ABSTRACT:

The Solanaceae family gives us medicines like Belladonna, Hyoscyamus, Stramonium, Tabacum, Dulcamara and Capsicum etc. This article shows how to learn the Solanaceae family with repertory (mantels to generals).

Keyword: Solanaceae Family, Repertory, Complete Repertory, Belladonna, Stramonium, Hyoscyamus, Tabacum, Dulcamara, Capsicum.

INTRODUCTION:

The Solanaceae is a large varied family of trees, shrubs and herbs including 90 genera and more than 2000 species. Solanaceae are known for possessing a diverse range of alkaloids.^[1]

The Solanaceae Remedies, are one of the most interesting and diverse botanical groupings used in homeopathy.

Important remedies we use in daily practice.

1. BELLADONNA. (Deadly Nightshade)
2. STRAMONIUM (Jimson weed)
3. HYOSCYAMUS. (Henbane)
4. TABACUM. (Tobacco)
5. DULCAMARA.(Bitter-sweet)
6. CAPSICUM. (Cayenne Pepper)

The drugs composing this group of remedies present great symptomatic similarity. Belladonna, Stramonium, Hyoscyamus are continually in use, even in an average practice.^[2]

Belladonna, or the deadly nightshade, was known to the medical world as early as 1500 A. D. The Venetians named the plant "herba bella donna," from the circumstance that the ladies used it distilled in water as a cosmetic to brighten the eyes and flush the cheeks.^[2]

Stramonium stands between Hyoscyamus and Belladonna. It excites the sensorium and perverts its functions. The special senses are affected. Double vision; Objects appear double or oblique.^[2]

Botanically and, in one measure, therapeutically, Hyoscyamus is similar to belladonna. This interesting drug, although innocuous to some animals, is toxic to birds, and has received the name henbane..^[2]

TABACUM contains several active ingredients, the most important of which is Nicotine.^[2]

Dulcamara, or "bitter-sweet", contains a small amount of solanine, in fact, in much smaller amounts than any other member of the group. The tender leaves and twigs have been used to prepare the tincture.^[2]

Capsicum possesses few, if any, of the narcotic properties of the Solanaceae, but it has higher levels of the group's irritating properties; But very little medicine is needed to cause this irritation.^[2]

REPERTORY PART^[3]

Repertory is a also best tool to learn Materia Medica. In this section, all given rubrics covered Solanaceae group. The numbers in parentheses indicate that the homeopathic medicine is included in the Solanaceae group.

MENTALS:

1. DREAMS nightmare (164)
2. GESTURES, makes (143)
3. MOANING, (153)
4. SENSES dullness of, blunted (112)
5. SENSITIVE, pain, to (134)
6. STARTING, startled sleep during (163)
