Our Vision
“The Sarahu New 08 Macrocosm Wonders of the World”, which is part of the Sarahu World Records. This is an integral part of Sarahu World Records. How Sarahu World Records has a great deal like Human Accomplishments, Documentary, TV shows, reality shows etc. in the same way Sarahu Officially wonders the best quality TV shows in the media and entertainment organization, the reality shows, making the research a new wonder of the world, a special mission.

If we look at the ‘Macrocosm Wonder’ we can have anyone in the world and them consider and agree. Things naturally become a history of what one thing are worth to Macrocosm Wonders. Some groups have to be prepared by a mature organization and have to make special impressions from ordinary people to make their own way of wondering through their own foundation.

Here is the part of SWR’s The Sarahu New 08 Macrocosm Wonders of the World Organization is working on a job called Social Work. There is no other purpose. Wondering to split the category through the category of Amazing Things, Cities, Naturals, Rivers, Superman, Super Humans, Working, Prices, Awards, Degrees, Nations, and Buildings in the World.

This Mission has received many elite people and their impressions, such as Employee Comments. We did not establish this mission simply by virtue or selfishness. Because there are wonders that can come in the wonders, they are presented on our website and clearly distributed. That is why the wonders are more visible in the world, and we are sorted out by category and shown in a simple form.

There are many love stories, natural, statues, buildings, Nations, such as in the world. But not all of them can be considered wonder. Because audience and followers will be given this opportunity by voting. As each country, different types of voters and audience think in the states, we sometimes discuss ourselves with 200 Employees and consider Macrocosm Wonder.

We do not consider Mythology here. We are only considering what is visible to the eye. Every year, two years and 5 years we are giving new Macrocosm Wonders to light. Then it goes on and on. In 2019, 08 Macrocosm Wonders of new history were written in 2019, with 08 Macrocosm Wonders of Sarahu in the 08 Macrocosm Wonders we had seen by our team since long research. The 08 Macrocosm Wonders of Sarahu are also listed as the new 08 Macrocosm Wonders of the World as we look at our eyes.

Already post the Sarahu’s New 08 Macrocosm Wonders on face book and other social websites, and views in the same way, the likes are more. However, there is not much publicity available here. Because the strangers, and those who do not know about Sarahu, are skeptical of suspicion. The newspaper also has a fear of TV media.

But, along with the 19 Foundation, has been brought to the crossover weekly news and magazines including 200 Employees, and Team. They are all for Sarahu’s achievements! And nothing else.

But, the work took five consecutive years to cover the World Records Company and the 19 Foundations and Audience. This work took place from 03 years onwards. Sarahu 08 Macrocosm Wonders Released on But, Finally 2019 May Month.

7. “Sarahu’s New Nation and their Constitute and law system”

8. “Sarahu’s Art and Entertainments”

***

- There is so much difference. Because society has considered the wonders of The New Seven through online voting. But before they are called the wonders of the world, we are not simply called the wonders of the world to enjoy the beauty.
- It is not an equal thing to make a mere appearance a present day wonder. If it is to be called a wonder of the world, its subject matter and material vastness must be serious. And should be equally important.
- The New Wonders of the World of Sarahu have taken on a similar significance and content. The wonders of Sarahu alone are not the same as the look. The material content within it is equally important.
- There are so many beautiful things to see in the world. There are material things that are natural and man-made. They are not called the world’s greatest. Because its material content must be important and profound.
FAQ: WHAT IS THE NEW 08 MACROCOSM WORLD WONDER? AND WHY CAN’T SARAHU HERE IS CONSIDERED THE NEW 08 MACROCOSM WORLD WONDERS?

- Yes. All the beautiful looks and beauty of the world is just a social one, and it is a fortune that people call it. The Big Seven Wonders of the World has already done so. But it was wrong. Because when it comes to evaluating its content it is not a great answer. That is wrong.
- To be truly a marvel is to have depth of material under evaluation. We call such a thing the worlds wonderful.
- Evaluating by simply voting in the social sphere is not the right answer. Because the thing is the same. I mean, yoga also decides this. If yoga is lacking in posterity, the material content is as deep as it is beautiful. But we haven't seen the seven new wonders of Sarahu like them.

FAQ: WHAT IS THE ONLINE VOTING? AND WHAT IS AUDIENCE RECOMENDATION TO SARAHU NEW 08 MACROCOSM WONDERS OF THE WORLD?

- Yes. All the beautiful looks and beauty of the world is just a social one, and it is a fortune that people call it. The Big Seven Wonders of the World has already done so. But it was wrong. Because when it comes to evaluating its content it is not a great answer. That is wrong.
- Even so, miracles can be done. Through the recommendation of individuals or organizations in the social sphere. But this is the whole wrong thing. Do you know why? In the world, there is no recognition for physical objects if the world is doing amazing by recommending individuals or institutions in the social sphere. Do you know why? That thing should be great, and the content should be deep. It should not be mesmerizing in appearance alone.
- If one is to perform the wonders of the world, one must measure the attitude and time of the individual. After looking at how deep and important the subject is, we should move on with this subject.

FAQ: WHAT IS EQUALISM TO ‘SARAHU 08 MACROCOSM WONDERS OF THE WORLD’ AND ‘THE NEW 07 WONDERS OF THE WORLD’?

- Yes. It is not possible to do equality. This is because Sarahu has made his achievement alone for eight consecutive years. He did not receive such favor. There was no violence.
- In front of the wonders of Sarahu lies the hand of one of the people. But the wonders of the rest of the Seven New World are in the hands of thousands of people.

FAQ: WHAT ARE THE NEW SARAHU 08 MACROCOSM WONDERS OF THE WORLD? HOW 08 NEW DID MACROCOSM WONDER HERE?

- World Record Titles must be International Records. That's why we went to Wonder Cave to make a new history.
- Foundations of World Records are set up with 19 Foundations, World Records Foundation, except Wonder Process. Here people were given a face-to-face look at all these wonders.
- For any evil or selfishness, all these achievements were not intended to be a wonder and astonishing.
- It intends to bring light to the world's middle point.
- Here, social media voters, their comments, and comments have been received. With audience approval, 18 Foundations, 100 and 300 Employees and some schools, colleges, foundations, and temple devotees received the students' poll. Court Bond, Notary Also. At first these 19 Foundations had 300 employees, and 100 employees were working with the problem.
- But 300 employees wanted to make Sarah's achievements a world wonder. The approval of the Society, which directly led to the way of wonders by visiting the impressions, schools, colleges and foundations on paper.
- There are 300 employees here. People, Foundations are important here.
• We have established these 19 Foundations, 300, Employees to understand the foundations of the founder. Big devotees, friends, voting, and responding to their comments and campaigns. Sarahu World Records is the first place to wonder about the company.

• Thousands of world records will be a wonder. Sarahu has achieved 08 new Macrocosm wonders in this world with his writing superiority. On May 1, 2019, with a vote of 19 Foundations, with the votes of Sarah World Records, 19 foundations were announced in a variety of fields along with 19 foundations, with the announcement of 07 wonders at that time.

• Sarahu’s 08 new wonder, along with the 07 Wonder of the World, is now a total of 19 wonders.

FAQ: WHAT IS THE 1st MACROCOSM WONDER OF THE WORLD?

• Wonder is not natural. In Wonders there are two types like natural and artificial wonder. And in SWR the artificial which they made it took 01st place.

01st Macrocosm Wonder of the World

Part_01_Kaliyuga

(Sarahu’s Historical Love Story and Divine Miracles at the age of 23 to 30)

Abstract:

Here are some of the most important and pertinent documents; and the combination of all these records made it the new 01st Macrocosm Wonder popular in the World. Sarahu’s Historical Love Story and Divine Miracles at the age of 23 to 30 - has been proclaimed and declaration is that to the 2018, 2019 as the 01st Macrocosm most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, social systems, Sarahu’s 19 Foundations and their 200 Employees. The 19 organization was founded for the same reason.

“The following is an account of Lord ‘Sarahu Nagarazan’ 01st part of the love achievements”

Lord Sarahu Nagarazan 01/06/1988 was born as a human incarnation to the earth. And he has come for the welfare of world. What he has suffered in this human incarnation is as follows. Beginning with the vicissitude of his Love. He did continuously 8 years DhyÃna or hypnotism for his first lover Uma. In these 8 years, last 4 year’s Suma came into his life and infringed in DhyÃna or hypnotism. Then he continued DhyÃna or hypnotism for Uma. After 8 years instead of getting the power of hypnotism, he received the grace of illumination on god and world. Uma is elder than him a year and Suma is also elder than him two years. Lord Sarahu Nagarazan is Incarnation of Lord Shiva. Uma is also Incarnation of Goddess Parvathi and Suma is Incarnation of Goddess Ganga.

Finally, it was declared a winner of the New 03rd Macrocosm Wonder of the World (2018-19) initiative.

★★★
Abstract:
Here are some of the most important and pertinent documents; and the combination of all these records made it the new 04th Macrocosm Wonder popular in the World. *Sarahu’s Historical and Romantic Love Story and Divine Miracles at the age of 28 to 31*- has been proclaimed and declaration is that to the 2018, 2019 as the 04th Macrocosm most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, social systems, Sarahu’s 19 Foundations and their 200 Employees. The 19 organization was founded for the same reason.

Lord Sarahu Nagarazan 01/06/1988 was born as a human incarnation to the earth. And he has come for the welfare of world. What he has suffered in this human incarnation is as follows. Beginning with the vicissitude of his Love. He did continuously 8 years Dhyāna or hypnotism for his first lover Uma. In these 8 years, last 4 year’s Suma came into his life and infringed in Dhyāna or hypnotism. Then he continued Dhyāna or hypnotism for Uma. After 8 years instead of getting the power of hypnotism, he received the grace of illumination on god and world. Uma is elder than him a year and Suma is also elder than him two years. Lord Sarahu Nagarazan is Incarnation of Lord Shiva. Uma is also Incarnation of Goddess Parvathi and Suma is Incarnation of Goddess Ganga.

After this,

Before meeting his love, Lord Sarahunath has been introduced to ‘Manohari’ through his friend from Davanagere. ‘Manohari’ was from very poor background, her mother make her consume poison and she tried to kill her own daughter, that was the time where ‘Manohari’ met Lord Sarahunath but they didn’t fell in love with each other in any situation, after this only he met Shilpa from Gokarna a city called Toregazani, Shilpa was devoted Lord Sarahunath in her past 07 birth generations, unfortunately she met him now, though the love was grown and built in between them it was gone invisible in the administration of Kali’s Illusion (Demon), but she tried to become Goddess Parvathi again and again, but the soul of Parvathi should come out from Kali’s Womb till then Lord Sarahunath’ war against Kalis was continued, ‘Manohari’ was Two years younger than Lord Sarahunath, Shilpa was Three years younger than Lord Sarahunath. Manohari was Goddess Shree Chamundeshwari Devi’s avatar and Shilpa place was at Goddess Parvathi devi’s avatar.

Finally, it was declared a winner of the *New 04th Macrocosm Wonder of the World* (2018-19) initiative.
05th Macrocosm Wonder of the World

Part_05_Kaliyuga

(Sarahu’s all Science Different Category Accomplishments at age of 20 to 31)

Org Name: “The Sarahu New 07 Human Wonders of the World”

Our Vision

“The Sarahu New 07 Human Wonders of the World”, which is part of the Sarahu World Records. This is an integral part of Sarahu World Records. How Sarahu World Records has a great deal like Human Accomplishments, Documentary, TV shows, reality shows etc. in the same way Sarahu Officially wonders the best quality TV shows in the media and entertainment organization, the reality shows, making the research a new wonder of the world, a special mission.

If we look at the wonders we can have anyone in the world and the Consider and Agree. Things naturally become a history of what one thing are worth to wonder. Some groups have to be prepared by a mature organization and have to make special impressions from ordinary people to make their own way of wondering through their own foundation.

Here is the part of SWR’s The Sarahu New 07 Human Wonders of the World Organization is working on a job called Social Work. There is no other purpose. Wondering to split the category through the category of Amazing Things, Cities, Naturals, Reverse, Superman, Super Humans, Working, Prices, Awards, Degrees, and Buildings in the World.

This Mission has received many elite people and their impressions, such as Employee Comments. We did not establish this
mission simply by virtue or selfishness. Because there are wonders that can come in the wonders, they are presented on our website and clearly distributed. That is why the wonders are more visible in the world, and we are sorted out by category and shown in a simple form.

There are many love stories, natural, statues, buildings, such as in the world. But not all of them can be considered wonder. Because audience and followers will be given this opportunity by voting. As each country, different types of voters and audience think in the states, we sometimes discuss ourselves with 200 Employees and consider Wonder.

We do not consider Mythology here. We are only considering what is visible to the eye. Every year, two years and 5 years we are giving new wonders to light. Then it goes on and on. In 2019, 15 new wonders of new history were written in 2019, with 7 new wonders of Sarahu in the 8 wonders we had seen by our team since long research. The 7 new wonders of Sarahu are also listed as the new 7Wonders of the World as we look at our eyes.

Already post the Sarahu’s New 07 Human Wonders on face book and other social websites, and views in the same way, the likes are more. However, there is not much publicity available here. Because the strangers, and those who do not know about Sarahu, are skeptical of suspicion. The news paper also has a fear of TV media.

But, along with the 18th Foundation, has been brought to the crossover weekly news and magazines including 200 Employees, and Team. They are all for Sarahu’s achievements! And nothing else.

