### **Abstract:-**

Due to information and communication technology every thing is becoming digital in the present era. Under which E-Journals E-Reference source electronic bulition electronic report etc. Various types of documents. Which are very useful for the users. But this information sources is considered very useful of the education and academic level and it is very useful information sources for the university library through this digital resources information can be made useful and easy.

University lies a large number of user than who are made easily accessible to information through E-Resources digital technology has made things comfortable and easy. Information is increasing rapidly. Old data is also being made useful through digital medium controlling Information through E-Resources Information is being more important through medium.

### **Introduction:-**

Keyword- E-Books, E- Journals E resources, E-News etc.

**Introduction:-** Printed media is being made easy and simple in Information. Nowadays through digital medium is easily accessible to the users. Electronic resources are being made easy through computered medium it can be any multimedia product Library is being linked with new technology through paper. It is being told that how much useful information is being given to the user and how much loss and how much benefit is being given to them. Graphical eletronic Information. But in market, they are published as a title. Nowadays information is ROM's magnetic tapes internet etc. Standard technologies are developed. Nowadays library has been taking new media and fullfill the requirment of users. The E-Resources and Optical Media have a best impact of collection of Unversity Development E-Resources are more useful and accessible capabilities of searching of Information access saving in Storage and maintenance etc.

### **Definition:-**

According to Library Glossary

"To Describe all of the information products that a library provides through a Computer's Network"

"According to wikipedia Electronic resources mean " Information which can be stored in the form of electronic signals usually on a computer's information is valuable on the Internet

**Review of Literature:-**

Anuradha (1999) In a paper published demand of user information is easy to access and retrieved. This paper has described the concept of Digital Libraries and nature of library and on environment. This paper has also described electronic information resources and explained the importance of CD ROM in digital libraries. Information is transferred and limitation.

Jamali and huntington(2005). From this study, this conclusion may be taken E-resource is getting more used than print media. Users are also linking in e resources and they use in PDF and CD-Rom Form. Chisenga (2004)- In this era also all libraries are used in web based services in our users. But some libraries in lack of trained staff, no financial support lack of internet and communication technology.

**Need of e-resources:-**

The need of e-resources is very useful for the library and the users using them through the resources were and the library can be kept pogethen.

The use of E-Resources is as fallows.

1. E-Resources is easy to access
2. E-Resources can be accessed to Form any where.
3. E-Resources can be stored in very huge quantities.
4. Can be accessed without wasting time and quick access.
5. User can access his information through E-Resources sitting any where.
6. User can get information through diffrent medium.
7. Library usability also in creases through E-Resources
