Keyword: Right to Education, Online education, Online platform, Corona -virus pandemic etc.

(1) INTRODUCTION

"Right Education should help the student, not only to develop his capacities but to understand his own highest interest."   -*J. Krishnamurti*

The Right to Education Act plainly makes the determination of the Government of India for giving the training of each child. Right to Education Act (RTE) was passed by the Indian Parliament on fourth August 2009.It was passed accommodating free what's more, obligatory instruction for children between 6-14 years under article 21 (A) of Constitution of India. India becomes one of 135 nations to make instruction a crucial right of each and every kids after the law come into force. RTE Act, 2009 makes training a basic right of each youngster and it is the primary Focal regulation on school training In 2010, the nation accomplished a notable achievement at the point when Article 21-An and the Right to Instruction (RTE) Act, 2009

became employable. It is a 'memorable' regulation of our Parliament. Before this alteration, free and obligatory instruction was remembered for Article 45 of the rundown of "Mandate standards of the State Strategy". Article 45 says that he State will accommodate free what's more, obligatory schooling of the relative multitude of kids and until they complete the age of fourteen years. The RTE Act gives a reasonable legitimate structure for the kids with the end goal of free and mandatory education. 'Free Schooling' it implies that no child is at risk to pay any charges, costs, who has been confessed to a school upheld by the Public authority. The RTE Act is gotten together with the conviction that the upsides of fairness, civil rights and a majority rule government will be restored.

Indian school system is as yet not experienced at both the metropolitan and rustic region. Midday meal programs are organized to attract the students to get education under various education schemes. Under these conditions government impose country wise lockdown on Spring 25th, 2020 to battle Coronavirus, seriously affects the school system. India has the world's second biggest educational

system, after China. As indicated by UNESCO, 63 million educators were impacted in 165 nations. A sum of 1.3 billion students all over the planet couldn't join in schools or colleges, and around 320 million students are impacted in India alone. It has changed the customary school system to the instructive advances model in which educating and evaluations are led on the web. Both the positive and negative effects of Coronavirus on Indian School system are noticed.

Indian government has declared the lockdown and conclusion of instructive organizations as an intelligent answer for implement social removing inside networks. The cross country lockdown massively affects the schooling system of the country. Since the Indian school system is overwhelmed by homeroom study, the current situation has made the working of the instructive foundations go truly challenging. All instructive exercises like assessments, school affirmations, entrance trial of different colleges and cutthroat assessments, others, are being held during this that is all. As the days are passing by with no quick answer for stop this episode, the conclusion of schools and colleges is massively influencing the advancing the nation over. The construction of the Indian schooling system for example learning procedure, showing methods and evaluation philosophies, is very impacted, bringing about a shift to online schooling with most spotlight on virtual training to achieve the set points and goals.

(2) METHODOLOGY