But, the work took five consecutive years to cover the World Records Company and the 18 Foundations and Audience. This work took place from 3 years onwards. Universe Wonders Released on But, Finally 2019 May Month.

- World most variable write when he was 28.
- World most qualitable writer when he was 28.

Finally, It was declared a winner of the Sarahu’s 01st Love Wonder of the World (2018-19) initiative.

02nd Wonder of the World

“Sarahu’s New 02nd Wonder of the World”
Abstract:

Here are some of the most important and pertinent documents; and the combination of all these records made it the new 02nd Wonder popular in the World. Sarahu’s Writings of achievement have been proclaimed and declaration is that to the 2018, 2019 as the 10th most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, Social systems, Sarahu’s 18 Foundations and their 200 Employees. The 18 organization was founded for the same reason.

Sarahu’s all strength is expressed in the caliber of all his writings and he received 321 New World records, 321 Awards and 321 Honorable Certificates, 321 Breaking records, 321 Breaking awards, and 321 Breaking Honorable Certificates, when he was 29. These are included to 02nd Wonder of the world.

He has been writing story, poetry, fiction, drama as well as cinema and film since his third grade. And He can write sitting in front of stereo sound with woofer sound, and even he can write sitting in isolation, it’s his routine. He can write without using headphone. However you tell he can write. Whatever he writes it’s purely in Kannada language only. Writing novels in Kannada language is quite difficult where as in English it is very easy. Once he put the pen on the paper, he won’t stop writing. He won’t stop a bit for thinking. If you give any single word, he can write on the same without any stop. He never stops in between to think while writing. There are so many ways. As God knows everything by his supernatural power; in the same way inspirations and idea comes into his mind spontaneously while he writes novels. Ex, if you offer him a pen or stone to write a novel, the novel format, foundation and even climax I mean who sketch of the novel comes into his mind within a fraction of seconds. By chance if he starts to write novels holding pen with lots of imagination the story of novel will be changed. Suppose holding pen in fingers and writing novel with consuming more time; even he doesn’t know in what way it leads him to. There are no instances of writing by thinking in his career ever. So now he is a Mystic and clairvoyance, which means he can speak directly to the almighty.

You can give Hundred crore or UN limited themes (no limitation) at a time he can write on every theme one after another without stopping the pen. He can write on the spot it without giving any time for thinking. He can start writing on the given theme frequently without thinking or sketching about the theme.

It was declared a winner of the New 02nd Wonder of the World (2018-19) initiative.

03rd Wonder of the World

Sarahu’s 03rd Wonder Of The World
Abstract:

Here are some of the most important and pertinent documents; and the combination of all these records made it the new 03rd Wonder popular in the World. Sarahu’s Writings and World Records of achievement has been proclaimed and declaration is that to the 2018, 2019 as the 11th most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, social systems and Sarahu’s 18 Foundations and their 200 Employees. The 18 organization was founded for the same reason.

Sarahu was awarded 2,400 Different Awards. These Are Google Human Awards, Super Human Awards, Faithfull Awards, MEASURABLE Awards, BREAKABLE Awards, STANDARDISABLE Awards, VERIFIABLE Awards, ONE VARIABLE Awards, GLOBAL Awards, BASED ON ONE VARIABLE Awards And THE BEST IN THE WORLD Awards, when he was 29. And this is world’s 03rd most impressive world wonder. And based on these, different types of awards are sorted in different world records, new awards.

All of his writing skills have led him to become the world's third greatest wonder. One of his writing abilities is records that cannot be broken. Thus, his writing is so innovative that they are so human that he was awarded two thousand four hundred awards in recognition of his writing. It became the world's third wonder. Also He has been writing story, poetry, fiction, drama as well as cinema and film since his third grade. *He can write 1000 pages of novel within 24 hours which attributes to his quality of world fastest writer. *You can give Hundred crore or UN limited themes (no limitation) at a time he can write on every theme one after another without stopping the pen. He can write on the spot it without giving any time for thinking. He can start writing on the given theme frequently without thinking or sketching about the theme. *If you provide 2 stenographers he will write world fastest 450 – 500 pages of novel within 2 hours in a day. (First paragraph will be given to the first stenographer and second Para to the second person while the first person finishes that and continues writing with third Para, second stenographer writes the fourth Para so like this novels will be having full of knowledge and having standard quality presentation. Like this in 2 hours he can write around 450 to 500 pages) In the same way if you provide 2 stenographers he will write 4500 to 5000 pages of novel within 24 hours.

It was declared a winner of the New 03th Wonder of the World (2018-19) initiative.

Org Name: “The Sarahu New 07 Wonders of the World”

Our Vision

“The Sarahu New 07 Wonders of the World”, which is part of the Sarahu World Records. This is an integral part of Sarahu World Records. How Sarahu World Records has a great deal like Human Accomplishments, Documentary, TV shows, reality shows etc. in the same way Sarahu Officially wonders the best quality TV shows in the media and entertainment organization, the reality shows, making the research a new wonder of the world, a special mission.

If we look at the wonders we can have anyone in the world and the Consider and Agree. Things naturally become a history of what one thing are worth to wonder. Some groups have to be prepared by a mature organization and have to make special impressions from ordinary people to make their own way of wondering through their own foundation.

Here is the part of SWR’s The Sarahu New 07 Wonders of the World Organization is working on a job called Social Work. There is no other purpose. Wondering to split the category through the category of Amazing Things, Cities, Naturals, Reverse, Superman, Super Humans, Working, Prices, Awards, Degrees, and Buildings in the World.

This Mission has received many elite people and their impressions, such as Employee Comments. We did not establish this mission simply by virtue or selfishness. Because there are wonders that can come in the wonders, they are presented on our website and clearly distributed. That is why the wonders are more visible in the world, and we are sorted out by category and shown in a simple form.

There are many love stories, natural, statues, buildings, such as in the world. But not all of them can be considered wonder. Because audience and followers will be given this opportunity by voting. As each country, different types of voters and audience think in the states, we sometimes discuss ourselves with 200 Employees and consider Wonder.

We do not consider Mythology here. We are only considering what is visible to the eye. Every year, two years and 5 years we are giving new wonders to light. Then it goes on and on. In 2019, 15 new wonders of new history were written in 2019, with 7 new wonders of Sarahu in the 8 wonders we had seen by our team since long research. The 7 new wonders of Sarahu are also listed as the new 7Wonders of the World as we look at our eyes.

Already post the Sarahu’s New 07 Wonders on face book and other social websites, and views in the same way, the likes are more. However, there is not much publicity available here. Because the strangers, and those who do not know about Sarahu, are skeptical of suspicion. The news paper also has a fear of TV media.
But, along with the 18th Foundation, has been brought to the crossover weekly news and magazines including 200 Employees, and Team. They are all for Sarahu’s achievements! And nothing else. But, the work took five consecutive years to cover the World Records Company and the 18 Foundations and Audience. This work took place from 3 years onwards. Universe Wonders Released on But, Finally 2019 May Month.

“NEW SARAHU’S LOVE 8th WONDER OF THE WORLD”

Abstract:
Here are some of the most important and pertinent documents; and the combination of all these records made it the new 08th Wonder popular in the World. Sarahu’s love of achievement has been proclaimed and declaration is that to the 2018, 2019 as the 8th most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, social systems and Sarahu’s 18 Foundations and their 200 Employees. The 18 organization was founded for the same reason.

“The following is an account of Lord ‘Sarahu Nagarazan’ achievements”

Lord Sarahu Nagarazan 01/06/1988 was born as a human incarnation to the earth. And he has come for the welfare of world. What he has suffered in this human incarnation is as follows. Beginning with the vicissitude of his Love. He did continuously 8 years Dhyāna or hypnotism for his first lover Uma. In these 8 years, last 4 year’s Suma came into his life and infringed in Dhyāna or hypnotism. Then he continued Dhyāna or hypnotism for Uma. After 8 years instead of getting the power of hypnotism, he received the grace of illumination on god and world. Uma is elder than him a year and Suma is also elder than him two years. Lord Sarahu Nagarazan is Incarnation of Lord Shiva. Uma is also Incarnation of Goddess Parvathi and Suma is Incarnation of Goddess Ganga.

Finally, it was declared a winner of the Sarahu’s Love 8th Wonder of the World (2018-19) initiative.

★★★
Abstract:
Here are some of the most important and pertinent documents; and the combination of all these records made it the new 9th Wonder popular in the World. Sarahu’s Writings of achievement have been proclaimed and declaration is that to the 2018, 2019 as the 9th most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, Social systems, Sarahu’s 18 Foundations and their 200 Employees. The 18 organization was founded for the same reason.

Sarahu’s all strength is expressed in the caliber of all his writings and he received 321 New World records, 321 Awards and 321 Honorable Certificates, 321 Breaking records, 321 Breaking awards, and 321 Breaking Honorable Certificates, when he was 29. These are included to 9th Wonder of the world.

He has been writing story, poetry, fiction, drama as well as cinema and film since his third grade. And he can write sitting in front of stereo sound with woofer sound, and even he can write sitting in isolation, it’s his routine. He can write without using headphone. However you tell he can write. Whatever he writes it’s purely in Kannada language only. Writing novels in Kannada language is quite difficult while as in English it is very easy. Once he put the pen on the paper, he won’t stop writing. He won’t stop a bit for thinking. If you give any single word, he can write on the same without any stop. He never stops in between to think while writing. There are so many ways. As God knows everything by his supernatural power; in the same way inspirations and idea comes into his mind spontaneously while he writes novels. Ex, if you offer him a pen or stone to write a novel, the novel format, foundation and even climax I mean who sketch of the novel comes into his mind within a fraction of seconds. By
chance if he starts to write novels holding pen with lots of imagination the story of novel will be changed. Suppose holding pen in fingers and writing novel with consuming more time; even he doesn’t know in what way it leads him to. There are no instances of writing by thinking in his career ever. So now he is a Mystic and clairvoyance, which means he can speak directly to the almighty.

You can give Hundred crore or UN limited themes (no limitation) at a time he can write on every theme one after another without stopping the pen. He can write on the spot it without giving any time for thinking. He can start writing on the given theme frequently without thinking or sketching about the theme.

He Received 1926 New and Breaking World Records Certificates from “Sarahu World Records”

http://www.sarahuworldrecords.com

***
Abstract:
Here are some of the most important and pertinent documents; and the combination of all these records made it the new 10th Wonder popular in the World. Sarahu’s Writings and World Records of achievement has been proclaimed and declaration is that to the 2018, 2019 as the 10th most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, social systems and Sarahu’s 18 Foundations and their 200 Employees. The 18 organization was founded for the same reason.

Sarahu was awarded 2,400 Different Awards. These Are Google Human Awards, Super Human Awards, Faithfull Awards, MEASURABLE Awards, BREAKABLE Awards, STANDARDISABLE Awards, VERIFIABLE Awards, ONE VARIABLE Awards, GLOBAL Awards, BASED ON ONE VARIABLE Awards And THE BEST IN THE WORLD Awards, when he was 29. And this is world’s 10th most impressive world wonder. And based on these, different types of awards are sorted in different world records, new awards.

All of his writing skills have led him to become the world's third greatest wonder. One of his writing abilities is records that cannot be broken. Thus, his writing is so innovative that they are so human that he was awarded two thousand four hundred awards in recognition of his writing. It became the world's third wonder. Also He has been writing story, poetry, fiction, drama as well as cinema and film since his third grade. *He can write 1000 pages of novel within 24 hours which attributes to his quality of world fastest writer. *You can give Hundred crore or UN limited themes (no limitation) at a time he can write on every theme one after another without stopping the pen. He can write on the spot it without giving any time for thinking. He can start writing on the given theme frequently without thinking or sketching about the theme. *If you provide 2 stenographers he will write world fastest 450 – 500 pages of novel within 2 hours in a day. (First paragraph will be given to the first stenographer and second Para to the second person while the first person finishes that and continues writing with third Para, second
stenographer writes the fourth Para so like this novels will be having full of knowledge and having standard quality presentation. Like this in 2 hours he can write around 450 to 500 pages) In the same way if you provide 2 stenographers he will write 4500 to 5000 pages of novel within 24 hours.

He Received 2,400 New Different Awards from “Sarahu World Records”

‘Our Vision’

The only man’s glimpse at Sarahu New 06 Universal Wonders And to the eye of man more special than Earth Wonders Universal Wonder is rated as more AMAZING than Means World Records and Super Man. Mars and Saturn as captured by the only telescope and Satellites and we don’t aggravate the Planet of the Alliance and other creatures out there. At least the man should be in a position to give me a visit. This is the case when there is clear information which cannot be issued by Inks Visit and Superhuman Humans, Urban, Natures; Galaxies are being upgraded as Universal Wonders.

Established for our Universal Wonders Only World, for Entertainment, and for World’s Populace, Schools, University for Knowledge. Founder Sarahu, as seen in the World and his actions as we know Feats can be called the World Wonders and the Universal Wonder.

Wonder if the same Mars had been superseded by Wonder. Also, study our galaxy, Milky Ways, Universal Wonders Establish a Study of Earth, Earth’s Man Feats. For now, the one-two solar system will be upgraded to Universal Wonders at Man-Superhuman Feats Earth.

