-matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.
6. Energy mass:-Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc) units.
7. m (impure matter) of $E=mc^2$:-Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain.

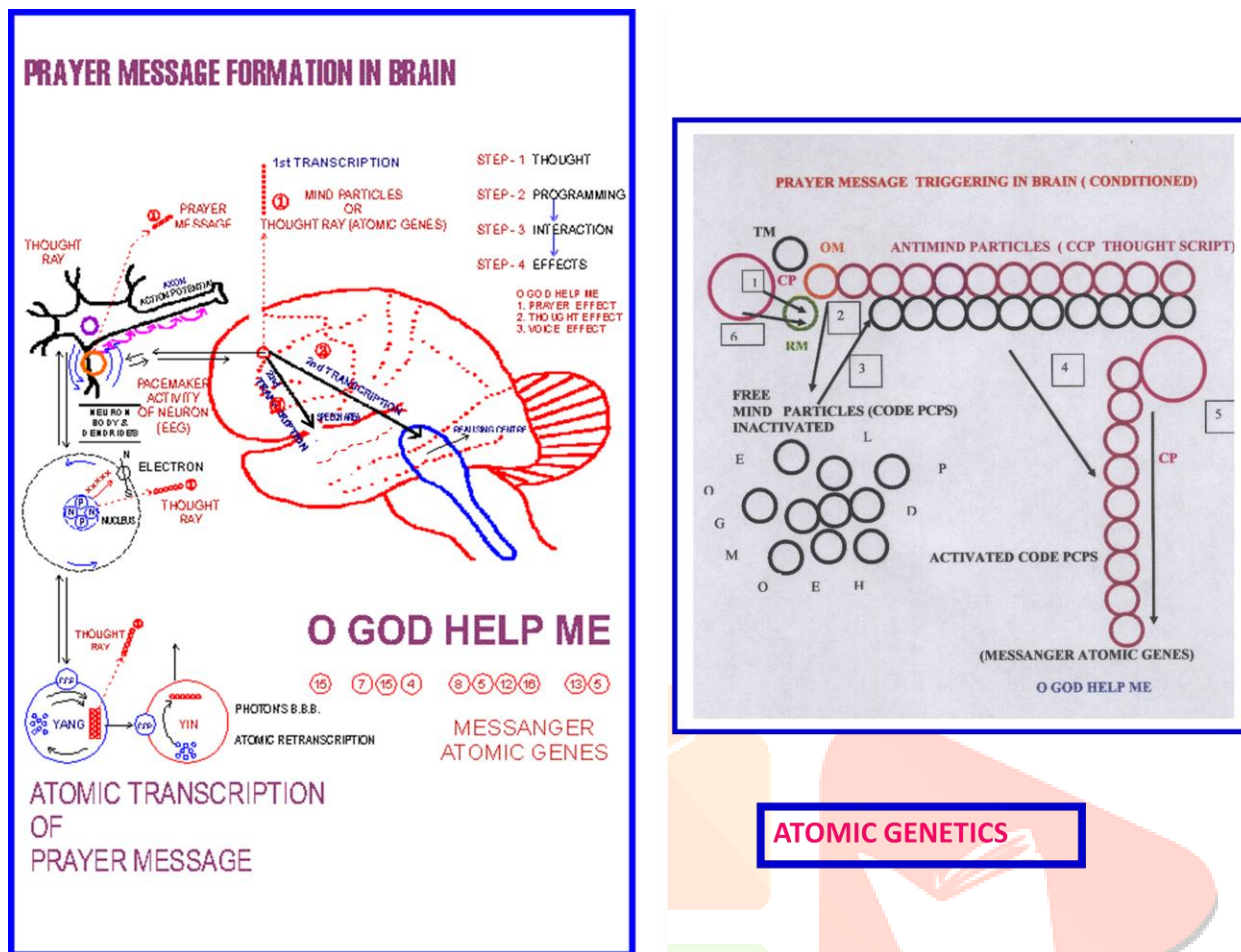

Fig 4 Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

1. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
2. OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me”.
3. Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me”.
4. Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “ o god help me”
5. CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “ o god help me” is formed .
6. CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets halt.

Having formed the message it comes out in three forms .

In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest

center of the universe. It is called **THOUGHT RAY (Quantum entanglement)** which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards **REALIZING CENTER** situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called **ATOMIC GENETIC ENGINEERING** as shown in **Figure 4.1**

The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. **Or diseased cell gets cured [6]** as shown in **Fig 4.1**

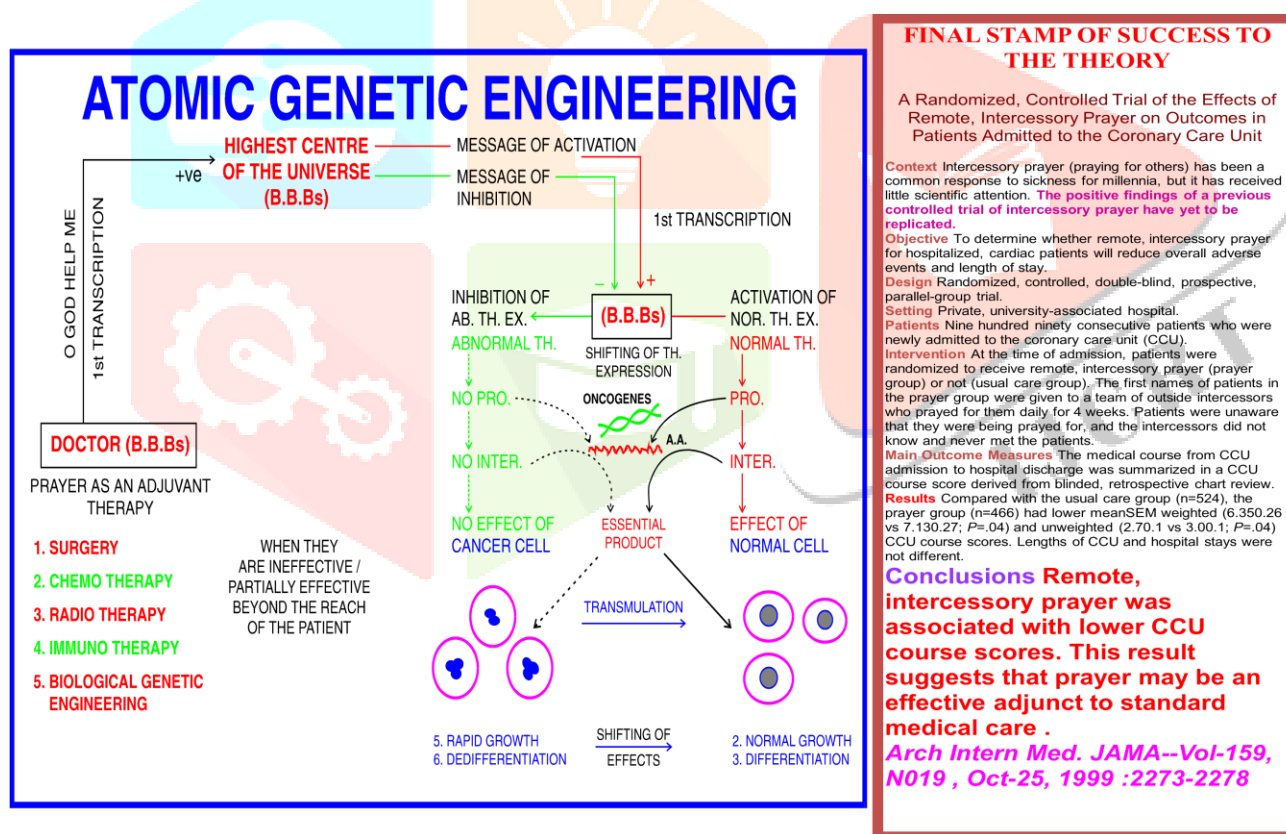

Fig 4.1 A.G.E and Final stamp of success to New Theory[6]

1.5 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system.

After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PCPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms ,molecules, cells, and even individuals talk with one another

After the formation of the cell , nature created one more system called THIRD TRANSCRIPTION .Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed.

These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

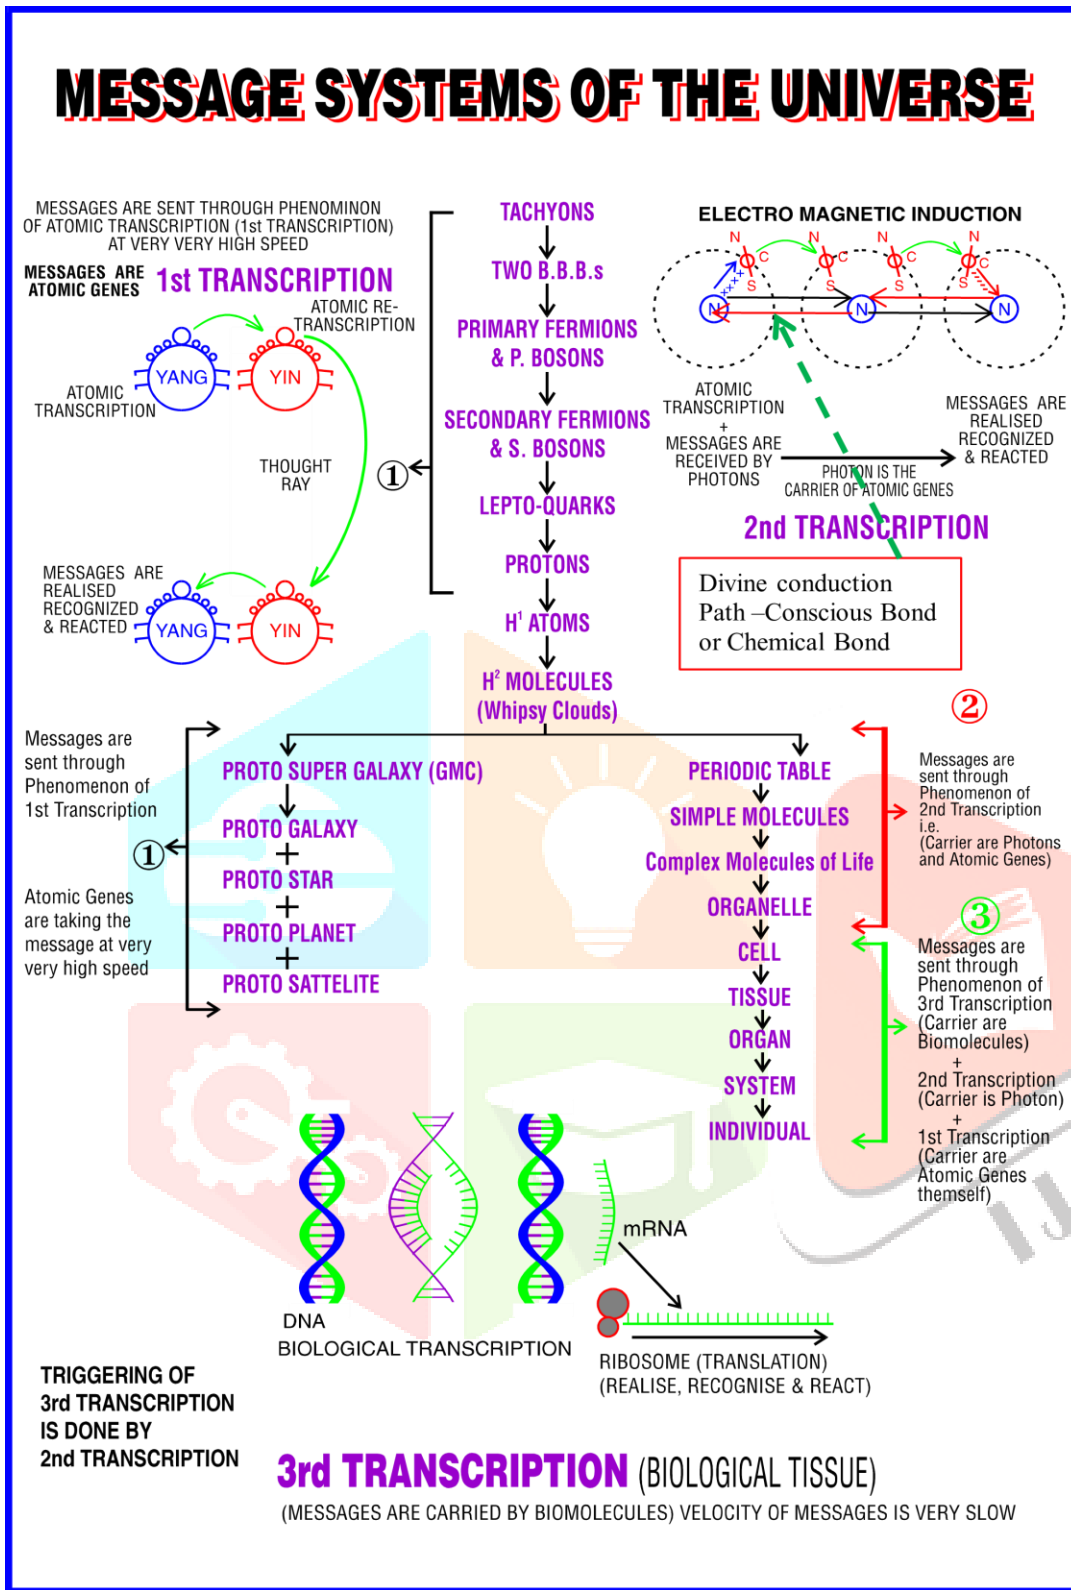

Fig. 5 Messages system of the universe

1.6 How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in Fig 6 and Fig 7. . There are two types of thought stimulation [2] . One is CONDITIONED THOUGHT STIMULATION and other one is UNCONDITIONED THOUGHT STIMULATION.

