# ABSTRACT

Kaumarbhritya or Balrogvigyan is Consider as an eight part of Ayurveda. Achrya kashyapa have Given it important place in its texts book Kashayapa samhita. According to him it is basic line of Ayurveda. In Ayurveda Kaumarbhritya plays an important role .according to him a child is classified into 3 types(Ishwar putara,Madhyam putar,Darid putara according to their financial condition.Kashyap have prescribed age and weight related Drug dosage for children In this segment they have discuss about Child care, Importence of Brest milk, Child diet, Dhatri and Baby Teething. sage like kashyapa and sharagdhara,Vagbhata have excellently prescribed drug dosage with comparison to the fruits like Vidang Ayurveda described about some majors drugs which is used as a tonics and medications for child healthy baby and they also give importance to the Brest Milk which is the first food of the baby and which helps in growth and repairment of baby body. Present article based on the Herbomineral preparation. Our ancient achrayas have various views according to minerals for treatments of the child disease. In this we also know about the formulation which is prepared by the various companies for the treatments of child Disease. In our ancient achrayas suggest the Rasoushadhis like Mercury and other metals and minerals. They are used after various samsakar.

KEYWORDS: Rasaushadi, herbomineral, formulation, Khumbharvirtya, samskar.

# **INTRODUCTION**

Ayurveda is a remarkably individualized system of medicine."Pediatrics is concerned with the health of infants, children and adolescents, their growth and development, and their opportunity to achieve full potential as adults."sid by(Richard E. Behrman in Nelson's Textbook of Pediatrics).Six Major nutrients are oxygen,carbon,hydrogen,sulfar,phosphorus,nitrogen very essential for body growth and repairement.other minerls are Zinc ,Iron,calcium.The various medicines are Souvarna sukrutam churnam kushtam madhu ghrtam vacha , Matsyakshaka shankapushpi madhu sarpi sakanchanam, Arkapushpi ghrtam kshoudram churnitam kanakam vacha, Sa hemachurnam kaidaryam shwetadurva ghrtam madhu, Bala - pushti - medha.other rs aushides are Rasoushadhis, Utphullikahara rasa, Karpoora rasa, Kumara kalyana rasa, Dantodbhedagadantaka rasa, Bala jwarankusha rasa, Balayakrudari rasa, Balarogantaka rasa, Balarka rasa, Mugdha rasa Rasa parpati. Also further get developed into eight main branches. The Kaumarbhrutya is the branch of Ayurveda dealing with care of infants and children, diseases and treatment of Dhatri (wet nurse or care taker of child), milk, its qualities and treatment of milk related disorders and diseases due to bal grahas.<sup>[1]</sup> Many of the other classical texts like charakasamhita, Sushruta samhita, Ashtanga Hridaya have also mentioned Herbo-mineral drugs in their therapies like suvarna prashana samskara<sup>[2]</sup> Acharya Kashyap or Vrudhhajivaka are known as pioneer in Kaumarbhritya with their manuscript named Kashyap Samhita or Vrudhhajivaka Tantra. Kashyap Samhita focuses their importance on child care, but also there are some references which make it complete from all point of view. In ancient time Rasaausadhis are the back bone of the Ayurvedic

therapeutics. These are mainly focused on metals,herbominerals preparation .they are less in dosage and easy to take and These Rasayana have without any odour, and highly potent and bioequivalent and their properties make them more popular and superior over the other medicines and due to this these are main focus of patients as well as pharmaceutical manufacturers. These are not only used in general medicine but also they used in pediatrics practice excellently.Mandoor bhasma(Fe<sub>2</sub>O<sub>3</sub>) is mentioned as Beneficial in child in classics.<sup>[3]</sup>Pure gold (Purified suvarna) is mentioned as best rejuvanative medicine for maintenance of foetus.<sup>[4]</sup>Mercurial preparation like Mugdharasa is mentioned as "shishurogahara"i.e.drug for infant dieseses.Godanti bhasma (CaSO<sub>4</sub> 2H<sub>2</sub>O) in balshosha(Child malnutrition) and also used in Balpanchabhadra rasa.<sup>[5]</sup> They have tried to prepare medicine as per minimum dosage frequency and end user need. The oral medicineis likes swarnprashana developed on the basis of palatability multipurticulate solid that is combination of honey, butter and gold in semisolid medicinal format so these combination of various metal and mineral drugs show variability,Biopharmaceutics and potential alternatives as per the acceptability of intended pediatric population. Kumar Kalyan Ras is Classical Ayurvedic medicine in solid dosage form(Tablet form). It is used in the treatment of fever, cough, jaundice, diarrhea in children. This medicine should only be taken under strict medical supervision.<sup>[5-16]</sup>

Suvar na gairika churna	Suvarna gairika	Do a fine powder	Use as lehana with honey.	Useful in hikka.
Amrad i yoga	Gairika	Do a fine powder	Lehana with honey	Useful in mukhapaka.

# **Conclusion and Discussion**

Rasa Aushadi plays an important role in case of children diseases. If mother is healthy than its child is also fit from physical and Mental level this detail description of mother and child is given and also discusses about diet of woman while pregnancy and how she keep it up her healthy health Swarna bindu prashana contains three ingredients. Suddha Medhya Aushadhi siddha ghruta, Shuddha swarna bhasma, Shuddha madhu. Madhu is collection of pollen grains by bees. In day today life it is observed that pollen grains acquire a great percentage in producing allergic reactions leading to many diseases. The main reason for using madhu in Swarna bindu prashana is that when madhu is administered in low doses in childhood.Gradually Honey develops resistance for allergens and it remains unaffected by allergens. Swarna Bindu Prashana while Modern medicine explains about vaccines. Vaccines produce immunity against specific diseases where as swarna bindu prashana produces non specific immunity along with many other effects. Immune System towards diseases become very powerful (Rog pratikarak shakti), Physical strength becomes powerful ,Grasping power, sharpness, analysis power, recall memory becomes very strong.Improves digestion power. Tones up skin colour (fair skin). Growth of mind and body becomes faster than usual. Anti toxic power increases, hence fighting against poison in any form becomes strong in the child (eg. Pesticides in fruits, vegetables etc). This gives strong protection from infection. It helps in preventing diseases that come during teeth growing phase. It saves from diseases that occur due to seasonal change. It also saves us from different kinds of Allergies. Overall, it makes a child healthier than most other children.