Only two have done so since it only appeared to the eye of the Founder. Only Nature and Man-Made are here. But, Man-Made is also Nature. Every day, Every Month, Year Our team is searching and updating. Since we are universal wonder of architecture, City, hills, rivers, bridges, and it is a universal sector, it is not advisable to give it a certificate. Butt, Universal Wonder People needs to be aggravated. Must be certified. Yet we, the city, the hills, the bridges, we give the country-governor a certificate. So Certificates are not imported right here so Planets do not give Certificates.

We made the Planets Solar System into a Universal Wonder, as there are enough natures at Universal to exist in Earth. But, Milky Way’s is not a Universal Wonder for Made. Because can see him from the telescope But Planets are unmistakable. It would be an air or Illusion. Similarly, the 7 Wonders at Earth ‘were united in Universal as a wonder. 7 Nature’s Wonders was made into the Only One Universal Wonder. Butt Founder is Universal Wonder along with Sarahu’s 7 Wonder.

One Universal Wonder is become by the 07 world wonders, 07 Ancient Wonders is consider by one Universal Ancient Wonder, 07 Cities Wonder consider by One Universal city, 07 Nature Wonder, is consider by one Universal Nature Wonder, Sarahu's 07 Wonders will be consider by one Human universal wonder and 09 Planets will be consider to give as a Universal Solar Wonder.

The above which we mentioned was accomplished by the 18 organizations which includes the 300 manpower with another audience opinions and recommendations. And we’re doing it. Here’s how we did and worked on the 06 Universal Wonders.

***

1. One of the World’s New Seven Wonders is a Universe Wonder.
2. Sarahu’s New Seven Wonders is a Universe Human.
3. One Universe Ancient Wonder is one of the seven Ancient Wonders of the World.
4. Universe Nature Wonder is one of the World’s New Seven Nature Wonders.
5. Universe City Wonder is one of the World’s New Seven Cities Wonders.
6. Most importantly, the Solar System was added to the first place in the Universe Wonder, as the universe resembles the Universe.

In total, the new Seven Wonders are new in our world. These have also been won by Universe with Sarahu World Records Company and it’s under 18 Foundations. Same processor. Along with some schools, colleges, Ngo’s, Friends, Devotions, Temples, Societies Vote, Comments, Likes. Thus in 2019 May Month:
1. Universe Human
2. Universe Wonders
3. Universe Natures
4. Universe Cities
5. Universe Ancient
6. Universe Solar system seven Universe Seven are Wonders.

But, the work took five consecutive years to cover the World Records Company and the 18 Foundations and Audience. This work took place from 3 years onwards. Universe Wonders Released on But, Finally 2019 May Month.

http://www.sarahuworldrecords.com
Finally, it was declared a winner of the Sarahu’s 01st Love Wonder of the World (2018-19) initiative.

***

“New Sarahu’s 02nd Wonder of the World”

Abstract:
Here are some of the most important and pertinent documents; and the combination of all these records made it the new 02nd Wonder popular in the World. Sarahu’s Writings of achievement have been proclaimed and declaration is that to the 2018, 2019 as the 02nd most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, Social systems, Sarahu’s 18 Foundations and their 200 Employees. The 18 organization was founded for the same reason.
Sarahu’s all strength is expressed in the caliber of all his writings and he received 321 New World records, 321 Awards and 321 Honorable Certificates, 321 Breaking records, 321 Breaking awards, and 321 Breaking Honorable Certificates, when he was 29. These are included to 02nd Wonder of the world.

He has been writing story, poetry, fiction, drama as well as cinema and film since his third grade. And he can write sitting in front of stereo sound with woofer sound, and even he can write sitting in isolation, it’s his routine. He can write without using headphone. However you tell he can write. Whatever he writes it’s purely in Kannada language only. Writing novels in Kannada language is quite difficult where as in English it is very easy. Once he put the pen on the paper, he won’t stop writing. He won’t stop a bit for thinking. If you give any single word, he can write on the same without any stop. He never stops in between to think while writing. There are so many ways. As God knows everything by his supernatural power; in the same way inspirations and idea comes into his mind spontaneously while he writes novels. Ex, if you offer him a pen or stone to write a novel, the novel format, foundation and even climax I mean who sketch of the novel comes into his mind within a fraction of seconds. By chance if he starts to write novels holding pen with lots of imagination the story of novel will be changed. Suppose holding pen in fingers and writing novel with consuming more time; even he doesn’t know in what way it leads him to. There are no instances of writing by thinking in his career ever. So now he is a Mystic and clairvoyance, which means he can speak directly to the almighty.

You can give Hundred crore or UN limited themes (no limitation) at a time he can write on every theme one after another without stopping the pen. He can write on the spot it without giving any time for thinking. He can start writing on the given theme frequently without thinking or sketching about the theme.

He Received 1926 New and Breaking World Records Certificates from “Sarahu World Records”

http://www.sarahuworldrecords.com

finally, It was declared a winner of the New 02nd Wonder of the World (2018-19) initiative.

***

New Sarahu’s 03rd Wonder Of The World

Abstract:

Here are some of the most important and pertinent documents; and the combination of all these records made it the new 03rd Wonder popular in the World. Sarahu’s Writings and World Records of achievement has been proclaimed and declaration is that to the 2018.
2019 as the 03rd most Wonder in the world, with the likes of some audience, public opinion and the likes of some companies, social systems and Sarahu’s 18 Foundations and their 200 Employees. The 18 organization was founded for the same reason.

Sarahu was awarded 2,400 Different Awards. These Are Google Human Awards, Super Human Awards, Faithfull Awards, MEASURABLE Awards, BREAKABLE Awards, STANDARDISABLE Awards, VERIFIABLE Awards, ONE VARIABLE Awards, GLOBAL Awards, BASED ON ONE VARIABLE Awards And THE BEST IN THE WORLD Awards, when he was 29. And this is world’s 03rd most impressive world wonder. And based on these, different types of awards are sorted in different world records, new awards.

All of his writing skills have led him to become the world's third greatest wonder. One of his writing abilities is records that cannot be broken. Thus, his writing is so innovative that they are so human that he was awarded two thousand four hundred awards in recognition of his writing. It became the world's third wonder. Also He has been writing story, poetry, fiction, drama as well as cinema and film since his third grade. *He can write 1000 pages of novel within 24 hours which attributes to his quality of world fastest writer. *You can give Hundred crore or UN limited themes (no limitation) at a time he can write on every theme one after another without stopping the pen. He can write on the spot it without giving any time for thinking. He can start writing on the given theme frequently without thinking or sketching about the theme. *If you provide 2 stenographers he will write world fastest 450 – 500 pages of novel within 2 hours in a day. (First paragraph will be given to the first stenographer and second Para to the second person while the first person finishes that and continues writing with third Para, second stenographer writes the fourth Para so like this novels will be having full of knowledge and having standard quality presentation. Like this in 2 hours he can write around 450 to 500 pages) In the same way if you provide 2 stenographers he will write 4500 to 5000 pages of novel within 24 hours.

He Received 2,400 New Different Awards from “Sarahu World Records”

http://www.sarahuworldrecords.com

It was declared a winner of the New 03th Wonder of the World (2018-19) initiative.

Chapter – 02

“THE SEVEN NEW ANCIENT WONDERS OF THE WORLD”

01. “LIGHTHOUSE OF ALEXANDRIA”

The Lighthouse of Alexandria, sometimes called the Pharos of Alexandria (/ˈfɛəroʊ/; Ancient Greek: ὁ Φάρος τῆς Ἀλεξάνδρειας, contemporary Koine Greek pronunciation: [ho pʰa.ros teː:s a.lek.sandreː.a:s]), was a lighthouse built by the Ptolemaic Kingdom, during the reign of Ptolemy II Philadelphus (280–247 BC),[1] which has been estimated to be 100 metres (330 ft) in overall height.[2] One of the Seven Wonders of the Ancient World, for many centuries it was one of the tallest man-made structures in the world. Badly damaged by three earthquakes between AD 956 and 1323, it then became an abandoned ruin. It was the third longest surviving ancient wonder (after the Mausoleum at Halicarnassus and the extant Great Pyramid of Giza), surviving in part until 1480, when the last of its remnant stones were used to build the Citadel of Qaitbay on the site. In 1994, French archaeologists discovered some remains of the lighthouse on the floor of Alexandria's Eastern Harbour,[3] In 2016 the Ministry of State of Antiquities in Egypt had plans to turn submerged ruins of ancient Alexandria, including those of the Pharos, into an underwater museum.

★★★
The **Hanging Gardens of Babylon** were one of the Seven Wonders of the Ancient World as listed by Hellenic culture, described as a remarkable feat of engineering with an ascending series of tiered gardens containing a wide variety of trees, shrubs, and vines, resembling a large green mountain constructed of mud bricks, and said to have been built in the ancient city of Babylon, near present-day Hillah, Babil province, in Iraq. Its name is derived from the Greek word *kremastos* (κρεμαστός, lit. "overhanging"), which has a broader meaning than the modern English word "hanging" and refers to trees being planted on a raised structure such as a terrace.\(^1\)[2][3]

According to one legend, the **Hanging Gardens** were built alongside a grand palace known as *The Marvel of Mankind*, by the Neo-Babylonian King Nebuchadnezzar II (who ruled between 605 and 562 BC), for his Median wife Queen Amytis, because she missed the green hills and valleys of her homeland. This was attested to by the Babylonian priest Berossus, writing in about 290 BC, a description that was later quoted by Josephus. The construction of the **Hanging Gardens** has also been attributed to the legendary queen Semiramis, who supposedly ruled Babylon in the 9th century BC.\(^4\)[5] and they have been called the **Hanging Gardens of Semiramis** as an alternate name.\(^1\)

The **Hanging Gardens** are the only one of the Seven Wonders for which the location has not been definitively established.\(^6\) There are no extant Babylonian texts that mention the gardens, and no definitive archaeological evidence has been found in Babylon. Three theories have been suggested to account for this. One: that they were purely mythical, and the descriptions found in ancient Greek and Roman writers including Strabo, Diodorus Siculus and Quintus Curtius Rufus represent a romantic ideal of an eastern garden. Two: that they existed in Babylon, but were completely destroyed sometime around the first century AD. Three: that the legend refers to a well-documented garden that the Assyrian King Sennacherib (704–681 BC) built in his capital city of Nineveh on the River Tigris, near the modern city of Mosul.

***
03. GREAT PYRAMID AT GIZA

The Great Pyramid of Giza (also known as the Pyramid of Khufu or the Pyramid of Cheops) is the oldest and largest of the three pyramids in the Giza pyramid complex bordering present-day El Giza, Egypt. It is the oldest of the Seven Wonders of the Ancient World, and the only one to remain largely intact.

Based on a mark in an interior chamber naming the work gang and a reference to the fourth dynasty Egyptian Pharaoh Khufu, Egyptologists believe that the pyramid was built as a tomb over a 10- to 20-year period concluding around 2560 BC. Initially at 146.5 metres (481 feet), the Great Pyramid was the tallest man-made structure in the world for more than 3,800 years. Originally, the Great Pyramid was covered by limestone casing stones that formed a smooth outer surface; what is seen today is the underlying core structure. Some of the casing stones that once covered the structure can still be seen around the base. There have been varying scientific and alternative theories about the Great Pyramid's construction techniques. Most accepted construction hypotheses are based on the idea that it was built by moving huge stones from a quarry and dragging and lifting them into place.

There are three known chambers inside the Great Pyramid. The lowest chamber is cut into the bedrock upon which the pyramid was built and was unfinished. The so-called Queen's Chamber and King's Chamber are higher up within the pyramid structure. The main part of the Giza complex is a set of buildings that included two mortuary temples in honour of Khufu (one close to the pyramid and one near the Nile), three smaller pyramids for Khufu's wives, an even smaller "satellite" pyramid, a raised causeway connecting the two temples, and small mastaba tombs surrounding the pyramid for nobles.

The Temple of Artemis or Artemision (Greek: Άρτεμισίον; Turkish: Artemis Tapınağı), also known less precisely as the Temple of Diana, was a Greek temple dedicated to an ancient, local form of the goddess Artemis. It was located in Ephesus (near the modern town of Selçuk in present-day Turkey). It was completely rebuilt three times, and in its final form was one of the Seven Wonders of the Ancient World. By 401 AD it had been ruined or destroyed.¹ Only foundations and fragments of the last temple remain at the site.

The earliest version of the temple (a temenos) antedated the Ionic immigration by many years, and dates to the Bronze Age. Callimachus, in his Hymn to Artemis, attributed it to the Amazons. In the 7th century BC, it was destroyed by a flood. Its reconstruction, in more grandiose form, began around 550 BC, under the Cretan architect Chersiphron and his son Metagenes. The project was funded by Croesus of Lydia, and took 10 years to complete. This version of the temple was destroyed in 356 BC by Herostratus in an act of arson. The next, greatest and last form of the temple, funded by the Ephesians themselves, is described in Antipater of Sidon’s list of the world’s Seven Wonders:

***
The Mausoleum at Halicarnassus or Tomb of Mausolus (Ancient Greek: Μαυσώλειον τῆς Ἀλικαρνασσοῦ; Turkish: Halikarnas Mozolesi) was a tomb built between 353 and 350 BC at Halicarnassus (present Bodrum, Turkey) for Mausolus, a satrap in the Persian Empire, and his sister-wife Artemisia II of Caria. The structure was designed by the Greek architects Satyros and Pythius of Priene. Its elevated tomb structure is derived from the tombs of neighbouring Lycia, a territory Mausolus had invaded and annexed circa 460 BC, such as the Nereid Monument.