STIMULATION OF THOUGHT EXPRESSION --- There are two types of thought expressions one is CONDITIONED STIMULATION of thought expression, and other one is self stimulation of thoughts i.e. UNCONDITIONED STIMULATION of thought expression .

At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is THOUGHT expression. These thought expressions were triggered by UNCONDITIONED OR SELF STIMULATED WAY . It is the first step and it is followed by PROGRAMMING or formation of programmed messages by code PCPs. This programmed message moves from higher centers to target B.B.Bs. it is called INTERACTION. Having received the messages, the mind and mass of the target B.B.Bs. work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expressions by higher center is normal, the shapes, properties and laws produced by target B.B.Bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called EFFECT. Appearance of new shapes. properties and laws is called TRANSMUTATION. The first three steps are collectively called CCP. During transmutation process if CCP is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

The subatomic particle are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry . So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

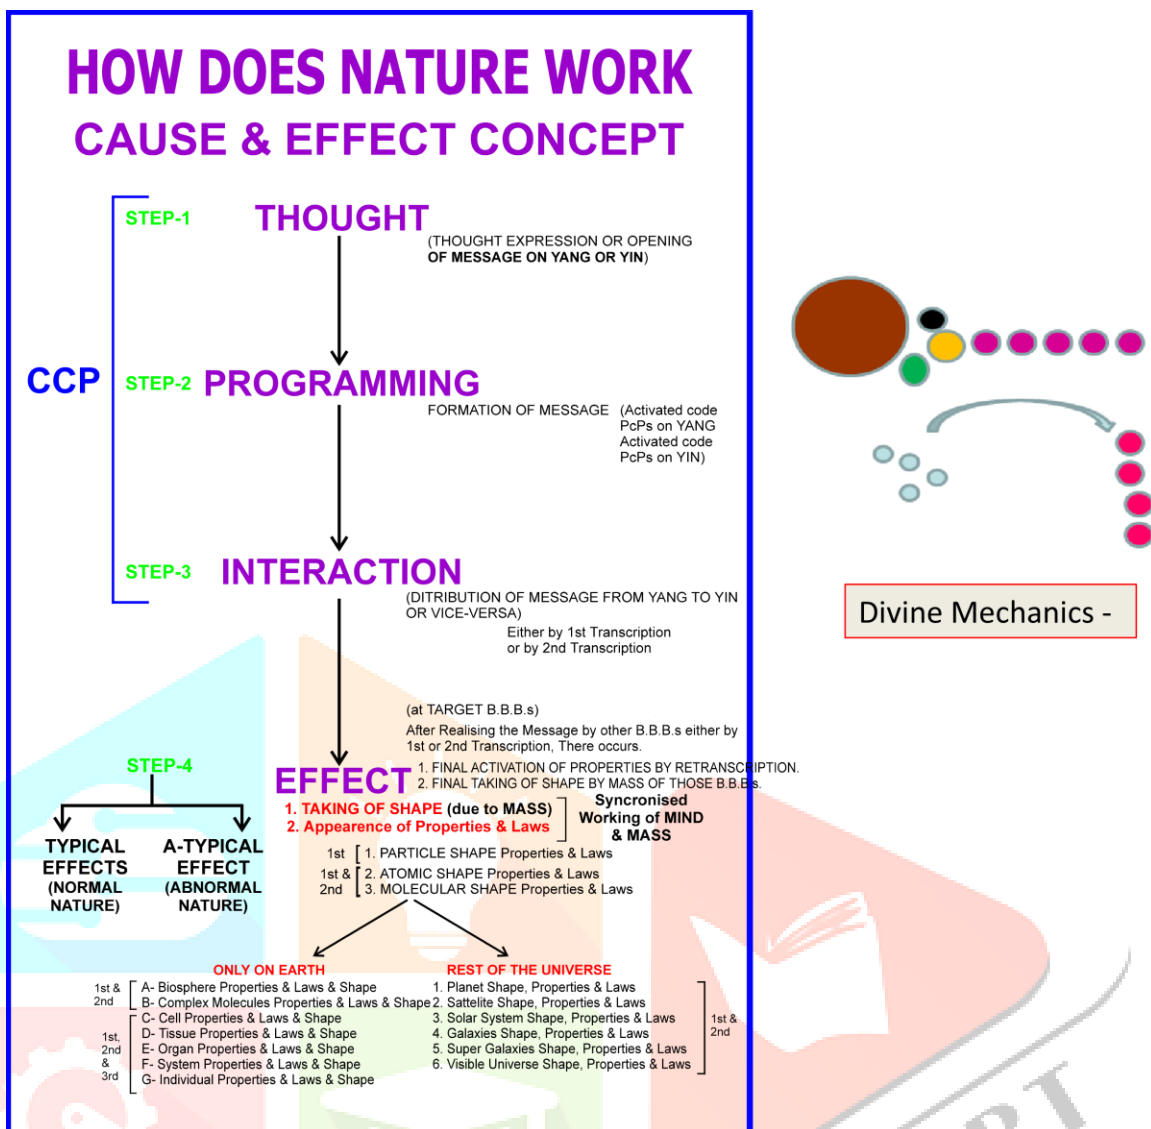

Fig. 6 Divine Mechanics – How Does Nature work ?

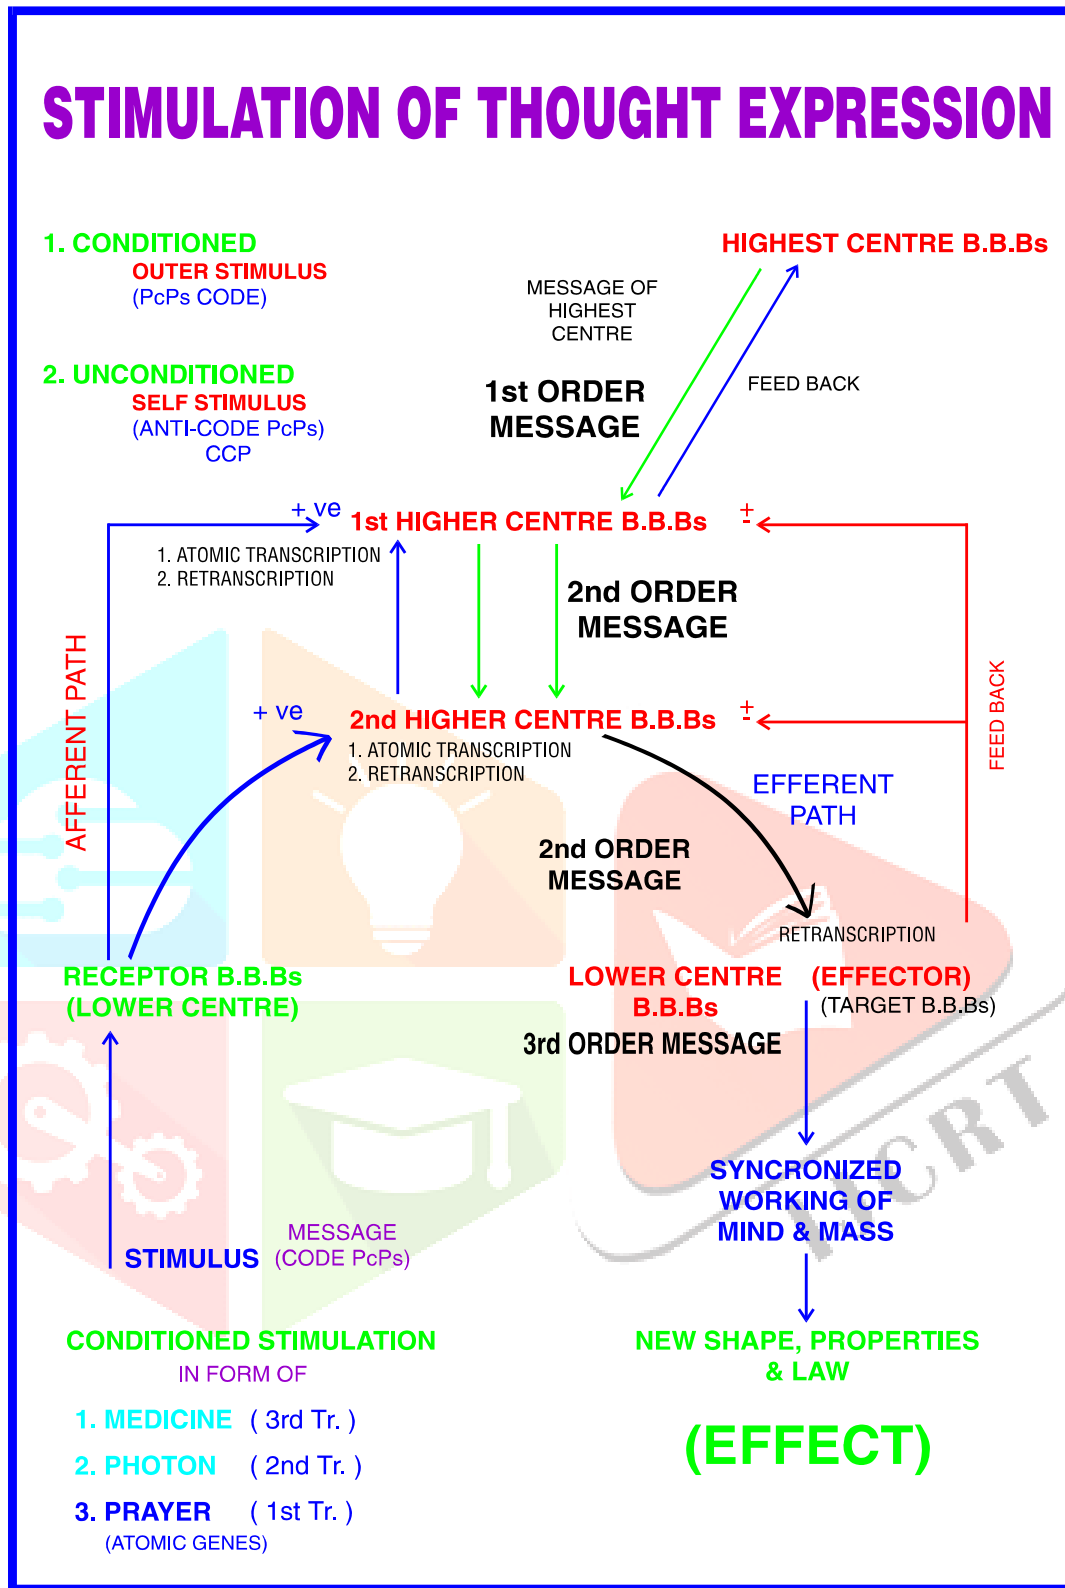

Fig. 7 Conditioned and Unconditioned thought expressions

1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units ,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons).

Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8

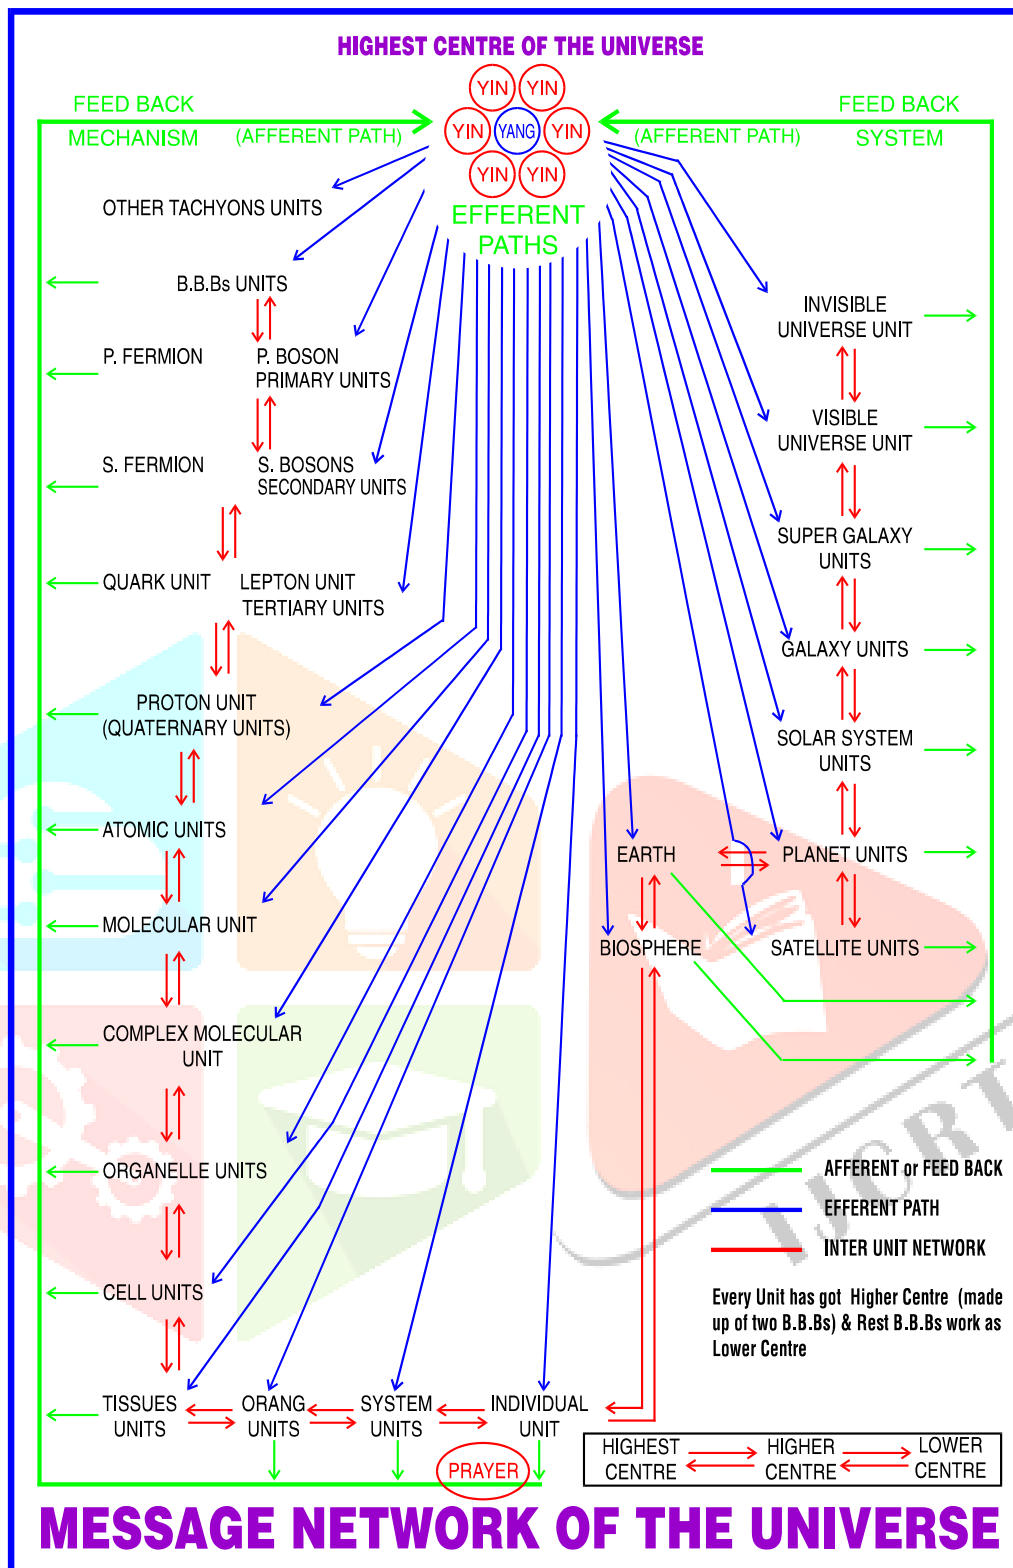

Fig. 8 Messages Net work of the Universe

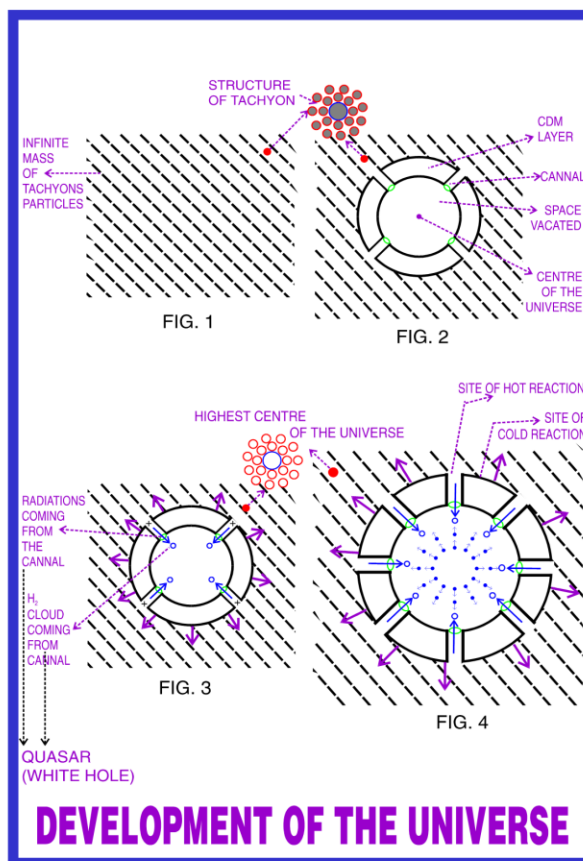

1.8 Origin of the universe [7]

Hoyle – Narlikar Universe

ORIGIN OF THE UNIVERSE CONTINUOUS CREATION THEORY---

HOYLE AND NARLIKAR THINK THAT NEW MATTER IS BEING CREATED DUE TO 'IMPLOSION' TO BALANCE THE EXPANSION OF THE UNIVERSE, WHICH ASTRONOMERS HAVE OBSERVED. INSIDE 'QUASI STARS' GRAVITATIONAL COLLAPSES MAY FORM SOME MATTER IN THE UNIVERSE. THE HUGE LUMINOSITY AND THE RADIOEMISSION FROM THESE QUASI-STARS APPEAR TO BE 'GRAVITY POWERED' UNLIKE ORDINARY STARS WHICH DERIVE THEIR ENERGY FROM NUCLEAR REACTIONS

UNIVERSE "I"

Fig. 9 Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in **Fig-3** were in the form of tachyons as shown in **Fig-9** [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the **highest center** of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in **Fig 3.1**. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of **COLD DARK MATTER (C.D.M)** and canals in it. With the result space got created. At the other end of the canals, hot reaction started (**the relics are back ground radiations 2.7 degree K of our hydrogen clouds**). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus **QUASARS** appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in **Fig 9** . With the passage of time more and more C.D.M. layer formed, more and more

quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The **HUBBLE LAW**, can thus be explained. With some more passage of time, clouds were joined to form **GMC** (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated . I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe , it was mind reality that triggered symmetry breaking phase . It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle . There is nothing like artificial intelligence in the universe . These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe) . His mind could be manipulated by prayer only . as shown in figure 9.1 and 9.2

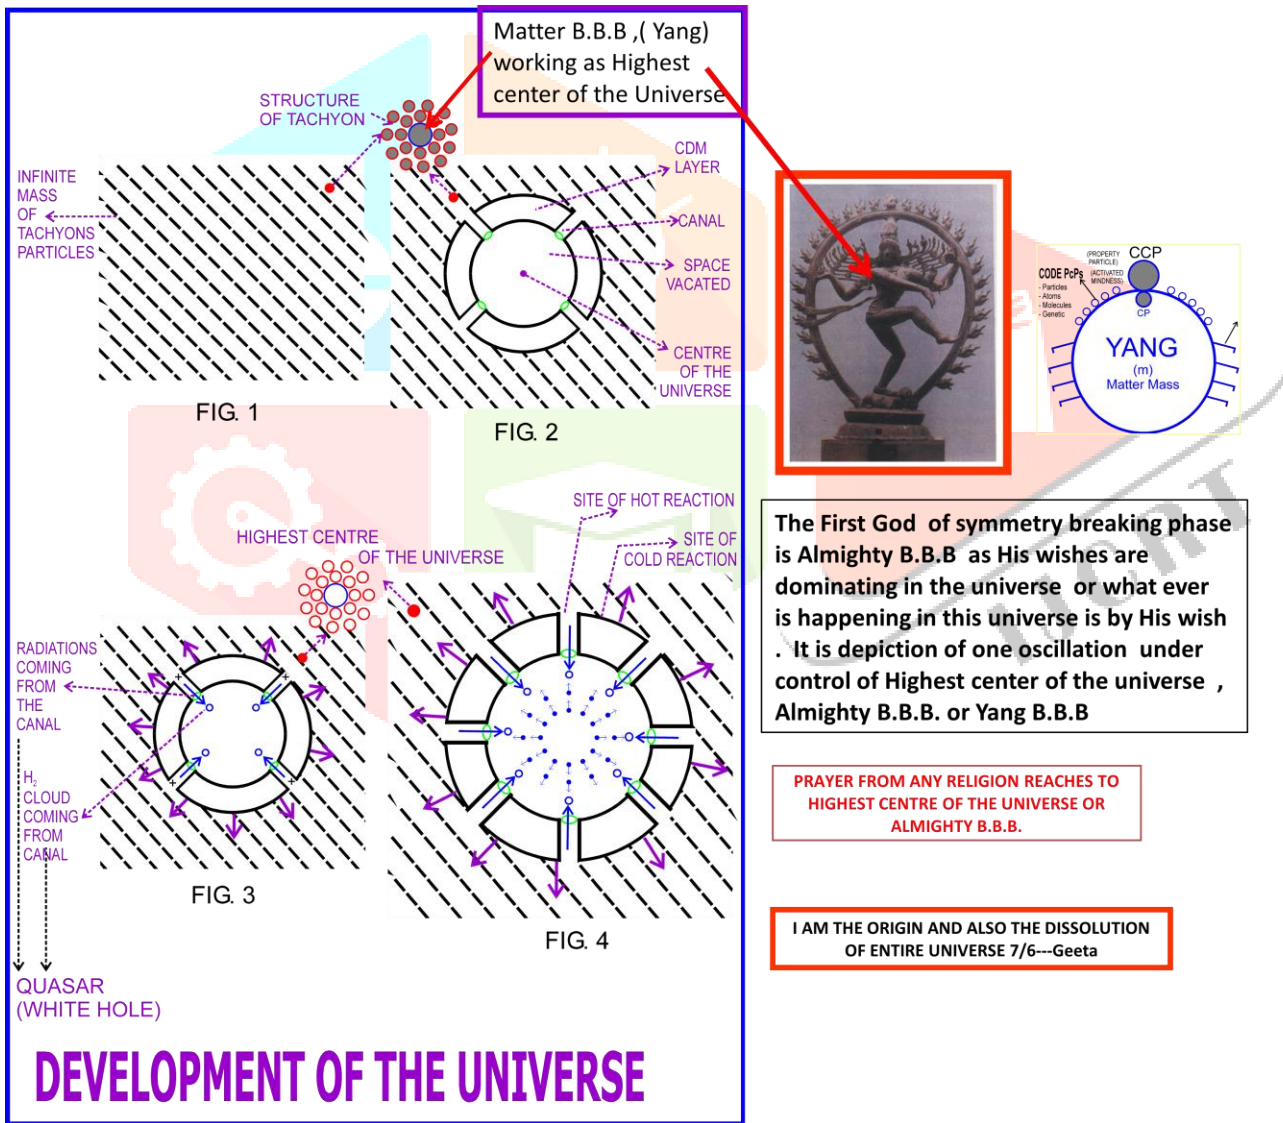

Figure 9.1 Hoyle Narlikar Universe OR Universe “T”

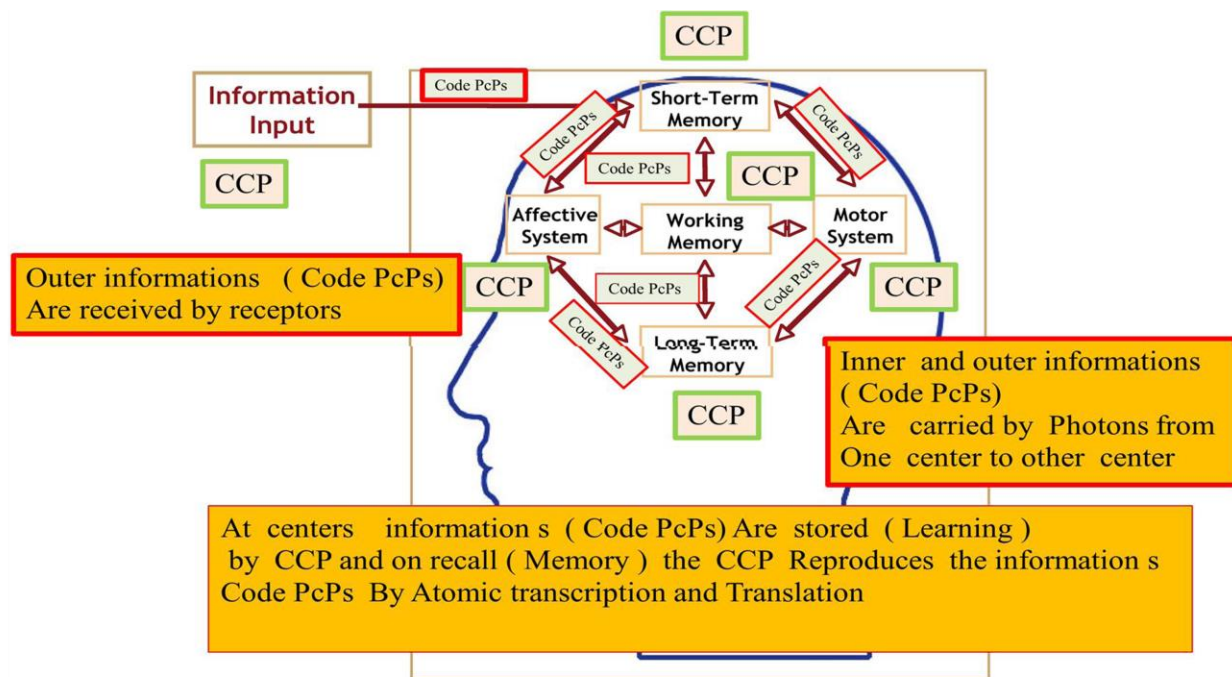

Fig 11 structural configuration of DM and DE at macro level [9]

1.10 Divine Mechanics and Brain Computation

Learning and Memory and information s (Code PcPs) Net work in Brain [10]

Divine Mechanics and Brain Computation

Fig 12 Divine Mechanics of Brain Computing System – Learning and memory

At all steps, these are B.B.Bs (B-Bit) that are responsible for information's control and triggering. If CCP is written it means unless atomic transcription and translation occur, brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life. These are higher thought expressions of B.B.Bs. In Bits of classical computers and qubits of QC, the thought expressions are lower and different but the mechanics (DIVINE) remains the same. as shown in Fig. 12

Fig 13- The Theory of Computers and Brain are same – DIVINE MECHANICS

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP , Code PcPs and CP.)

DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13

Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not . Hence the bit is a typical unit of information. ((Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system ,it is the different thoughts expressions that describe informations . Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron , at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B- bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence informations are eternal . In computers, Bit is a structural configuration that describes informations of the system and informations are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different . But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal . In both the effect of describing informations would be different.

One is classical (thought expressions are fixed and limited)and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results .) . In life sciences in Brain the bit is again Photon and the informations are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS .

In life sciences the CCP (cryptography) of B-bit expresses information's (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age /real age) . It is Higher functions of B.B.B or B Bit and it is life . Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

Structure

2.1 Modified theory of atomic structure as Niels Bohr's theory has limitations in explaining different series of hydrogen spectra.

New assumptions of structure of hydrogen atom. – Divine Modified Niels Bohr 's Theory (**Divine MONB Theory**) as shown in Fig 14

1. Hydrogen atom is like a miniature solar system with the negatively charged electron moving in circular orbit around positively charged nucleus having positively charged particle proton. In this circular orbit or stationary orbits , electron is being held by single string of energized gravitons . This energy level is called ground state.
2. When Hydrogen atom is excited, the electron moves from ground state to excited state energy levels making a bigger circular orbit and having reached in this new energy levels , it also emits radiations . Hence absorption and emission of energy quanta occur simultaneously. Shifting is understood in inter orbital shift phenomenon.
3. When excitation is over, the electron once again come back to ground state energy level . All above mentioned events are triggered by different thoughts or atomic transcriptions from the nucleus or proton in case of hydrogen atom.
4. These atomic transcriptions are being triggered by conditioned stimulation of CCP by the message system made up of photons (second transcription or -ve charged photons or afferent path) coming from electron to proton and further they are transmitted by photons (second transcription made up of +ve charged photons, or efferent path) to electron. Having received the messages , electron works accordingly. Unless the thought is expressed, nature cannot work . as shown in Fig 14
5. When electron is in ground state, its interaction with energized graviton and electromagnetic photon is more hence IP -13.59ev (n=1) is required to remove electron from this energy level. During excited stage the interaction is different hence I.P. to remove electron from this state is -3.4ev (n=2), -1.511ev (n=3),- 0.850ev (n=4) , -0.544ev (n=5) respectively. It the changing thought of interaction with energized graviton and electromagnetic photons that gives changing effect .
6. Electronic configuration of higher atoms could be known by studying I.P. curve . Working of hydrogen atom as shown in Fig 14

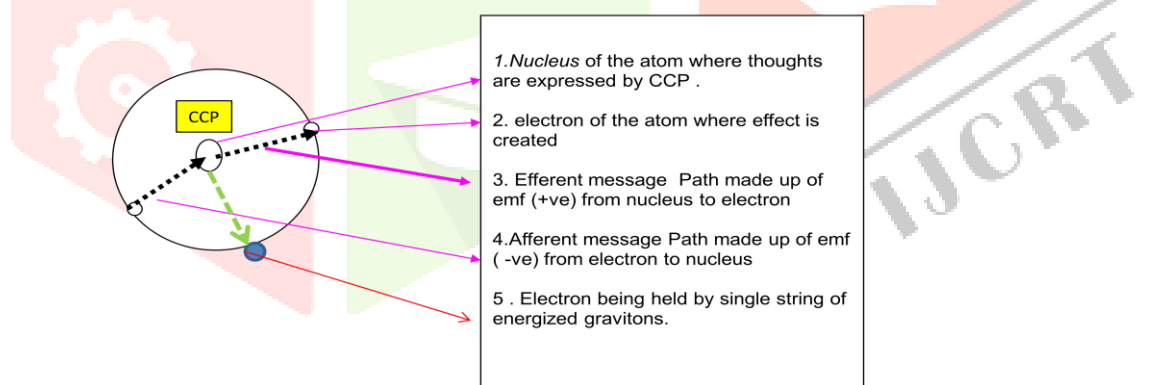

Fig 14 working of hydrogen atom – Divine MONB Theory

2.2 Atomicgenetics and Origin of Earth

To know mystery of Origin of Homo sapiens racial origin , we have to understand origin of solar system .