The Mausoleum was approximately 45 m (148 ft) in height, and the four sides were adorned with sculptural reliefs, each created by one of four Greek sculptors—Leochares, Bryaxis, Scopas of Paros and Timotheus. The finished structure of the mausoleum was considered to be such an aesthetic triumph that Antipater of Sidon identified it as one of his Seven Wonders of the Ancient World. It was destroyed by successive earthquakes from the 12th to the 15th century, the last surviving of the six destroyed wonders.

The **Statue of Zeus at Olympia** was a giant seated figure, about 13 m (43 ft) tall, made by the Greek sculptor Phidias around 435 BC at the sanctuary of Olympia, Greece, and erected in the Temple of Zeus there. A sculpture of ivory plates and gold panels over a wooden framework, it represented the god Zeus sitting on an elaborate cedar wood throne ornamented with ebony, ivory, gold and precious stones. One of the Seven Wonders of the Ancient World, it was lost and destroyed during the 5th century AD with no copy ever being found, and details of its form are known only from ancient Greek descriptions and representations on coins.

***
The Colossus of Rhodes (Ancient Greek: ὁ Κολοσσὸς Ἱλίδος, translit. ho Kolossòs Rhódios Greek: Κολοσσός της Ρόδου, translit. Kolossós tes Rhódou)[1] was a statue of the Greek sun-god Helios, erected in the city of Rhodes, on the Greek island of the same name, by Chares of Lindos in 280 BC. One of the Seven Wonders of the Ancient World, it was constructed to celebrate Rhodes' victory over the ruler of Cyprus, Antigonus I Monophthalmus, whose son Demetrius I of Macedon unsuccessfully besieged Rhodes in 305 BC. According to most contemporary descriptions, the Colossus stood approximately 70 cubits, or 33 metres (108 feet) high—the approximate height of the modern Statue of Liberty from feet to crown—making it the tallest statue of the ancient world. It collapsed during the earthquake of 226 BC; although parts of it were preserved, it was never rebuilt.

As of 2015, there are tentative plans to build a new Colossus at Rhodes Harbour, although the actual location of the original remains in dispute.

Chapter – 03

THE SEVEN NEW CITIES WONDERS OF THE WORLD

01. BEIRUT

Beirut Governorate, Lebanon

Beirut (Arabic: بيروت, French: Beyrouth) is the capital and largest city of Lebanon. No recent population census has been done but in 2007 estimates ranged from slightly more than 1 million to slightly less than 2 million as part of Greater Beirut. Located on a peninsula at the midpoint of Lebanon’s Mediterranean coast, Beirut is the country’s largest and main seaport.

It is one of the oldest cities in the world, inhabited more than 5,000 years ago. The first historical mention of Beirut is found in the ancient Egyptian Tell el Amarna letters dating from the 15th century BC. The Beirut River runs south to north on the eastern edge of the city.

Beirut is Lebanon’s seat of government and plays a central role in the Lebanese economy, with many banks and corporations based in its Central District, Badaro, Rue Verdun, Hamra and Ashrafieh. Following the destructive Lebanese Civil War, Beirut’s cultural landscape underwent major reconstruction. Identified and graded for accountancy, advertising, banking/finance and law, Beirut is ranked as a Beta World City by the Globalization and World Cities Research Network.

In May 2015, Beirut was officially recognized as one of the New7Wonders Cities together with Vigan, Doha, Durban, Havana, Kuala Lumpur, and La Paz.

02. DOHA

Qatar

Doha (Arabic: الدوحة, ad-Dawḥa or ad-Dōḥa; Arabic pronunciation: [dawha] DAW-ha, literally in MSA: “the big tree”, locally: “rounded bays”) is the capital city and most populous city of the State of Qatar. Doha has a population of 1,351,000 in a city proper with the population close to 1.5 million. The city is located on the coast of the Persian Gulf in the east of the country. It is Qatar’s fastest growing city, with over 50% of the nation’s population living in Doha or its surrounding suburbs, and it is also the economic center of the country. It comprises one of the municipalities of Qatar.

Doha was founded in the 1820s as an offshoot of Al Bidda. It was officially declared as the country’s capital in 1971, when Qatar gained independence. As the commercial capital of Qatar and one of the emergent financial centers in the Middle East, Doha is considered a world city by the Globalization and World Cities Research Network. Doha accommodates Education City, an area devoted to research and education.

The city was host to the first ministerial-level meeting of the Doha Development Round of World Trade Organization negotiations. It was also selected as host city of a number of sporting events, including the 2006 Asian Games, the 2011 Pan Arab Games and most of the games at the 2011 AFC Asian Cup. In December 2011, the World Petroleum Council held the 20th World Petroleum Conference in Doha. Additionally, the city hosted the 2012 UNFCCC Climate Negotiations and is set to host a large number of the venues for the 2022 FIFA World Cup.

In May 2015, Doha was officially recognized as one of the New7Wonders Cities together with Vigan, La Paz, Durban, Havana, Beirut, and Kuala Lumpur.

DURBAN

EThekweni, South Africa

Durban (Zulu: eThekwini, from itheku meaning “bay/lagoon”) is the largest city in the South African province of KwaZulu-Natal. Durban’s metropolitan municipality ranks third among the most populous urban areas in South Africa after Johannesburg and Cape Town. It is also the second most important manufacturing hub in South Africa after Johannesburg. It forms part of the eThekwini Metropolitan Municipality. Durban is famous for being the busiest port in South Africa. It is also seen as one of the major centres of tourism because of the city’s warm subtropical climate and extensive beaches. The municipality, which includes neighbouring towns, has a population of almost 3.5 million, making the combined municipality one of the biggest cities on the Indian Ocean coast of the African continent. The metropolitan land area of 2,292 square kilometres (885 sq mi) is comparatively larger than other South African cities, resulting in a somewhat lower population density of 1,513/km² (3,920/sq mi). It has the highest number of dollar millionaires added per year of any South African city with the number rising 200% between 2000 and 2014.

In May 2015, Durban was officially recognized as one of the New7Wonders Cities together with Vigan, Doha, La Paz, Havana, Beirut, and Kuala Lumpur.

***
Havana (/haˈvænə/; Spanish: La Habana, [la aˈβana]) is the capital city, largest city, province, major port, and leading commercial centre of Cuba. The city proper has a population of 2.1 million inhabitants, and it spans a total of 728.26 km² (281.18 sq mi) – making it the largest city by area, the most populous city, and the third largest metropolitan area in the Caribbean region. The city extends mostly westward and southward from the bay, which is entered through a narrow inlet and which divides into three main harbours: Marimelena, Guanabacoa and Atarés. The sluggish Almendares River traverses the city from south to north, entering the Straits of Florida a few miles west of the bay.

The city of Havana was founded by the Spanish in the 16th century and due to its strategic location it served as a springboard for the Spanish conquest of the continent becoming a stopping point for the treasure-laden Spanish galleons on the crossing between the New World and the Old World. King Philip II of Spain granted Havana the title of City in 1592. Walls as well as forts were built to protect the old city. The sinking of the U.S. battleship Maine in Havana’s harbor in 1898 was the immediate cause of the Spanish–American War.

Contemporary Havana can essentially be described as three cities in one: Old Havana, Vedado and the newer suburban districts. The city is the center of the Cuban government, and home to various ministries, headquarters of businesses and over 90 diplomatic offices. The current mayor is Marta Hernández from the Communist Party of Cuba (PCC). In 2009, the city/province had the 3rd highest income in the country.

The city attracts over a million tourists annually, the Official Census for Havana reports that in 2010 the city was visited by 1,176,627 international tourists, a 20.0% increase from 2005. The historic centre was declared a UNESCO World Heritage Site in 1982. The city is also noted for its history, culture, architecture and monuments. As typical of Cuba, Havana also features a tropical climate.

In May 2015, Havana was officially recognized as one of the New7Wonders Cities together with Vigan, Doha, La Paz, Durban, Beirut, and Kuala Lumpur.

KUALA LUMPUR

Malaysia, Malaysia

Kuala Lumpur (/ˈkwaːləˈlʊmpɔːr/ or /ˈpər/; Malaysian pronunciation: [ˈkualə ˈlumpɔr]), officially the Federal Territory of Kuala Lumpur, is the national capital of Malaysia as well as its largest city. The city covers an area of 243 km² (94 sq mi) and has an estimated population of 1.7 million as of 2015. Greater Kuala Lumpur, also known as the Klang Valley, is an urban agglomeration of 7.2 million people as of 2013. It is among the fastest growing metropolitan regions in South-East Asia, in terms of population and economy.

Kuala Lumpur is the seat of the Parliament of Malaysia. The city was once home to the executive and judicial branches of the federal government, but they were moved to Putrajaya in early 1999. Some sections of the judiciary still remain in the capital city of Kuala Lumpur. The official residence of the Malaysian King, the Istana Negara, is also situated in Kuala Lumpur. Rated as an alpha world city, Kuala Lumpur is the cultural, financial and economic centre of Malaysia due to its position as the capital as well as being a key city.

Kuala Lumpur is one of three Federal Territories of Malaysia, enclaved within the state of Selangor, on the central west coast of Peninsular Malaysia. Since the 1990s, the city has played host to many international sporting, political and cultural events including the 1998 Commonwealth Games and the Formula One Grand Prix. In addition, Kuala Lumpur is home to the tallest twin buildings in the world, the Petronas Twin Towers, which have become an iconic symbol of Malaysia’s futuristic development.

***
La Paz, (/lɑːˈpɑːz/), officially known as Nuestra Señora de La Paz (Spanish pronunciation: [ˈnweɾa seˈɲoɾa de la paʃ]; English: Our Lady of Peace), also named Chuqui Yapu (Chuquiago) in Aymara, is the seat of government of the Plurinational State of Bolivia. With an estimated 789,541 residents as of 2015, La Paz is the third-most populous city (after Santa Cruz de la Sierra and El Alto). Its metropolitan area, which is formed by La Paz, El Alto and Viacha, make the most populous urban area in Bolivia, with a population of 2.3 million inhabitants. It is also the capital of the La Paz Department. The city, located in west-central Bolivia, 68 km (42 mi) southeast of Lake Titicaca, is set in a canyon created by the Choqueyapu River and sits in a bowl-like depression surrounded by the high mountains of the altiplano. Overlooking the city is towering triple-peaked Illimani, which is always snow-covered and can be seen from many parts of the city. At an elevation of roughly 3,650 m (11,975 ft) above sea level, La Paz is the highest capital city in the world. Due to its altitude, La Paz has an unusual subtropical highland climate, with rainy summers and dry winters.

La Paz was founded on October 20, 1548 by the Spanish conquistador Captain Alonso de Mendoza at the site of the Inca settlement of Laja as a connecting point between the commercial routes that led from Potosí and Oruro to Lima; the full name of the city was originally Nuestra Señora de La Paz (meaning Our Lady of Peace) in commemoration of the restoration of peace following the insurrection of Gonzalo Pizarro and fellow conquistadors against the first viceroy of Peru. The city was later moved to its present location in the valley of Chuquiago Marka. La Paz was originally under Spanish rule when it belonged to the Viceroyalty of the Río de la Plata. Since its founding, the city experienced numerous revolts, the most significant ones being in 1781, when the indigenous leader and independence activist Túpac Katari laid siege to the city for a total of six months and on July 16, 1809 when the Bolivian patriot Pedro Domingo Murillo ignited a revolution of independence marking the beginning of the Spanish American Wars of Independence.

As the seat of the government of Bolivia, La Paz is the site of the Palacio Quemado, the Presidential Palace and seat of the Bolivian executive power, the Plurinational Legislative Assembly and numerous government departments and agencies. Sucre remains, however, the constitutional capital of Bolivia and retains the judicial power. The city also hosts numerous foreign embassies as well as international missions in the country. La Paz is an important political, administrative, economic, and sports center of Bolivia; it was responsible for generating 25% of Bolivia’s Gross Domestic Product and serves as the headquarters for numerous Bolivian companies and industries.
La Paz is also an important cultural center of Bolivia, as it hosts several landmarks belonging to the colonial times, such as the San Francisco Church, the Metropolitan Cathedral, the Plaza Murillo and the Jaén Street. The city is also renowned for its unique markets, particularly the Witches’ Market, and for its vibrant nightlife. Its unusual topography offers unique views of the city and the surrounding mountains of the Cordillera Real from numerous natural viewing points. La Paz is also home to both the longest and highest urban cable car network in the world. In May 2015, it was officially recognized as one of the New7Wonders Cities together with Vigan, Doha, Durban, Havana and Kuala Lumpur. La Paz is listed on the Global Cities Index 2015, and is considered a global city type “Gamma” by GaWC.

***
Ilocos Sur, Philippines

Vigan, officially the City of Vigan (Ilocano: Ciudad ti Bigan; Filipino: Lungsod ng Vigan) is a fourth-class component city and capital of the province of Ilocos Sur in the Philippines. The city is located on the western coast of the large island of Luzon, facing the South China Sea. According to the 2015 census, it has a population of 53,879 people.

It is a UNESCO World Heritage Site in that it is one of the few Hispanic towns left in the Philippines where its structures have remained intact, and is well known for its cobblestone streets and a unique architecture that fuses Philippine and Oriental building designs and construction, with colonial European architecture. Former Philippine president Elpidio Quirino, the sixth President of the Philippines, was born in Vigan, at the former location of the Provincial Jail (his father was a warden); and resided in the Syquia Mansion.