ORIGIN OF THE EARTH AND SOLARSYSTEM

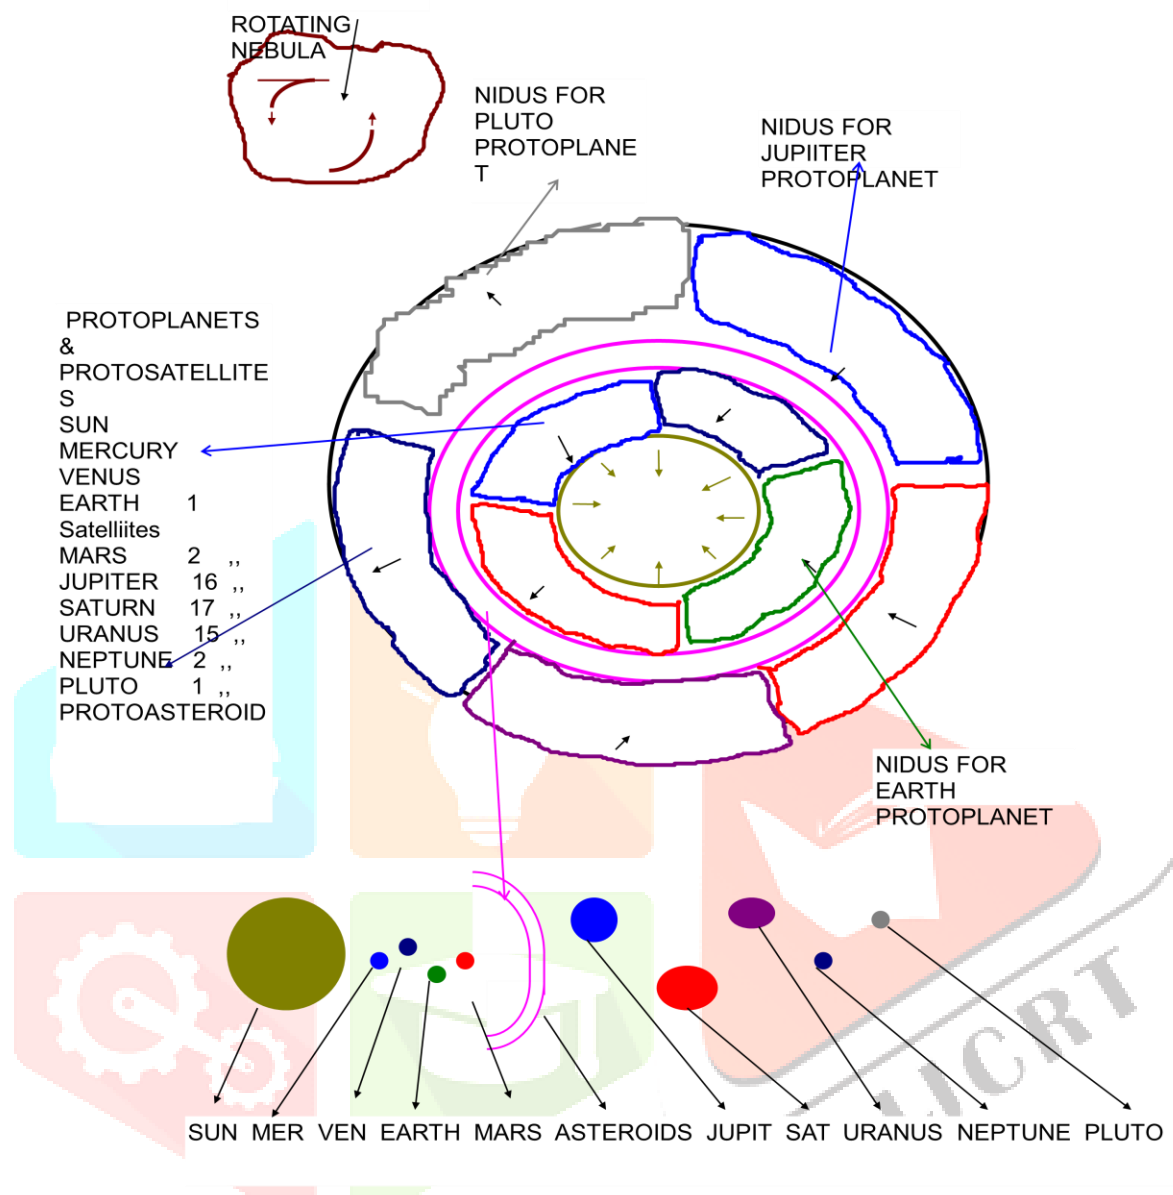

Figure 15 origin of solar system

Till today it is believed that earth is the part of sun and sun is second generation star. There are observations which contradict this hypothesis. After the formation of rotating GMC (giant molecular cloud), there developed many nidus (B.B.Bs working as higher centers) in the rotating nebula. These higher centers expressed thoughts of condensation of nebula in different sectors that will give rise to formation of proto stars, protoplanets, proto satellites and proto asteroids and thoughts of contraction or collapse that will cause shrinkage of proto star, protoplanets and proto satellite. The formation of asteroid belt is due to thought expression of clumping or collapse. Thus there developed many different sectors in same nebula. Along with this the spin thoughts were also triggered. This led to development of spin of proto star, protoplanets, proto satellites and proto asteroids. Finally the nebula transformed into proto star, protoplanets, proto satellites and proto asteroids. About 4.6 billion years ago, formation of our solar system took place. (Figure 15) In these proto star, protoplanets, proto satellites, proto asteroids many other different thought expressions were expressed by many other higher centers (B.B.Bs) that had led to formation of sun, different planets, different satellites and asteroid belt between mars and Jupiter. ALL ARE BORN FROM SEPARATE NEBULAR SECTORS AND THUS THEY ARE CREATED WHERE THEY ARE PRESENT NOW IN ORBIT. They all have their different shapes, size, different properties, different compositions and behavior which were triggered by

many different higher centers..The asteroid belt present between Mars and Jupiter was created from proto asteroid by phenomenon of clumping. THIS WAS ALL DUE TO UNCONDITIONED THOUGHT EXPRESSIONS OF B.B.Bs.(Figure 7)

Origin Of Continents And Shifting Of Continents

When the Earth was forming , there developed many other higher centers for different thought expressions. These were--

1. Thought expressions of formation of continents and water.
2. Thought expressions of formation of different layers of the earth.
3. Thought expressions of formation of different layers of atmosphere.

And thus Pangea continent, sea, different layers of earth, and different layers of atmosphere were formed by target B.B.Bs.

Simultaneously there developed other higher centers which expressed following thoughts--

1. Thought expression of ignition of the core
2. Thought expression of magma.
3. Thought expressions of shifting of continents.(Figure 16)
4. Thought expressions of seismic foci
5. Thought expression of water cycle

Figure 16 shifting of continents

And thus formation of heat in the core, magma in mantle layer, seismic foci in lithosphere (Figure 17), shifting of different continents in their respective directions and appearance of water cycle took place by different target B.B.Bs. This was all triggered by unconditioned working of B.B.Bs. The entire transmutation took place simultaneously

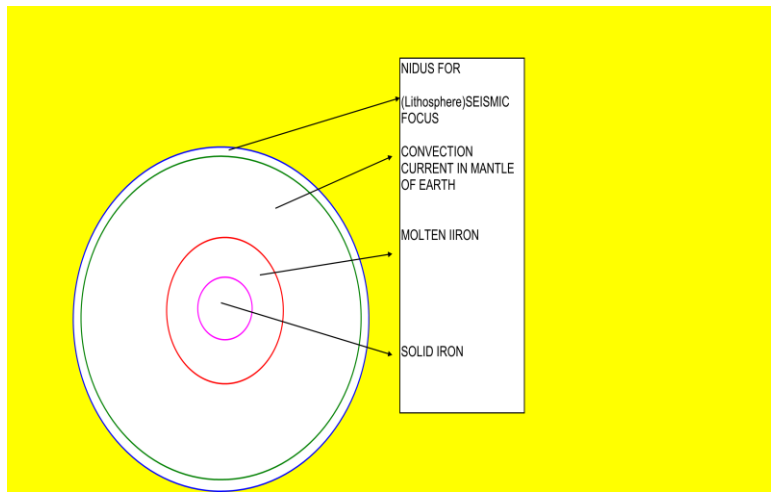

Figure 17 Nidus for seismic foci

2.2 Definition of life and death

Life is nothing but higher thought expressions of basic building blocks. When these thought expressions are inhibited and death thoughts are triggered we become dead.

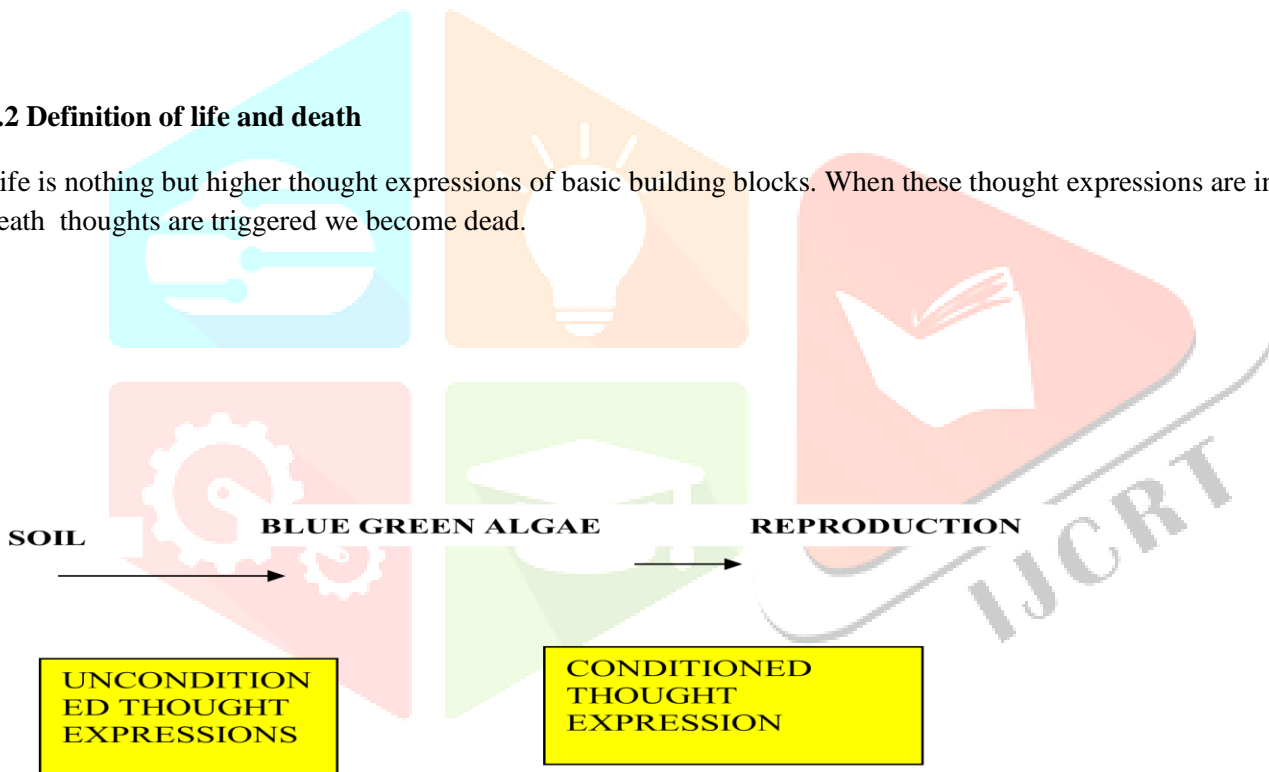

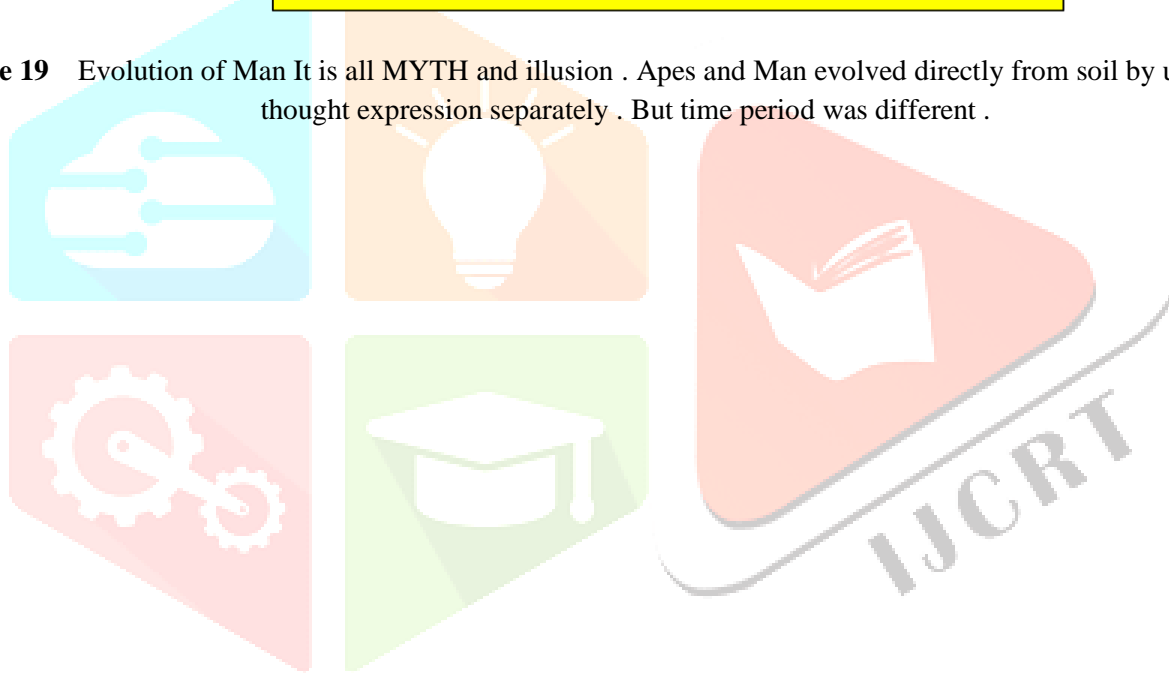

Fig 18 Origin of First Life on Earth about 3.5 Billions year back

Evolution of Man It is all MYTH and illusion

Figure 19 Evolution of Man It is all MYTH and illusion . Apes and Man evolved directly from soil by unconditioned thought expression separately . But time period was different .