In May 2015, Vigan City was officially recognized as one of the New7Wonders Cities together with Beirut, Doha, Durban, Havana, Kuala Lumpur and La Paz. New7Wonders Foundation president and founding member Bernard Weber led a ceremony held at St. Paul Cathedral where he handed a bronze plaque to Vigan Mayor Eva Grace Singson-Medina, signifying the heritage city’s election as one of the world’s wonder cities.

Chapter – 03

“THE SEVEN NEW NATURE WONDERS OF THE WORLD”

01.AMAZON

South America

The Amazon River (US /ˈæməzɒn/ or UK /ˈæməzən/; Spanish and Portuguese: Amazonas) in South America is the largest river by discharge of water in the world, and according to some experts, the longest in length.

The headwaters of the Apurímac River on Nevado Mismi had been considered for nearly a century as the Amazon’s most distant source, until a 2014 study found it to be the Cordillera Rumi Cruz at the headwaters of the Mantaro River in Peru. The Mantaro and Apurimac confluence, and with other tributaries form the Ucayali, which in turn confluences with the River Marañón upstream of Iquitos, Peru, to form what countries other than Brazil consider to be the main stem of the Amazon. Brazilians call this section of the river the Solimões above its confluence with the Rio Negro to form what Brazilians call the Amazon at the Meeting of Waters (Portuguese: Encontro das Águas) at Manaus, the river’s largest city.

At an average discharge of about 209,000 cubic metres per second (7,400,000 cu ft/s; 209,000,000 l/s; 55,000,000 USgal/s) — approximately 6,591 cubic kilometres per annum (1,581 cu mi/a), greater than the next seven largest independent rivers combined — the Amazon represents 20% of the global riverine discharge to the ocean. The Amazon basin is the largest drainage basin in the world, with an area of approximately 7,050,000 square kilometres (2,720,000 sq mi), and accounts for roughly one-fifth of the world’s total river flow. The portion of the river’s drainage basin in Brazil alone is larger than any other river’s basin. The Amazon enters Brazil with only one-fifth of the flow it finally discharges into the Atlantic Ocean, yet already has a greater flow at this point than the discharge of any other river.

Iguazu Falls, Iguazú Falls, Iguassu Falls, or Iguacu Falls (Spanish: Cataratas del Iguazú [kataˈɾatas ðel iɣwaˈsu̯]; Guarani: Chororo Yguasu [ɕoɾoɾo ɨɣʷasu]; Portuguese: Cataratas do Iguaçu [kataˈɾateʒ du iɣwaˈsu]) are waterfalls of the Iguazu River on the border of the Argentine province of Misiones and the Brazilian state of Paraná. They are the largest waterfalls system in the world. The falls divide the river into the upper and lower Iguazu. The Iguazu River rises near the city of Curitiba. For most of its course, the river flows through Brazil, however, most of the falls are on the Argentine side. Below its confluence with the San Antonio River, the Iguazu River forms the boundary between Argentina and Brazil.

The name “Iguazu” comes from the Guarani or Tupi words “y” [i], meaning “water”, and “ûasú” [waˈsu], meaning “big”. Legend has it that a deity planned to marry a beautiful woman named Naipi, who fled with her mortal lover Tarobá in a canoe. In a rage, the deity sliced the river, creating the waterfalls and condemning the lovers to an eternal fall. The first European to record the existence of the falls was the Spanish conquistador Álvar Núñez Cabeza de Vaca in 1541.
The Komodo dragon (Varanus komodoensis), also known as the Komodo monitor, is a species of lizard found in the Indonesian islands of Komodo, Rinca, Flores, Gili Motang, and Padar. A member of the monitor lizard family Varanidae, it is the largest living species of lizard, growing to a maximum length of 3 metres (10 ft) in rare cases and weighing up to approximately 70 kilograms (150 lb).

Their unusually large size has been attributed to island gigantism, since no other carnivorous animals fill the niche on the islands where they live. However, recent research suggests the large size of Komodo dragons may be better understood as representative of a relict population of very large varanid lizards that once lived across Indonesia and Australia, most of which, along with other megafauna, died out after the Pleistocene (as a result of human activity). Fossils very similar to V. komodoensis have been found in Australia dating to greater than 3.8 million years ago, and its body size remained stable on Flores, one of the handful of Indonesian islands where it is currently found, over the last 900,000 years, "a time marked by major faunal turnovers, extinction of the island's megafauna, and the arrival of early hominids by 880 ka [kiloannums]."

As a result of their size, these lizards dominate the ecosystems in which they live. Komodo dragons hunt and ambush prey including invertebrates, birds, and mammals. It has been claimed that they have a venomous bite; there are two glands in the lower jaw which secrete several toxic proteins. The biological significance of these proteins is disputed, but the glands have been shown to secrete an anticoagulant. Komodo dragons' group behaviour in hunting is exceptional in the reptile world. The diet of big Komodo dragons mainly consists of Timor deer, though they also eat considerable amounts of carrion. Komodo dragons also occasionally attack humans.

Mating begins between May and August, and the eggs are laid in September. About 20 eggs are deposited in abandoned megapode nests or in a self-dug nesting hole. The eggs are incubated for seven to eight months, hatching in April, when insects are most plentiful. Young Komodo dragons are vulnerable and therefore dwell in trees, safe from predators and cannibalistic adults. They take 8 to 9 years to mature, and are estimated to live up to 30 years.

Komodo dragons were first recorded by Western scientists in 1910. Their large size and fearsome reputation make them popular zoo exhibits. In the wild, their range has contracted due to human activities, and they are listed as vulnerable by the IUCN. They are protected under Indonesian law, and a national park, Komodo National Park, was founded to aid protection efforts.

Western Cape & City of Cape Town, South Africa

Table Mountain (Khoekhoe: Huri ‡oaxa, mountain rising from the sea; Afrikaans: Tafelberg) is a flat-topped mountain forming a prominent landmark overlooking the city of Cape Town in South Africa. It is a significant tourist attraction, with many visitors using the cableway or hiking to the top. The mountain forms part of the Table Mountain National Park. Table Mountain is home to a large array of fauna and flora, most of which is endemic.

The main feature of Table Mountain is the level plateau approximately three kilometres (2 mi) from side to side, edged by impressive cliffs. The plateau, flanked by Devil's Peak to the east and by Lion's Head to the west, forms a dramatic backdrop to Cape Town. This broad sweep of mountainous heights, together with Signal Hill, forms the natural amphitheatre of the City Bowl and Table Bay harbour. The highest point on Table Mountain is towards the eastern end of the plateau and is marked by Maclear's Beacon, a stone cairn built in 1865 by Sir Thomas Maclear for trigonometrical survey. It is 1,086 metres (3,563 ft) above sea level, and about 19 metres (62 ft) higher than the cable station at the western end of the plateau.

The cliffs of the main plateau are split by Platteklip Gorge ("Flat Stone Gorge"), which provides an easy and direct ascent to the summit and was the route taken by António de Saldanha on the first recorded ascent of the mountain in 1503.

The flat top of the mountain is often covered by orographic clouds, formed when a south-easterly wind is directed up the mountain's slopes into colder air, where the moisture condenses to form the so-called "table cloth" of cloud. Legend attributes this phenomenon to a smoking contest between the Devil and a local pirate called Van Hunks. When the table cloth is seen, it symbolizes the contest.

Table Mountain is at the northern end of a sandstone mountain range that forms the spine of the Cape Peninsula that terminates approximately 50 kilometres (30 mi) to the south at the Cape of Good Hope and Cape Point. Immediately to the south of Table Mountain is a rugged "plateau" at a somewhat lower elevation than the Table Mountain Plateau (at about 1,000 m or 3,300 ft), called the "Back Table". The "Back Table" extends southwards for approximately 6 km to the Constantia Nek-Hout Bay valley. The Atlantic side of the Back Table, known as the Twelve Apostles, which extends from Kloof Nek (the saddle between Table Mountain and Lion's Head) to Hout Bay. The eastern side of this portion of the Peninsula's mountain chain, extending from Devil's Peak, the eastern side of Table Mountain (Erica and Fernwood Buttresses), and the Back Table to Constantia Nek, does not have single name, as on the western side. It is
better known by the names of the conservation areas on its lower slopes: Groote Schuur Estate, Newlands Forest, Kirstenbosch Botanical Gardens, Cecilia Park, and Constantia Nek.

***
Western Visayas & Palawan, Philippines

The Puerto Princesa Subterranean River National Park is a protected area of the Philippines located about 80 kilometres (50 mi) north of the city centre of Puerto Princesa, Palawan. The river is also called Puerto Princesa Underground River. The national park is located in the Saint Paul Mountain Range on the western coast of the island. It is bordered by St. Paul Bay to the north and the Babuyan River to the east. The City Government of Puerto Princesa has managed the National Park since 1992. The entrance to the subterranean river is a short hike or boat ride from the town Sabang.

In 2010, a group of environmentalists and geologists discovered that the underground river has a second floor, which means that there are small waterfalls inside the cave. They also found a cave dome measuring 300 m (980 ft) above the underground river, rock formations, large bats, a deep water hole in the river, more river channels, and another deep cave, as well as marine creatures and more. Deeper areas of the underground river are almost impossible to explore due to oxygen deprivation.

On November 11, 2011, Puerto Princesa Underground River was provisionally chosen as one of the New7Wonders of Nature. This selection was officially confirmed on January 28, 2012.

06. JEJU ISLAND

Jeju Province, South Korea

Jeju Island (제주도, 濟州島, Jeju-do) is an island in Jeju Province, South Korea. The island lies in the Korea Strait, south of South Jeolla Province. The island contains the natural World Heritage Site Jeju Volcanic Island and Lava Tubes. Jejudo has a moderate climate; even in winter, the temperature rarely falls below 0 °C (32 °F). Jeju is a popular holiday destination and a sizable portion of the economy relies on tourism and economic activity from its civil/naval base.

From April 3, 1948 to May 1949, the South Korean government conducted an anticommunist campaign to suppress an attempted uprising on the island. The main cause for the rebellion was the election scheduled for May 10, 1948, designed by the United Nations Temporary Commission on Korea (UNTCOK) to create a new government for all of Korea. The elections were only planned for the south of the country, the half of the peninsula under UNTCOK control. Fearing that the elections would further reinforce division, guerrilla fighters for the South Korean Labor party (SKLP) reacted violently, attacking local police and rightist youth groups stationed on Jeju Island.

Atrocities were committed by both sides, but those by South Korean government forces are the best-documented. On one occasion, American soldiers discovered the bodies of 97 people who had been killed by government forces. On another, American soldiers encountered police who were executing 76 villagers.

Between 14,000 and 30,000 people died as a result of the rebellion, or up to 10% of the island’s total population. Some 40,000 others fled to Japan to escape the fighting. In the decades after the uprising, memory of the event was suppressed by the government through strict punishment. However, in 2006, the Korean government apologized for its role in the killings and promised reparations. As of 2010, these had not been paid.

In 2008, bodies of victims of a massacre were discovered in a mass grave near Jeju International Airport.

Planned Kim Jong-un visit

On November 11, 2018, it was announced that preparations were being made for North Korean leader Kim Jong-Un to visit Jeju during his upcoming visit to South Korea. Kim would be transported to Jeju via helicopter. The announcement came in after 200 tonnes of tangerines which were harvested in Jeju were flown to North Korea as a sign of appreciation for nearly 2 tonnes of North Korean mushrooms which Kim allowed South Korean President Moon Jae-In to take back to South Korea following the September 2018 inter-Korean summit.

07. HA LONG BAY

Vietnam

Ha Long Bay - is a UNESCO World Heritage Site and popular travel destination in Quang Ninh Province, Vietnam. The name Ha Long means "descending dragon". Administratively, the bay belongs to Ha Long City, Cam Pha City, and is a part of Van Don District. The bay features thousands of limestone karsts and isles in various shapes and sizes. Ha Long Bay is a center of a larger zone which includes Bai Tu Long Bay to the northeast, and Cat Ba Island to the southwest. These larger zones share a similar geological, geographical, geomorphological, climate, and cultural characters.

Ha Long Bay has an area of around 1,553 km² (600 sq mi), including 1,960–2,000 islets, most of which are limestone. The core of the bay has an area of 334 km² (129 sq mi) with a high density of 775 islets. The limestone in this bay has gone through 500 million years of formation in different conditions and environments. The evolution of the karst in this bay has taken 20 million years under the impact of the tropical wet climate. The geo-diversity of the environment in the area has created biodiversity, including a tropical evergreen biosystem, oceanic and sea shore biosystem. Ha Long Bay is home to 14 endemic floral species and 60 endemic faunal species.

Historical research surveys have shown the presence of prehistoric human beings in this area tens of thousands years ago. The successive ancient cultures are the Soi Nhu culture around 18,000–7000 BC, the Cai Beo culture 7000–5000 BC and the Ha Long culture 5,000–3,500 years ago. Ha Long Bay also marked important events in the history of Vietnam with many artifacts found in Bai Tho Mountain, Dau Go Cave, Bai Chay.

500 years ago, Nguyen Trai praised the beauty of Ha Long Bay in his verse Lộ nhập Vân Đồn, in which he called it "rock wonder in the sky". In 1962, the Ministry of Culture, Sports and Tourism of North Vietnam listed Ha Long Bay in the National Relics and Landscapes publication. In 1994, the core zone of Ha Long Bay was listed as a World Heritage Site according to Criterion VII, and listed for a second time according to Criterion VIII.