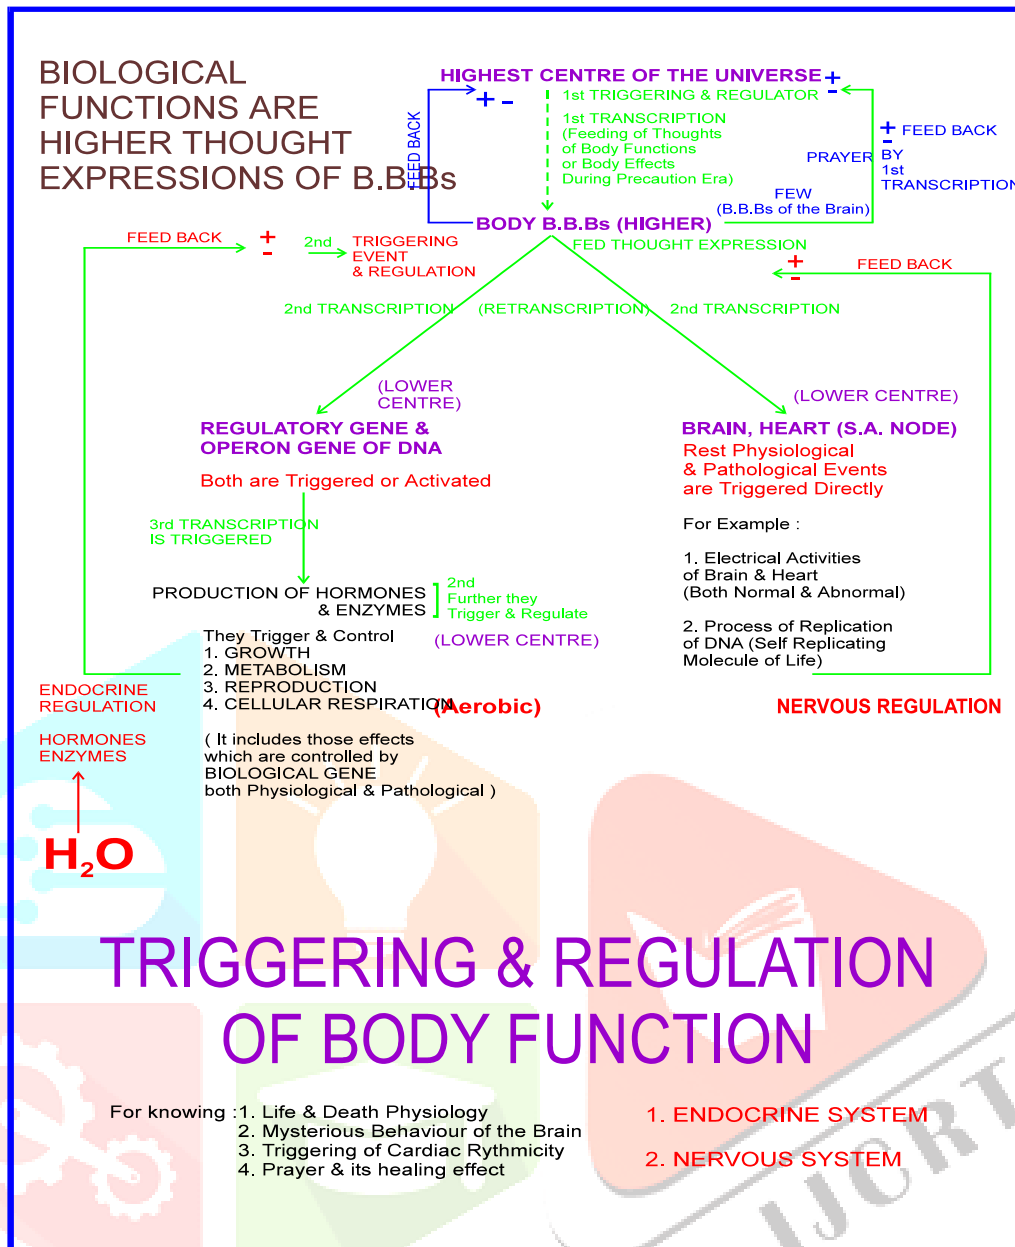

Figure 20 Conditioned stimulation of thoughts or CCP

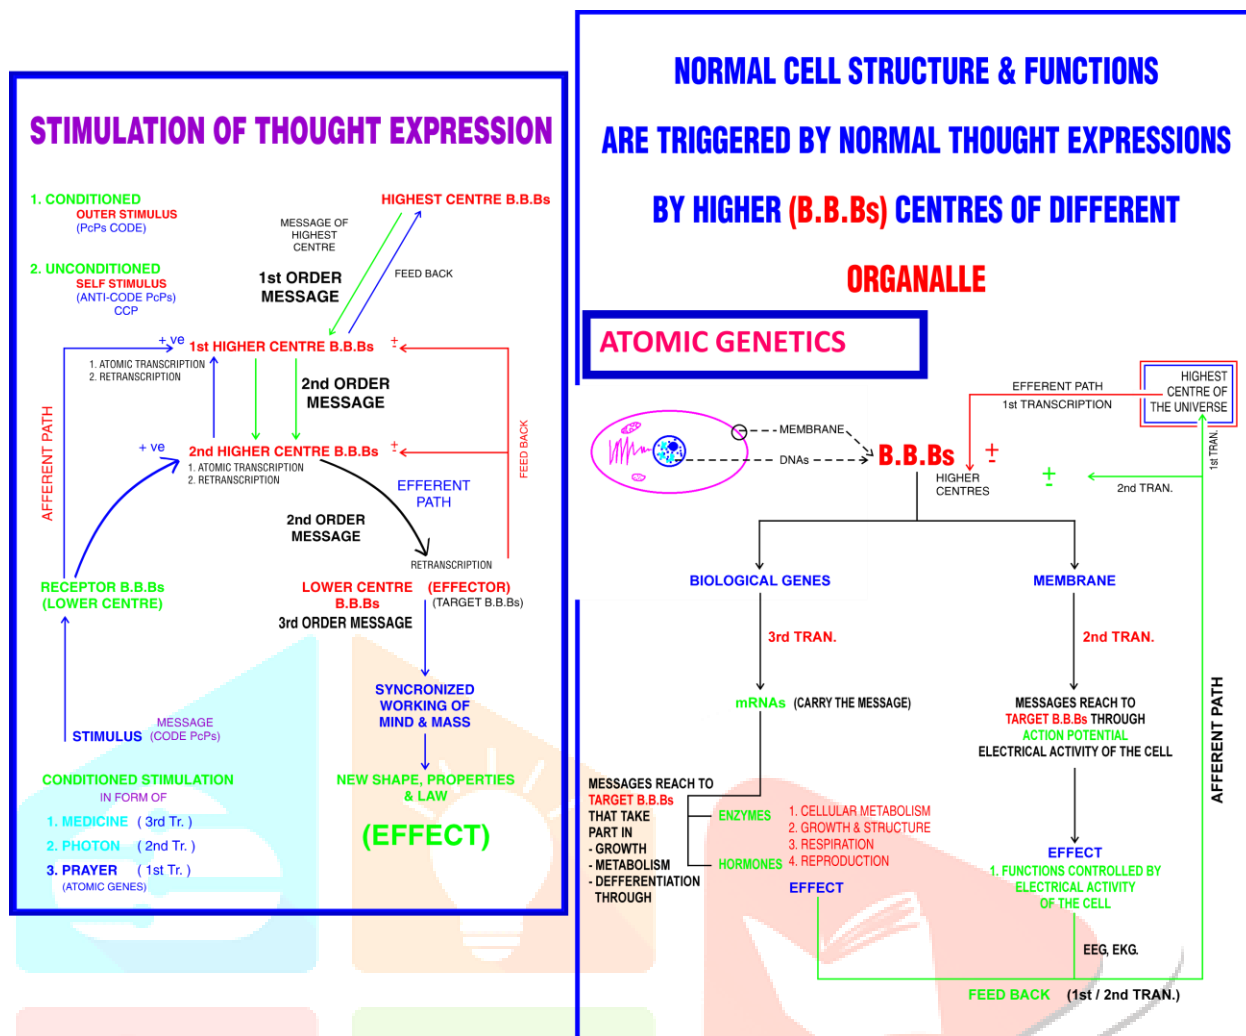

Figure 21 Life activities are triggered by thoughts or CCP

Phenomenon of Germination – Higher thought expression of B.B.B leading to Germination or Plant formation . New Definition of Life

Seed - Sleeping stage of B,B,B –Close Eyes

Plant - Arousal stage of - open Eyes

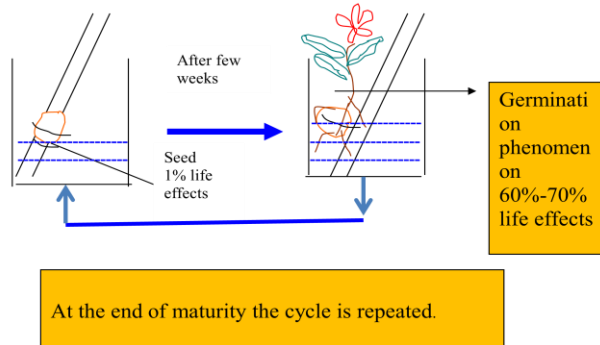

Figure 22 Phenomenon of Germination conditioned stimulation of CCP. Sleep arousal property in plants

Few functions are triggered by **conditioned stimulation** of thoughts like life and death physiology i.e. if you add water , you would see life effect and if you remove water , you would see death effect. (Fig 19)

MICCHANICS OF LIFE AND DEATH (Figure 22)

Seed is alive (say having 1% of life activity) but hardly show any sign of life. It has low water content and exhibits virtually no metabolic activity. Such quiescent seeds can live for many years but germinate when soaked in water under suitable temperature and in presence of oxygen. Metabolic activity (anaerobic) are very low in seeds. Metabolic activities come to visually standstill as the seed coat becomes increasingly impermeable to oxygen and moisture.

The first step in germination is **IMBIBITION**. Imbibition of water causes resumption of metabolic activities. Initially metabolism may be anaerobic (due to energy provided by the glycolysis) but it soon becomes aerobic as oxygen starts entering the seed.

What are life activities?

DNA Activities

- Transcription – that leads to first anaerobic metabolism later aerobic metabolism. It is very very low in seed.
- Replication – it is nil in seed. Replication is the sign of life. If seed does not show replication phenomenon, it means for practical purpose it is dead.

During germination anaerobic metabolism is triggered and later it is shifted to aerobic metabolism. Replication is also triggered. The triggering of both the activities is onset of atomic transcriptions of replication as well as onset of transcriptions of aerobic metabolism. With the result messages come on the surfaces of DNAs and during 3rd transcriptions they are shifted to different mRNAs and finally they reach to different enzymes and hormones. These enzymes and hormones carry messages to target units. With the result we observe phenomenon of germination. The entire working has been depicted by line diagram (**Fig –22**). These atomic transcriptions are stimulated by water that is why it is **CONDITIONED STIMULATION of CCP**. The percentage of thought expressions increase with the time and we observe increase in the number of effects. At present we can say that plant is showing from 1% to 20% or 40% of its effect till it reaches its maturity. At maturity the plant exhibits all effects and at that time we can say it is expressing 100% life atomic transcriptions. With the formation of new seed life atomic transcriptions once again reduced to 1% only. This cycle i.e. going from 1% life effects or atomic transcription to 100% life effects and coming back to 1% again is being visible to us at present. When water is withdrawn, it leads to suppression of life thought expressions and death thought expressions are triggered with the result we observe death effects of plant.

CONCLUSION OF THE EXPERIMENT- The phenomenon of life effect is triggered by atomic transcription of life. Unless life atomic transcriptions are triggered, life effects are not visible. So life effects are nothing but higher thought expressions of basic building blocks. Phenomenon of death is triggered by death atomic transcription. At the time of death life thought expressions are inhibited and death thought expressions are triggered with the result we observe death effects. Water only stimulates life thought expressions that leads to triggering of different life activities (metabolic, replication and other electrical activities) inside the cell. Being a scientist, one must know how do life effects come about. Life effects are higher thought expressions of B.B.Bs. Formation of particles, atoms and molecules are due to lower thought expressions of B.B.Bs. But their higher thought expression lead to appearance of all life effects. One who knows properties of B.B.Bs. and atomic genetics, can understand how life effects are triggered. There is nothing like **SOUL. It is a myth** that when soul goes inside we get life and when it moves out we are dead. When thought expressions of life are suppressed and thought expressions, of death are triggered, we observe death effects. So life effects are basically triggered by atomic transcription occurring on B.B.Bs.

2.3 Origin of Homo sapiens and Racial diversity .

Origin of Homo sapiens and Racism

Fig 23 Origin of Homo sapiens and particular race from soil by unconditioned thought expression triggered by time mindness (TM). Means there were many Adams and Eves were created at different places to create different racialism and casts .