“THE SEVEN NEW WONDERS OF THE WORLD”

01. CHICHÉN ITZÁ

Mexico

Chichen Itza was a Mayan city on the Yucatan Peninsula in Mexico. Although it’s an important tourist attraction, Chichen Itza also remains an active archeological site. New discoveries are still being unearthed in the area, providing even more insight into the culture and accomplishments of the Mayan people, who ruled much of present-day Mexico and Central America prior to the arrival of European colonists. Chichen Itza was named a UNESCO World Heritage Site in 1988 and, in 2007, it was voted in a global survey as one of the New Seven Wonders of the World.

Chichen Itza was a large pre-Columbian city built by the Maya people of the Terminal Classic period. The archaeological site is located in Tinúm Municipality, Yucatán State, Mexico.

Chichen Itza was a major focal point in the Northern Maya Lowlands from the Late Classic (c. AD 600–900) through the Terminal Classic (c. AD 800–900) and into the early portion of the Post classic period (c. AD 900–1200). The site exhibits a multitude of architectural styles, reminiscent of styles seen in central Mexico and of the Puuc and Chenes styles of the Northern Maya lowlands. The presence of central Mexican styles was once thought to have been representative of direct migration or even conquest from central Mexico, but most contemporary interpretations view the presence of these non-Maya styles more as the result of cultural diffusion.

Chichen Itza was one of the largest Maya cities and it was likely to have been one of the mythical great cities, or Tollans, referred to in later Mesoamerican literature. The city may have had the most diverse population in the Maya world, a factor that could have contributed to the variety of architectural styles at the site.

The ruins of Chichen Itza are federal property, and the site’s stewardship is maintained by Mexico’s Institute Nacional de Antropología e Historia (National Institute of Anthropology and History). The land under the monuments had been privately owned until 29 March 2010, when it was purchased by the state of Yucatán.

Chichen Itza is one of the most visited archaeological sites in Mexico with over 2.6 million tourists in 2017.

***
The Great Wall of China is an ancient series of walls and fortifications, totaling more than 13,000 miles in length, located in northern China. Perhaps the most recognizable symbol of China and its long and vivid history, the Great Wall was originally conceived by Emperor Qin Shi Huang in the third century B.C. as a means of preventing incursions from barbarian nomads. The best-known and best-preserved section of the Great Wall was built in the 14th through 17th centuries A.D., during the Ming dynasty. Though the Great Wall never effectively prevented invaders from entering China, it came to function as a powerful symbol of Chinese civilization’s enduring strength.

The history of the Great Wall of China began when fortifications built by various states during the Spring and Autumn (771–476 BC) and Warring States periods (475–221 BC) were connected by the first emperor of China, Qin Shi Huang, to protect his newly founded Qin dynasty (221–206 BC) against incursions by nomads from Inner Asia. The walls were built of rammed earth, constructed using forced labour, and by 212 BC ran from Gansu to the coast of southern Manchuria.

Later dynasties adopted different policies towards northern frontier defense. The Han (202 BC – 220 AD), the Northern Qi (550–574), the Sui (589–618), and particularly the Ming (1369–1644) were among those that rebuilt, re-manned, and expanded the Walls, although they rarely followed Qin’s routes. The Han extended the fortifications furthest to the west, the Qi built about 1,600 kilometres (990 mi) of new walls, while the Sui mobilised over a million men in their wall-building efforts. Conversely, the Tang (618–907), the Song (960–1279), the Yuan (1271–1368), and the Qing (1644–1911) mostly did not build frontier walls, instead opting for other solutions to the Inner Asian threat like military campaigning and diplomacy.

Although a useful deterrent against raids, at several points throughout its history the Great Wall failed to stop enemies, including in 1644 when the Manchu Qing marched through the gates of Shanhai Pass and replaced the most ardent of the wall-building dynasties, the Ming, as rulers of China.

The Great Wall of China visible today largely dates from the Ming dynasty, as they rebuilt much of the wall in stone and brick, often extending its line through challenging terrain. Some sections remain in relatively good condition or have been renovated, while others have been damaged or destroyed for ideological reasons, deconstructed for their building materials, or lost due to the ravages of time. For long an object of fascination for foreigners, the wall is now a revered national symbol and a popular tourist destination.

Update: 2019
03. COLOSSEUM

Rome, Italy

Located just east of the Roman Forum, the massive stone amphitheater known as the Colosseum was commissioned around A.D. 70-72 by Emperor Vespasian of the Flavian dynasty as a gift to the Roman people. In A.D. 80, Vespasian’s son Titus opened the Colosseum—officially known as the Flavian Amphitheater—with 100 days of games, including gladiatorial combats and wild animal fights. After four centuries of active use, the magnificent arena fell into neglect, and up until the 18th century it was used as a source of building materials. Though two-thirds of the original Colosseum has been destroyed over time, the amphitheater remains a popular tourist destination, as well as an iconic symbol of Rome and its long, tumultuous history.

The Colosseum or Coliseum (/kəˈloʊsiːəm/ or koʊ-SEE-əm), also known as the Flavian Amphitheatre (Latin: Amphitheatrum Flavium; Italian: Anfiteatro Flavio or Colosseo), is an oval amphitheatre in the centre of the city of Rome, Italy. Built of travertine, tuff, and brick-faced concrete, it is the largest amphitheatre ever built. The Colosseum is situated just east of the Roman Forum. Construction began under the emperor Vespasian in AD 72, and was completed in AD 80 under his successor and heir Titus. Further modifications were made during the reign of Domitian (81–96). These three emperors are known as the Flavian dynasty, and the amphitheatre was named in Latin for its association with their family name (Flavius).

The Colosseum could hold, it is estimated, between 50,000 and 80,000 spectators, having an average audience of some 65,000; it was used for gladiatorial contests and public spectacles such as mock sea battles (for only a short time as the hypogeum was soon filled in with mechanisms to support the other activities), animal hunts, executions, re-enactments of famous battles, and dramas based on Classical mythology. The building ceased to be used for entertainment in the early medieval era. It was later reused for such purposes as housing, workshops, quarters for a religious order, a fortress, a quarry, and a Christian shrine.

Although partially ruined because of damage caused by earthquakes and stone-robbers, the Colosseum is still an iconic symbol of Imperial Rome and is listed as one of the New 7 Wonders of the World. It is one of Rome's most popular tourist attractions and also has links to the Roman Catholic Church, as each Good Friday the Pope leads a torchlit "Way of the Cross" procession that starts in the area around the Colosseum.

***
Cusco Region, Peru

Tucked away in the rocky countryside northwest of Cuzco, Peru, Machu Picchu is believed to have been a royal estate or sacred religious site for Inca leaders, whose civilization was virtually wiped out by Spanish invaders in the 16th century. For hundreds of years, until the American archaeologist Hiram Bingham stumbled upon it in 1911, the abandoned citadel’s existence was a secret known only to peasants living in the region. The site stretches over an impressive 5-mile distance, featuring more than 3,000 stone steps that link its many different levels. Today, hundreds of thousands of people tramp through Machu Picchu every year, braving crowds and landslides to see the sun set over its towering stone monuments and marvel at the mysterious splendor of one of the world’s most famous manmade wonders.

Machu Picchu (English: /ˈmɑːtʃuːˈpiːktʃu:/ or /ˈpiːtʃuː/, Spanish: [ˈmatʃuˈpi(k)tʃu], Quechua: Machu Pikchu [ˈmatʃʊˈpɪktʃʊ]) is a 15th-century Inca citadel, located in the Eastern Cordillera of southern Peru, on a mountain ridge 2,430 metres (7,970 ft) above sea level. It is located in the Cusco Region, Urubamba Province, Machupicchu District in Peru, above the Sacred Valley, which is 80 kilometres (50 mi) northwest of Cuzco and through which the Urubamba River flows, cutting through the Cordillera and creating a canyon with a tropical mountain climate.

Most archaeologists believe that Machu Picchu was constructed as an estate for the Inca emperor Pachacuti (1438–1472). Often mistakenly referred to as the "Lost City of the Incas" (a title more accurately applied to Vilcabamba), it is the most familiar icon of Inca civilization. The Incas built the estate around 1450 but abandoned it a century later at the time of the Spanish Conquest. Although known locally, it was not known to the Spanish during the colonial period and remained unknown to the outside world until American historian Hiram Bingham brought it to international attention in 1911.

Machu Picchu was built in the classical Inca style, with polished dry-stone walls. Its three primary structures are the Intihuatana, the Temple of the Sun, and the Room of the Three Windows. Most of the outlying buildings have been reconstructed in order to give tourists a better idea of how they originally appeared. By 1976, thirty percent of Machu Picchu had been restored and restoration continues.

Machu Picchu was declared a Peruvian Historic Sanctuary in 1981 and a UNESCO World Heritage Site in 1983. In 2007, Machu Picchu was voted one of the New Seven Wonders of the World in a worldwide Internet poll.

05. PETRA

Ma’an Governorate, Jordan

Petra is an ancient city that lies in present-day Jordan and dates back to the fourth century B.C. Ruins of the once-great metropolis and trading center now serve as an important archeologic site and tourist attraction.

Petra (Arabic: ﺍٰﻟْبَتْرَاء, translit. Al-Batrāʾ; Ancient Greek: Πέτρα), originally known to its inhabitants as Raqmu, is a historical and archaeological city in southern Jordan. Petra lies on the slope of Jabal Al-Madbah in a basin among the mountains which form the eastern flank of the Arabah valley that runs from the Dead Sea to the Gulf of Aqaba. Petra is believed to have been settled as early as 9,000 BC, and it was possibly established in the 4th century BC as the capital city of the Nabataean Kingdom. The Nabataeans were nomadic Arabs who invested in Petra’s proximity to the trade routes by establishing it as a major regional trading hub.

The trading business gained the Nabataeans considerable revenue and Petra became the focus of their wealth. The earliest historical reference to Petra was an attack to the city ordered by Antigonus I in 312 BC recorded by various Greek historians. The Nabataeans were, unlike their enemies, accustomed to living in the barren deserts, and were able to repel attacks by utilizing the area’s mountainous terrain. They were particularly skillful in harvesting rainwater, agriculture and stone carving. Petra flourished in the 1st century AD when its famous Khazneh structure – believed to be the mausoleum of Nabataean King Aretas IV – was constructed, and its population peaked at an estimated 20,000 inhabitants.

Although the Nabataean Kingdom became a client state for the Roman Empire in the first century BC, it was only in 106 AD that they lost their independence. Petra fell to the Romans, who annexed and renamed Nabataea to Arabia Petraea. Petra’s importance declined as sea trade routes emerged, and after a 363 earthquake destroyed many structures. The Byzantine Era witnessed the construction of several Christian churches, but the city continued to decline, and by the early Islamic era became an abandoned place where only a handful of nomads lived. It remained unknown to the world until it was rediscovered in 1812 by Johann Ludwig Burckhardt.

The city is accessed through a 1.2-kilometre-long (0.75 mi) gorge called the Siq, which leads directly to the Khazneh. Famous for its rock-cut architecture and water conduit system, Petra is also called the Rose City due to the color of the stone out of which it is carved. It has been a UNESCO World Heritage Site since 1985. UNESCO has described it as "one of the most precious cultural properties of man’s cultural heritage". In 2007, Al-Khazneh was voted in as one of the New7Wonders of the World. Petra is a symbol of Jordan, as well as Jordan's most-visited tourist attraction. Tourist numbers peaked at 1 million in 2010; the following period witnessed a slump due to instability around Jordan. However, tourist numbers have picked up recently, and around 800,000 tourists visited the site in 2018.

06. CHRIST THE REDEEMER

Christ the Redeemer (Portuguese: Cristo Redentor, standard Brazilian Portuguese: [ˈkɾiʃtu ʁedẽˈtoɾ], local pronunciation: [ˈkɾiʃtu xe̞dẽˈtoh]) is an Art Deco statue of Jesus Christ in Rio de Janeiro, Brazil, created by French sculptor Paul Landowski and built by Brazilian engineer Heitor da Silva Costa, in collaboration with French engineer Albert Caquot. Romanian sculptor Gheorghe Leonida fashioned the face. Constructed between 1922 and 1931, the statue is 30 metres (98 ft) high, excluding its 8-metre (26 ft) pedestal. The arms stretch 28 metres (92 ft) wide.

The statue weighs 635 metric tons (625 long, 700 short tons), and is located at the peak of the 700-metre (2,300 ft) Corcovado mountain in the Tijuca Forest National Park overlooking the city of Rio de Janeiro. A symbol of Christianity across the world, the statue has also become a cultural icon of both Rio de Janeiro and Brazil, and is listed as one of the New7Wonders of the World. It is made of reinforced concrete and soapstone.

07. **TAJ MAHAL**

Agra & Uttar Pradesh, India

The **Taj Mahal** (/ˌtɑːdʒ məˈhɑːl, ˌtɑːʒ-/; Hindi: ताज महल [taːdʒ ˈmɛːɦ(ə)], meaning "Crown of the Palaces") is an ivory-white marble mausoleum on the south bank of the Yamuna river in the Indian city of Agra. It was commissioned in 1632 by the Mughal emperor, Shah Jahan (reigned from 1628 to 1658), to house the tomb of his favourite wife, Mumtaz Mahal. It also houses the tomb of Shah Jahan, the builder. The tomb is the centerpiece of a 17-hectare (42-acre) complex, which includes a mosque and a guest house, and is set in formal gardens bounded on three sides by a crenellated wall.