2.4 Origin of Homo sapiens and particular Races (micro level)

Fig 23 In soil , thoughts of Homo sapiens and particular race triggered by TM (micro level)

In phenomenon of, following steps take place on Yang B.B.B – B-Bit of soil (Figure 23) .It is TM that triggers and regulate the thought expressions by activating CP of that script .

- 1.CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of recall is triggered
- 2.OM searches learning mindness on Anti mind particles (Anti mind particles script) of that thought script (blue filed circles- open eye) of “Homo sapiens and particular race separately ”.
3. But as that learning mindness is there with opening eyes of learnt anti mind particles .
4. Inactivated code PcPs “Homo sapiens and particular race separately “ mind particles triggering to lock on Anti mind particles script
5. Formation of activated code PcPs “Homo sapiens and particular race separately ” as stored messages was there in form of memory (open eye)
6. Finally there is activated message of “Homo sapiens and particular race separately ” is formed (Filled magenta circle – open eyes) by CCP (filled circle blue –open eyes) . CP makes phenomenon of splicing .
- 7.CP represses act of recall memory by adding RM (green) to OM (orange) . Thus recalling information s of “Homo sapiens and particular race separately ” get halt.

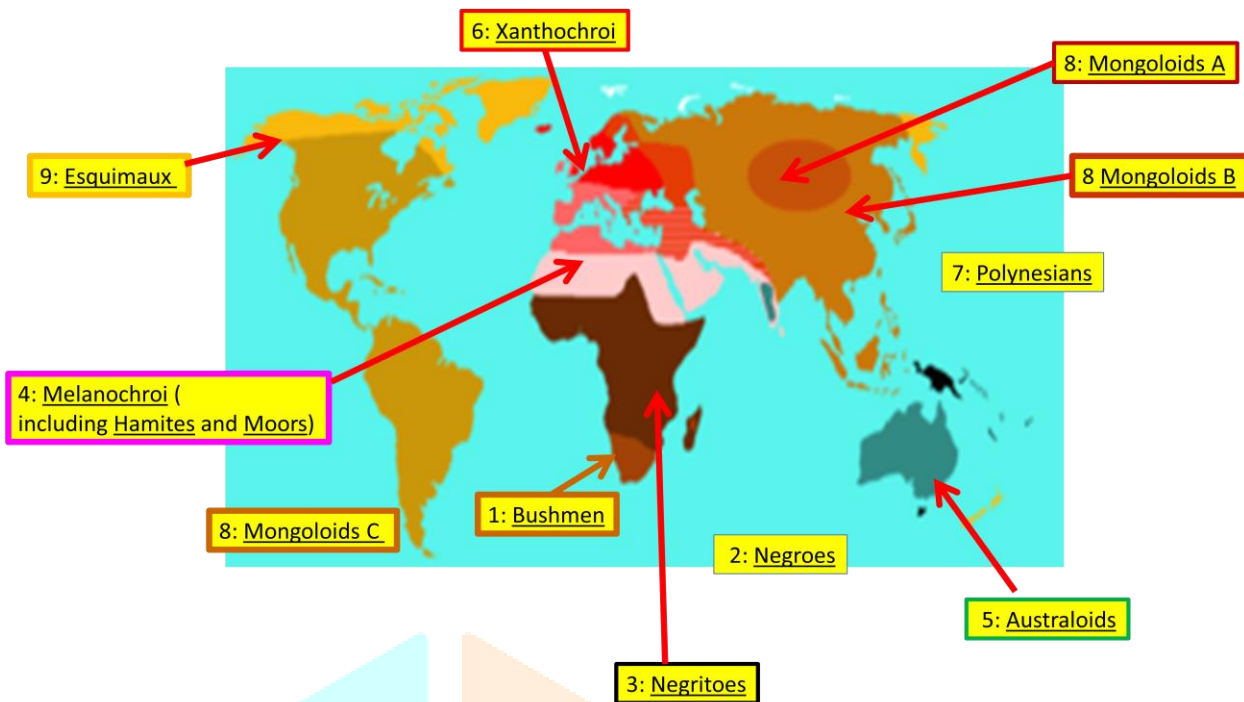

Fig 24 Site of Appearance of *Homo sapiens* and particular races from soil by unconditioned thought expression triggered by TM . (Macro level) Huxley's map of racial categories from *On the Geographical Distribution of the Chief Modifications of Mankind* (1870).

Distribution of the races after the Pleistocene according to Carleton Coon.

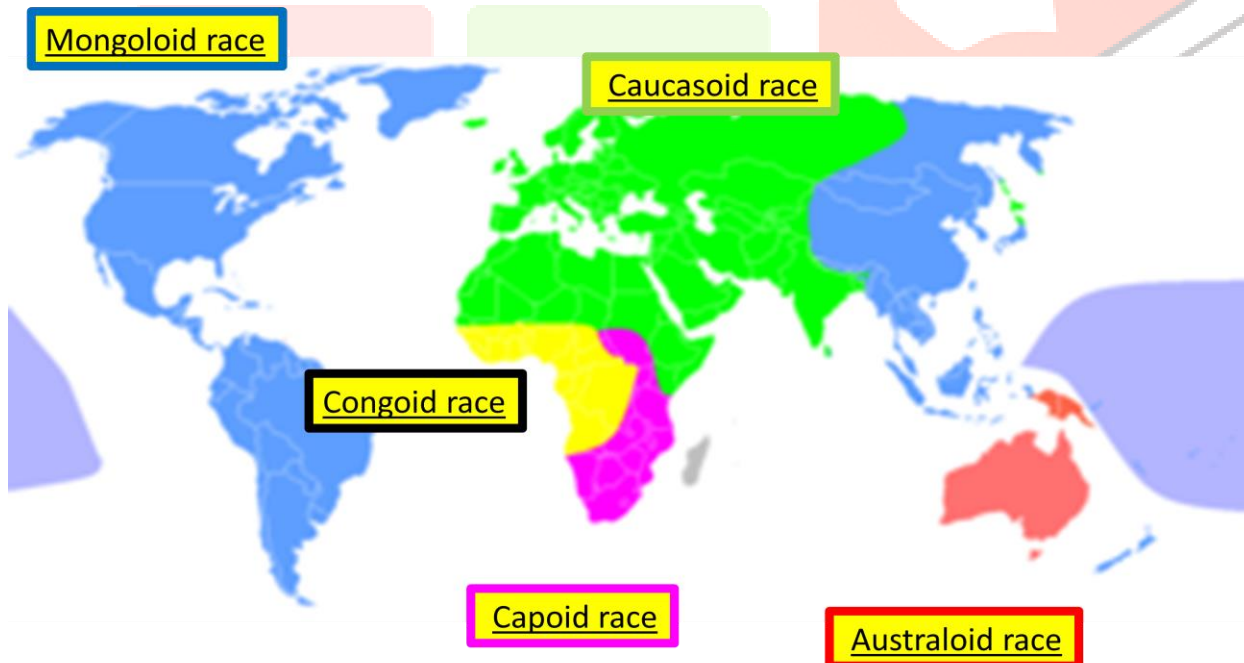

Fig 25 Distribution of the races after the Pleistocene according to Carleton Coon. (Macro level)

2.5 How Trinity appears on Earth

Fig 26 Phenomenon of Teleportation and UPS in the mind of Almighty B.B.B (Allahtala) in Universe "I"

Dirac equation is illusion as mathematics does not have thought of mind and thought of Creator . Self positioning system (SPS) in brain triggers to know our surrounding and our location . It is being used by animals and birds during migration or navigation on earth . Global positioning system (GPS - computer) helps us to know our location and different place and their routes on Earth . GPS does not make us to be lost in big cities if we have loaded origin and destination in our computer . There is one more system called universe positioning system (UPS). Our journey did not start with fertilization of ova with sperm rather it had started since origin of the universe(Tachyon sea) and our brain could predict our past and future transformations before we transformed into human beings . UPS helps to locate home of Almighty B.B.B (Tachyons Sea) as prayer reaches to Almighty B.B.B . All religions do IDOL worship of Two God particles in different ways . **Unless brain sees idol of two God particles during worship (Fig 9.1) or during namaz devotee sees home of Almighty B.B.B (Allahatala or Tachyon sea) and structure of Tachyons (One Yang and many Yins) (Fig 26) by brain , worship is incomplete** Teleportation is the phenomenon made by Almighty B.B.B (Creator of universe and Aliens) . As He descends from invisible universe (Tachyon sea) to Earth . First , message comes (first order of universe) to Earth B.B.Bs via first transcription (quantum entanglement) and B.B.Bs of Earth transform in to any shape (Trinity – Human beings or Almighty B.B.B in flesh form) and Trinity does such deeds that they occupy place in church and temple as idol worship . For example Lord Jesus , Lord Krishna or Lord Ram etc **The theory predicts that when Almighty B.B.B teleports Himself , He (Creator of universe and Aliens) could tell exactly where Aliens reside in universe "I" .**

2.6 Adam's Bridge mystery solved NASA's Image

The famous NASA satellite footage from 2002. The US scientific body, however, chose to distance itself from any religious interpretation. NASA said, "The image may well be ours, but their interpretation is certainly not ours. Remote sensing images or photographs from orbit cannot provide direct information about the origin or age of a chain of islands, and certainly, cannot determine whether humans were involved in producing any of the patterns seen."

Adam's Bridge

A map from later centuries also refers to Ram Setu as Adam's bridge. Also, the Geological Survey of India's report named the Project Rameshwaram and termed this bridge to be used as a means to travel between India and Sri Lanka some about 7,000-10,000 years ago.

Adam's Bridge Formation (Floating of Stones) By Virtue of Prayer Done By Lord Ram Rather than Any Miracle Claimed By Hindu Believers . it Was Lawlessness That Triggered By Unconditioned Thought Expression By First order Of Universe (AGE By Quantum Entanglement)

It is being believed that by writing word Ram on stones could make stones floating , it is Myth . Floating of stones while making Adam's Bridge was a lawlessness triggered by unconditioned thought expressions by first order of universe leading to change in programming (Code PcPs floating) of gravity interactions which was previously programmed for sinking (Code PcPs sinking) by M2 . It is the mind of M2 that orders sinking effect when energized gravitons from M1 come and interacts with interacting surfaces of atoms of stones of M2 . It is science of prayer (Atomic genetics engineering) that underpins floating of stones done by Lord Ram . The phenomenon ended with end of the period of stay of Lord Ram in Shri lanka i.e. the reversal of programming . With the result floating stones got sunk . There are many thoughts that design the sinking or floating effects . There is feedback to higher centers before next thought is triggered . During transmutation of phenomenon of sinking to floating or vice versa , sinking thoughts get suppressed , and floating thoughts get triggered and vice versa . It is Almighty B.B.B , The Creator B.B.B Who was designing the phenomenon by request of Lord Ram by quantum entanglement .