Construction of the mausoleum was essentially completed in 1643 but work continued on other phases of the project for another 10 years. The Taj Mahal complex is believed to have been completed in its entirety in 1653 at a cost estimated at the time to be around 32 million rupees, which in 2015 would be approximately 52.8 billion rupees (U.S. $827 million). The construction project employed some 20,000 artisans under the guidance of a board of architects led by the court architect to the emperor, Ustad Ahmad Lahauri.

The Taj Mahal was designated as a UNESCO World Heritage Site in 1983 for being "the jewel of Muslim art in India and one of the universally admired masterpieces of the world's heritage". It is regarded by many as the best example of Mughal architecture and a symbol of India’s rich history. The Taj Mahal attracts 7–8 million visitors a year and in 2007, it was declared a winner of the New7Wonders of the World (2000–2007) initiative.

Chapter – 06

“The Nine New Solar Universal Wonders”

01. Earth

**Earth** is the third planet from the Sun and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth’s gravity interacts with other objects in space, especially the Sun and the Moon, Earth’s only natural satellite. Earth revolves around the Sun in 365.26 days, a period known as an Earth year. During this time, Earth rotates about its axis about 366.26 times.

Earth’s axis of rotation is tilted with respect to its orbital plane, producing seasons on Earth. The gravitational interaction between Earth and the Moon causes ocean tides, stabilizes Earth’s orientation on its axis, and gradually slows its rotation. Earth is the densest planet in the Solar System and the largest of the four terrestrial planets.

Earth’s lithosphere is divided into several rigid tectonic plates that migrate across the surface over periods of many millions of years. About 71% of Earth’s surface is covered with water, mostly by oceans. The remaining 29% is land consisting of continents and islands that together have many lakes, rivers and other sources of water that contribute to the hydrosphere. The majority of Earth’s Polar Regions are covered in ice, including the Antarctic ice sheet and the sea ice of the Arctic ice pack. Earth’s interior remains active with a solid iron inner core, a liquid outer core that generates the Earth’s magnetic field, and a convecting mantle that drives plate tectonics.

Within the first billion years of Earth's history, life appeared in the oceans and began to affect the Earth's atmosphere and surface, leading to the proliferation of aerobic and anaerobic organisms. Some geological evidence indicates that life may have arisen as much as 4.1 billion years ago. Since then, the combination of Earth’s distance from the Sun, physical properties, and geological history have allowed life to evolve and thrive. In the history of the Earth, biodiversity has gone through long periods of expansion, occasionally punctuated by mass extinction events. Over 99% of all species that ever lived on Earth are extinct. Estimates of the number of species on Earth today vary widely; most species have not been described. Over 7.6 billion humans live on Earth and depend on its biosphere and natural resources for their survival. Humans have developed diverse societies and cultures; politically, the world has about 200 sovereign states.
The Blue Marble, the first full-view photograph of the planet, was taken by Apollo 17 astronauts en route to the Moon in 1972.

02. URANUS

Uranus (from the Latin name "Ūranus" for the Greek god Oūranoς) is the seventh planet from the Sun. It has the third-largest planetary radius and fourth-largest planetary mass in the Solar System. Uranus is similar in composition to Neptune, and both have bulk chemical compositions which differ from that of the larger gas giants Jupiter and Saturn. For this reason, scientists often classify Uranus and Neptune as "ice giants" to distinguish them from the gas giants. Uranus' atmosphere is similar to Jupiter's and Saturn's in its primary composition of hydrogen and helium, but it contains more "ices" such as water, ammonia, and methane, along with traces of other hydrocarbons. It is the coldest planetary atmosphere in the Solar System, with a minimum temperature of 49 K (−224 °C; −371 °F), and has a complex, layered cloud structure with water thought to make up the lowest clouds and methane the uppermost layer of clouds. The interior of Uranus is mainly composed of ices and rock.

Like the other giant planets, Uranus has a ring system, a magnetosphere, and numerous moons. The Uranian system has a unique configuration because its axis of rotation is tilted sideways, nearly into the plane of its solar orbit. Its north and south poles, therefore, lie where most other planets have their equators. In 1986, images from Voyager 2 showed Uranus as an almost featureless planet in visible light, without the cloud bands or storms associated with the other giant planets. Observations from Earth have shown seasonal change and increased weather activity as Uranus approached its equinox in 2007. Wind speeds can reach 250 metres per second (900 km/h; 560 mph).

Uranus is the only planet whose name is derived directly from a figure from Greek mythology, from the Latinised version of the Greek god of the sky, Ouranos.

Jupiter is the fifth planet from the Sun and the largest in the Solar System. It is a gas giant with a mass one-thousandth that of the Sun, but two-and-a-half times that of all the other planets in the Solar System combined. Jupiter has been known to astronomers since antiquity. It is named after the Roman god Jupiter. When viewed from Earth, Jupiter can be bright enough for its reflected light to cast shadows, and is on average the third-brightest natural object in the night sky after the Moon and Venus.

Jupiter is primarily composed of hydrogen with a quarter of its mass being helium, though helium comprises only about a tenth of the number of molecules. It may also have a rocky core of heavier elements, but like the other giant planets, Jupiter lacks a well-defined solid surface. Because of its rapid rotation, the planet's shape is that of an oblate spheroid (it has a slight but noticeable bulge around the equator). The outer atmosphere is visibly segregated into several bands at different latitudes, resulting in turbulence and storms along their interacting boundaries. A prominent result is the Great Red Spot, a giant storm that is known to have existed since at least the 17th century when it was first seen by telescope. Surrounding Jupiter is a faint planetary ring system and a powerful magnetosphere. Jupiter has 79 known moons, including the four large Galilean moons discovered by Galileo Galilei in 1610. Ganymede, the largest of these, has a diameter greater than that of the planet Mercury.

Jupiter has been explored on several occasions by robotic spacecraft, most notably during the early Pioneer and Voyager flyby missions and later by the Galileo orbiter. In late February 2007, Jupiter was visited by the New Horizons probe, which used Jupiter's gravity to increase its speed and bend its trajectory en route to Pluto. The latest probe to visit the planet is Juno, which entered into orbit around Jupiter on July 4, 2016. Future targets for exploration in the Jupiter system include the probable ice-covered liquid ocean of its moon Europa.

Update: 2019

***
Mars is the fourth planet from the Sun and the second-smallest planet in the Solar System after Mercury. In English, Mars carries a name of the Roman god of war, and is often referred to as the "Red Planet" because the reddish iron oxide prevalent on its surface gives it a reddish appearance that is distinctive among the astronomical bodies visible to the naked eye. Mars is a terrestrial planet with a thin atmosphere, having surface features reminiscent both of the impact craters of the Moon and the valleys, deserts, and polar ice caps of Earth.

The rotational period and seasonal cycles of Mars are likewise similar to those of Earth, as is the tilt that produces the seasons. Mars is the site of Olympus Mons, the largest volcano and second-highest known mountain in the Solar System, and of Valles Marineris, one of the largest canyons in the Solar System. The smooth Borealis basin in the northern hemisphere covers 40% of the planet and may be a giant impact feature. Mars has two moons, Phobos and Deimos, which are small and irregularly shaped. These may be captured asteroids, similar to 5261 Eureka, a Mars trojan.

There are ongoing investigations assessing the past habitability potential of Mars, as well as the possibility of extant life. Future astrobiology missions are planned, including the Mars 2020 and ExoMars rovers. Liquid water cannot exist on the surface of Mars due to low atmospheric pressure, which is less than 1% of the Earth's, except at the lowest elevations for short periods. The two polar ice caps appear to be made largely of water. The volume of water ice in the south polar ice cap, if melted, would be sufficient to cover the entire planetary surface to a depth of 11 meters (36 ft). In November 2016, NASA reported finding a large amount of underground ice in the Utopia Planitia region of Mars. The volume of water detected has been estimated to be equivalent to the volume of water in Lake Superior.

Mars can easily be seen from Earth with the naked eye, as can its reddish coloring. Its apparent magnitude reaches −2.94, which is surpassed only by Jupiter, Venus, the Moon, and the Sun. Optical ground-based telescopes are typically limited to resolving features about 300 kilometers (190 mi) across when Earth and Mars are closest because of Earth's atmosphere.

Mercury is the smallest and innermost planet in the Solar System. Its orbital period around the Sun of 87.97 days is the shortest of all the planets in the Solar System. It is named after the Roman deity Mercury, the messenger of the gods.

Like Venus, Mercury orbits the Sun within Earth’s orbit as an inferior planet, and never exceeds 28° away from the Sun when viewed from Earth. This proximity to the Sun means the planet can only be seen near the western or eastern horizon during the early evening or early morning. At this time it may appear as a bright star-like object, but is often far more difficult to observe than Venus. The planet telescopically displays the complete range of phases, similar to Venus and the Moon, as it moves in its inner orbit relative to Earth, which reoccurs over the so-called synodic period approximately every 116 days.

Mercury is tidally locked with the Sun in a 3:2 spin-orbit resonance, and rotates in a way that is unique in the Solar System. As seen relative to the fixed stars, it rotates on its axis exactly three times for every two revolutions it makes around the Sun. As seen from the Sun, in a frame of reference that rotates with the orbital motion, it appears to rotate only once every two Mercurian years. An observer on Mercury would therefore see only one day every two Mercurian years.

Mercury’s axis has the smallest tilt of any of the Solar System’s planets (about $\frac{1}{30}$ degree). Its orbital eccentricity is the largest of all known planets in the Solar System; at perihelion, Mercury’s distance from the Sun is only about two-thirds (or 66%) of its distance at aphelion. Mercury’s surface appears heavily cratered and is similar in appearance to the Moon’s, indicating that it has been geologically inactive for billions of years. Having almost no atmosphere to retain heat, it has surface temperatures that vary diurnally more than on any other planet in the Solar System, ranging from 100 K ($-173 °C; -280 °F$) at night to 700 K (427 °C; 800 °F) during the day across the equatorial regions. The polar regions are constantly below 180 K ($-93 °C; -136 °F$). The planet has no known natural satellites.

Two spacecraft have visited Mercury: Mariner 10 flew by in 1974 and 1975; and MESSENGER, launched in 2004, orbited Mercury over 4,000 times in four years before exhausting its fuel and crashing into the planet’s surface on April 30, 2015. The BepiColombo spacecraft is planned to arrive at Mercury in 2025.

Neptune is the eighth and farthest known planet from the Sun in the Solar System. In the Solar System, it is the fourth-largest planet by diameter, the third-most-massive planet, and the densest giant planet. Neptune is 17 times the mass of Earth, slightly more massive than its near-twin Uranus. Neptune is denser and physically smaller than Uranus because its greater mass causes more gravitational compression of its atmosphere. Neptune orbits the Sun once every 164.8 years at an average distance of 30.1 AU (4.5 billion km). It is named after the Roman god of the sea and has the astronomical symbol ♇, a stylised version of the god Neptune's trident.

Neptune is not visible to the unaided eye and is the only planet in the Solar System found by mathematical prediction rather than by empirical observation. Unexpected changes in the orbit of Uranus led Alexis Bouvard to deduce that its orbit was subject to gravitational perturbation by an unknown planet. Neptune was subsequently observed with a telescope on 23 September 1846 by Johann Galle within a degree of the position predicted by Urbain Le Verrier. Its largest moon, Triton, was discovered shortly thereafter, though none of the planet's remaining known 13 moons were located telescopically until the 20th century. The planet's distance from Earth gives it a very small apparent size, making it challenging to study with Earth-based telescopes. Neptune was visited by Voyager 2, when it flew by the planet on 25 August 1989. The advent of the Hubble Space Telescope and large ground-based telescopes with adaptive optics has recently allowed for additional detailed observations from afar.

Like Jupiter and Saturn, Neptune's atmosphere is composed primarily of hydrogen and helium, along with traces of hydrocarbons and possibly nitrogen, though it contains a higher proportion of "ices" such as water, ammonia, and methane. However, similar to Uranus, its interior is primarily composed of ices and rock; Uranus and Neptune are normally considered "ice giants" to emphasise this distinction. Traces of methane in the outermost regions in part account for the planet's blue appearance.

In contrast to the hazy, relatively featureless atmosphere of Uranus, Neptune's atmosphere has active and visible weather patterns. For example, at the time of the Voyager 2 flyby in 1989, the planet's southern hemisphere had a Great Dark Spot comparable to the Great Red Spot on Jupiter. These weather patterns are driven by the strongest sustained winds of any planet in the Solar System, with recorded wind speeds as high as 2,100 km/h (580 m/s; 1,300 mph). Because of its great distance from the Sun, Neptune's outer atmosphere is one of the coldest places in the Solar System, with temperatures at its cloud tops approaching 55 K (−218 °C; −361 °F). Temperatures at the planet's centre are approximately 5,400 K (5,100 °C; 9,300 °F). Neptune has a faint and fragmented ring system (labelled "arcs"), which was discovered in 1984, then later confirmed by Voyager 2.
The **Great Dark Spot** and its companion bright smudge; on the west limb the fast moving bright feature called Scooter and the little dark spot are visible.

Pluto (minor planet designation: 134340 Pluto) is a dwarf planet in the Kuiper belt, a ring of bodies beyond Neptune. It was the first Kuiper belt object to be discovered and is the largest known plutoi (or ice dwarf).