Strange floating stones of Rameshwaram computation

Some floating stones are found on the coastal regions of Rameshwaram. These stones are similar to any other stone and possess the same features, physical and chemical composition like the stone you may find in your locality. Seeing these stones from a far distance, you may feel that this stone is made of corals but on physical examination, it is found that this is not a coral stone...and neither is it a pumice stone! (Fig 27)

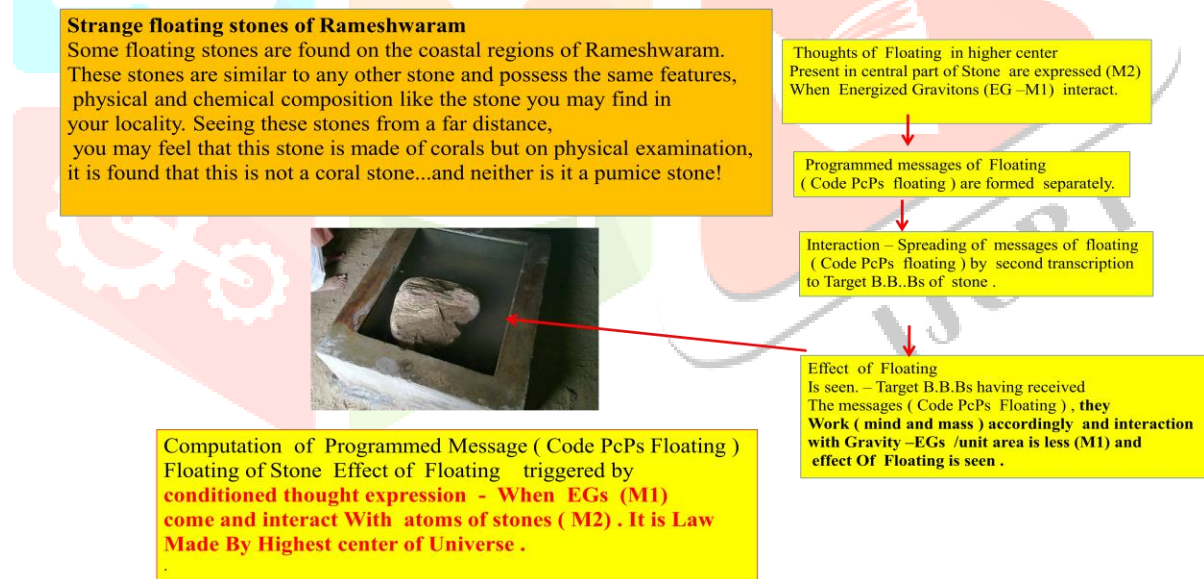

Fig 27 Strange floating stones of Rameshwaram

Normal sinking stone computation .

Why now Ram Setu is under water because Lawlessness and unconditioned thought expressions that led to floating on water worked only for few days and when work was over , the unconditioned triggering ended and normal triggering of programmed thought expressions (Code PcPs sink) of sinking get triggered .

Normal Sinking Effect of stones is found every where

Thoughts of Sinking in higher center (M2) Present in central part of Stone are expressed While interacting with EGs (M1)

Programmed messages of Sinking (Code PcPs Sinking) are formed separately.

Interaction – Spreading of messages of Sinking (Code PcPs Sinking) by second transcription to Target B.B..Bs of stone .

Effect of Sinking Is seen. – Target B.B.Bs having received The messages (Code PcPs Sinking) , they **Work (mind and mass) accordingly and interaction With EGs /unit area is more (M1) and the effect Of Sinking is seen .**

Computation of Programmed Message (Code PcPs Sinking) Sinking of Stone Effect of Sinking triggered by **conditioned thought expression - When EGs (M1) come and interact With atoms of stones (M2) . It is Law Made By Highest center of Universe .**

Fig 28 - Normal sinking effect of normal stones found every where

How normal sinking programming transformed into floating programming and further it reversed into normal sinking programming .

Lord Ram did Prayer (Quantum entanglement) . The Prayer was accepted by Almighty B.B.B . At first sinking programming (Code PcPs Sink) was changed to floating programming (Code PcPs Floating) and later it was again shifted to sinking programming (Code PcPs sink) after few days . It is lawlessness and it is unconditioned Working of nature and it is done by First order of universe (Quantum Entanglement) It is called Atomic genetic Engineering) . (Fig 29)

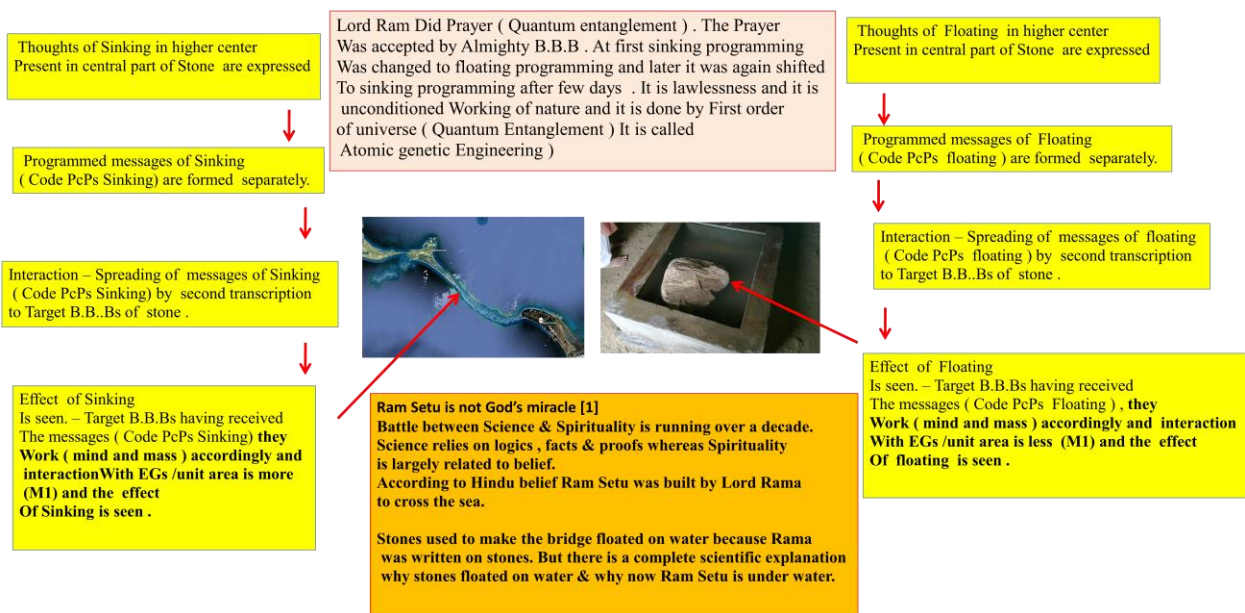

Fig 29 Ram Setu is not God's miracle . It is by virtue of Prayer Done by Lord Ram .

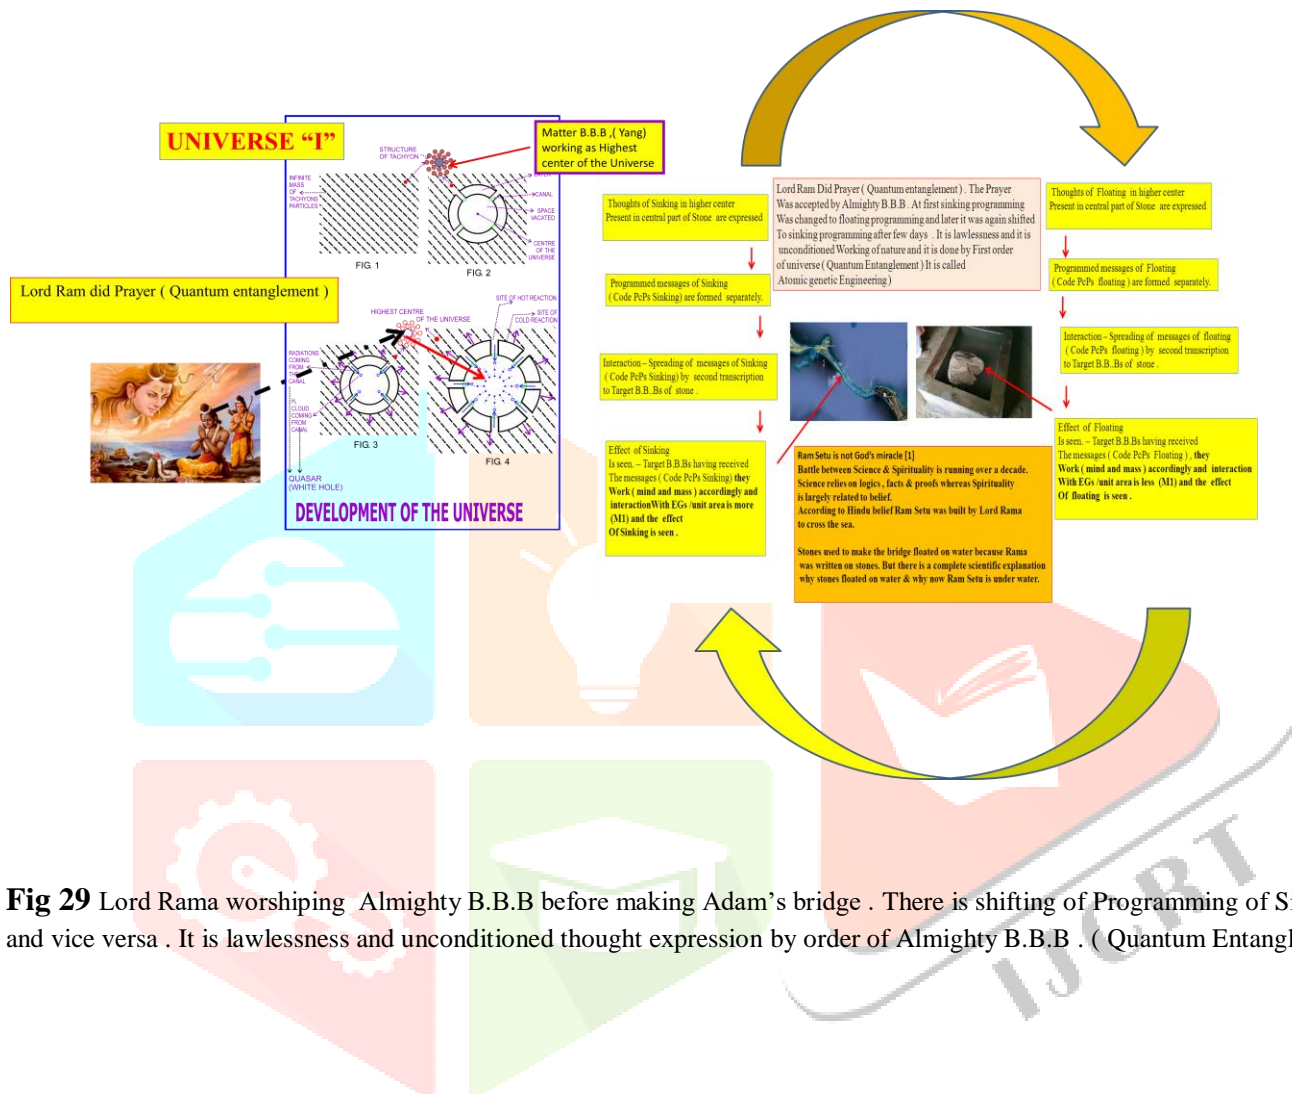

Fig 29 Lord Rama worshipping Almighty B.B.B before making Adam's bridge . There is shifting of Programming of Sinking to Floating and vice versa . It is lawlessness and unconditioned thought expression by order of Almighty B.B.B . (Quantum Entanglement)

Conclusion

Indian racialism or castes are produced by soil directly by unconditioned thought expressions triggered and regulated by TM (time mindness). There are many thoughts to design the phenomenon. But to understand the concept only two thoughts (Homo sapiens and particular race or caste) are taken into consideration. There is feedback to higher center before next thought is triggered. For example birth of Devi SITA from soil, appearance of Lord Ganesh from mud of Devi Parvati, etc. All Indian races or different castes appeared not at one time but in different times. All races and caste are different sets of informations (Code PcPs). This programming was done in precreation era by Highest center of Universe. Hence migration / invasion of Aryans theory or genetic similarities in different races or castes and making some conclusions are illusions. It means except clones, no two homo sapiens are alike though they have similar genetic backgrounds. Origin of Trinity is different from origin of homo sapiens. Trinity takes birth by teleportation. Means, message comes to B.B.Bs of Earth and it transforms into Human beings. Example birth of Jesus from virgin Mary (2000 years back) or Appearance of Narsingh avatar from pillar (Prehistoric era or mythological era).

Before civilizations (Harappa) appeared on Earth about 8000 years back , Devi , Devtas and demons used to live in India and they lived thousands of years and now they are the part of Mythology for example Ravan of Shri Lanka . About 7000 years back Lord Ram came and He made Adam's bridge which is a man made bridge to Kill Ravan of Shri Lanka . Hence Ravan is a link between **mythological era** and **civilization Indian era** . About 5000 years back ie , Lord Krishna appeared and cited Gita Updesh which is about Mind reality (Fig 1) in nature . Then came **era of modern civilization (Kalyug)** . Hence Lord Ram was Aryan means noble man . So migration /invasion theory of origin of Indian Aryan is obsolete theory . His (Lord Ram) descendent are still living in India .