Pluto was discovered by Clyde Tombaugh in 1930 and was originally considered to be the ninth planet from the Sun. After 1992, its status as a planet was questioned following the discovery of several objects of similar size in the Kuiper belt. In 2005, Eris, a dwarf planet in the scattered disc which is 27% more massive than Pluto, was discovered. This led the International Astronomical Union (IAU) to define the term "planet" formally in 2006, during their 26th General Assembly. That definition excluded Pluto and reclassified it as a dwarf planet.

Pluto is the largest and second-most-massive (after Eris) known dwarf planet in the Solar System, and the ninth-largest and tenth-most-massive known object directly orbiting the Sun. It is the largest known trans-Neptunian object by volume but is less massive than Eris. Like other Kuiper belt objects, Pluto is primarily made of ice and rock and is relatively small—about one-sixth the mass of the Moon and one-third its volume. It has a moderately eccentric and inclined orbit during which it ranges from 30 to 49 astronomical units or AU (4.4–7.4 billion km) from the Sun. This means that Pluto periodically comes closer to the Sun than Neptune, but a stable orbital resonance with Neptune prevents them from colliding. Light from the Sun takes about 5.5 hours to reach Pluto at its average distance (39.5 AU).

Pluto has five known moons: Charon (the largest, with a diameter just over half that of Pluto), Styx, Nix, Kerberos, and Hydra. Pluto and Charon are sometimes considered a binary system because the barycenter of their orbits does not lie within either body.

The New Horizons spacecraft performed a flyby of Pluto on July 14, 2015, becoming the first ever spacecraft to do so. During its brief flyby, New Horizons made detailed measurements and observations of Pluto and its moons. In September 2016, astronomers announced that the reddish-brown cap of the north pole of Charon is composed of tholins, organicmacromolecules that may be ingredients for the emergence of life, and produced from methane, nitrogen and other gases released from the atmosphere of Pluto and transferred about 19,000 km (12,000 mi) to the orbiting moon.

07. SATURN

Saturn is the sixth planet from the Sun and the second-largest in the Solar System, after Jupiter. It is a gas giant with an average radius about nine times that of Earth.\[13\] It has only one-eighth the average density of Earth, but with its larger volume Saturn is over 95 times more massive. Saturn is named after the Roman god of agriculture; its astronomical symbol (♄) represents the god’s sickle.

Saturn’s interior is probably composed of a core of iron–nickel and rock (silicon and oxygen compounds). This core is surrounded by a deep layer of metallic hydrogen, an intermediate layer of liquid hydrogen and liquid helium, and finally a gaseous outer layer. Saturn has a pale yellow hue due to ammonia crystals in its upper atmosphere. Electrical current within the metallic hydrogen layer is thought to give rise to Saturn’s planetary magnetic field, which is weaker than Earth’s, but has a magnetic moment 580 times that of Earth due to Saturn’s larger size. Saturn’s magnetic field strength is around one-twentieth of Jupiter’s. The outer atmosphere is generally bland and lacking in contrast, although long-lived features can appear. Wind speeds on Saturn can reach 1,800 km/h (1,100 mph; 500 m/s), higher than on Jupiter, but not as high as those on Neptune. In January 2019, astronomers reported that a day on the planet Saturn has been determined to be $10^{h} 33^{m} 38.5^{s} + 1.52^{s}$, based on studies of the planet’s C Ring.

The planet’s most famous feature is its prominent ring system that is composed mostly of ice particles, with a smaller amount of rocky debris and dust. At least 62 moons are known to orbit Saturn, of which 53 are officially named. This does not include the hundreds of moonlets in the rings. Titan, Saturn’s largest moon, and the second-largest in the Solar System, is larger than the planet Mercury, although less massive, and is the only moon in the Solar System to have a substantial atmosphere.
Saturn

Pictured in natural color approaching equinox, photographed by Cassini in July 2008; the dot in the bottom left corner is Titan

The **Sun** is the star at the center of the Solar System. It is a nearly perfect sphere of hot plasma, with internal convective motion that generates a magnetic field via a dynamo process. It is by far the most important source of energy for life on Earth. Its diameter is about 1.39 million kilometers (864,000 miles), or 109 times that of Earth, and its mass is about 330,000 times that of Earth. It accounts for about 99.86% of the total mass of the Solar System. Roughly three quarters of the Sun’s mass consists of hydrogen (~73%); the rest is mostly helium (~25%), with much smaller quantities of heavier elements, including oxygen, carbon, neon, and iron.[19]

The Sun is a G-type main-sequence star (G2V) based on its spectral class. As such, it is informally and not completely accurately referred to as a yellow dwarf (its light is closer to white than yellow). It formed approximately 4.6 billion years ago from the gravitational collapse of matter within a region of a large molecular cloud. Most of this matter gathered in the center, whereas the rest flattened into an orbiting disk that became the Solar System. The central mass became so hot and dense that it eventually initiated nuclear fusion in its core. It is thought that almost all stars form by this process.

The Sun is roughly middle-aged; it has not changed dramatically for more than four billion years, and will remain fairly stable for more than another five billion years. It currently fuses about 600 million tons of hydrogen into helium every second, converting 4 million tons of matter into energy every second as a result. This energy, which can take between 10,000 and 170,000 years to escape from its core, is the source of the Sun’s light and heat. In about 5 billion years, when hydrogen fusion in its core has diminished to the point at which the Sun is no longer in hydrostatic equilibrium, its core will undergo a marked increase in density and temperature while its outer layers expand to eventually become a red giant. It is calculated that the Sun will become sufficiently large to engulf the current orbits of Mercury and Venus, and render Earth uninhabitable. After this, it will shed its outer layers and become a dense type of cooling star known as a white dwarf, and no longer produce energy by fusion, but still glow and give off heat from its previous fusion.

The enormous effect of the Sun on Earth has been recognized since prehistoric times, and the Sun has been regarded by some cultures as a deity. The synodic rotation of Earth and its orbit around the Sun are the basis of solar calendars, one of which is the predominant calendar in use today.
Sun with sunspots and limb darkening as seen in visible light with solar filter.

Venus is the second planet from the Sun, orbiting it every 224.7 Earth days. It has the longest rotation period (243 days) of any planet in the Solar System and rotates in the opposite direction to most other planets (meaning the Sun rises in the west and sets in the east). It does not have any natural satellites. It is named after the Roman goddess of love and beauty. It is the second-brightest natural object in the night sky after the Moon, reaching an apparent magnitude of ~4.6 – bright enough to cast shadows at night and, rarely, visible to the naked eye in broad daylight. Orbiting within Earth’s orbit, Venus is an inferior planet and never appears to venture far from the Sun; its maximum angular distance from the Sun (elongation) is 47.8°.

Venus is a terrestrial planet and is sometimes called Earth’s "sister planet" because of their similar size, mass, proximity to the Sun, and bulk composition. It is radically different from Earth in other respects. It has the densest atmosphere of the four terrestrial planets, consisting of more than 96% carbon dioxide. The atmospheric pressure at the planet's surface is 92 times that of Earth, or roughly the pressure found 900 m (3,000 ft) underwater on Earth. Venus is by far the hottest planet in the Solar System, with a mean surface temperature of 735 K (462 °C; 863 °F), even though Mercury is closer to the Sun. Venus is shrouded by an opaque layer of highly reflective clouds of sulfuric acid, preventing its surface from being seen from space in visible light. It may have had water oceans in the past, but these would have vaporized as the temperature rose due to a runaway greenhouse effect. The water has probably photodissociated, and the free hydrogen has been swept into interplanetary space by the solar wind because...
of the lack of a planetary magnetic field. Venus's surface is a dry desertscape interspersed with slab-like rocks and is periodically resurfaced by volcanism.

As one of the brightest objects in the sky, Venus has been a major fixture in human culture for as long as records have existed. It has been made sacred to gods of many cultures, and has been a prime inspiration for writers and poets as the morning star and evening star. Venus was the first planet to have its motions plotted across the sky, as early as the second millennium BC.

As the planet with the closest approach to Earth, Venus has been a prime target for early interplanetary exploration. It was the first planet beyond Earth visited by a spacecraft (Mariner 2 in 1962), and the first to be successfully landed on (by Venera 7 in 1970). Venus's thick clouds render observation of its surface impossible in visible light, and the first detailed maps did not emerge until the arrival of the Magellan orbiter in 1991. Plans have been proposed for rovers or more complex missions, but they are hindered by Venus's hostile surface conditions.

Venus

A real-colour image taken by Mariner 10 processed from two filters, the surface is obscured by thick sulfuric acid clouds

1. Defining the rotation as retrograde, as done by NASA space missions and the USGS, puts Ishtar Terra in the northern hemisphere and makes the axial tilt 2.64°. Following the right-hand rule for prograde rotation puts Ishtar Terra in the southern hemisphere and makes the axial tilt 177.36°.

Year – 2019

Finally, it was declared a winner of the New 08th Macrocosm Wonder of the World (2018-19) initiative.

“ADDITIONAL TERMS AND INFORMATION”

- No fake Evidence, fake arguments "AOWWME" does not acceptable. Because 'AOWWME' organization is a special part of the universe.
- The World Record at any International Level of such Things or Record Title must be recorded before any wonder. Process must be taken up for aftermarket historical.
- World Records Organization is a Wonder Process and must be patented by the World Record Organization at Least 5 or More Organizations.
- Means Wonder is not attached to any organization or organization for selfish purposes. Moreover, it should be viewed as a center point in the world. And with all kinds of convenience to become a tourist place.
- Do not look at any of these benefits at this stage.
- Our Export Team reviews natures, small tourist locations, temples, empire building, rivers, and make the after spot verification of the result.
- 1. If your 1000 world records get passed then surely that will become wonder.
  - If your 1000 world records get passed then definitely that will become wonder.
  - To become wonder you should have strong witness, audience observance letters also you should have collect witness certificates.
  - If anybody makes 1000 world records in mass that will not be considered as wonder.
- To become a wonder you should also have an organization or company you should have established.
- The above organization or company should have minimum 200 employees.
- Among the employees of the company a minimum of 200 employees should have given recommendation letters.
- The wonder should be permanent variable, measurable and qualitable.
- Above 1000 world records must contain many amazing things.
- All records will not become wonders. Should have made 200 employees and some audience observation of 1000 world records which are measurable such records will be accepted as wonders.
- You have to use all types of witness forms which are given in SWR. You should keep all your witness forms dually filled and exhibit in your website.
- There are ways to accept as wonder in the following areas e.g. Ancient subject, or new modern subject, cultural activities achieve, love subject, civil architectures and any other subject.
- If the total world records should be more than 1000 not even single world record is please it will not be taken to for consideration as wonder.
- If your world records to be considered as wonder you should follow SWR guidance and should use them. And all the parts should be tested before processing completely.
- All evidences should be true and not fake. These witnesses’ forms or recommendation letters of employees and audience should have been approved by notary affidavit.
- Your achievements made doesn’t have notary affidavit then they will lose waitage and you will not be considered for wonder.
- You have to write a mini note of about hundred pages covering all the information regarding wonder.
- This should have comments, likes by schools, colleges, trust, societies, NPO, NGO’s and other some audience opinion for recommending about wonder.
- At least 1000 people should make like, comments about your wonder things. But it’s should not have been published in social media.
One of your nearby villagers should have made likes and recommendations about the achievement of wonder.

Your wonder should be big and special similar to established company which is also big and special.

Every employee's must have recommended your wonder with a signature and stamp. The stamp should be in the name of employee who puts his signature.

Your website should contain special page showing the wonder and have the highlighted recommendation letters and wonder things.

- This media always gives answers to the third party cues for any obstacles. And, all of them, such as fine particles, ideas, and words, are in such a good way.

- Nothing can be done against the section here. Because it's a law.

- There is nothing more. Because it is a famous reflection of the world. Specially, these issues do not require much conditioning and terminology.

By: Sarahu and Our Management Team

★★★
"About us"

There is a special here. Here is a special care. Special care means our organization is writing a new preface here in the Universe through a new search. Sarahu did not just set up all its kind of foundations here for selfishness. Sarahu did not count on her wonders here and did not try for the fame at the World or in the Universe. Sarahu built this media together with the Universe Foundation to remain a mark in the People's Heart as an index.

Our web portal should always be the same as a Wonder Thousands of World Records. And if Thousands of World Records are a wonder then the Universe Wonder to arise when such things are and at the first five wonders.

Sarahu Nagarazan

Founder, Chief Editor, MD and CEO

Neither I nor myself, nor the management directors of our organization, have ever intended to have any of our own goodies in our organization's mission. Most of the time I look at this world in wonders just for the world, when I have discovered the wonders in the Universe, I feel like I'm not going to throw out new talents to such an unprecedented work. This work affects my childhood life. This dream has come to a close since recently.

Netar. G:

Managing Director and Sub Editor

I had a lot of dreams in my childhood life. Life was chased by the climate of the world, quite a bit. As I chase life with the world's climate, the childhood boyfriend who grew up with me in my family, the son of the uncle, was watching his
mind and creativity in his mind. I was a little motivated to his dreams. But not the perfect motivation. But then the time for his feats was very low; did not God Get Grace? But Sarah is a Divine Man. He is the source of God. Sarahu Universe is one of those moments’ dreams.

Anand D.G
Managing Director and Chief Press,

If we look at our Uncle Sarahu's writing and writing system and the New World Records achievement, I think the Universe should not be so spectacular that the world is just wonderful. Yes, his achievements are not always wound up. With his Universe brilliant mind, there are many other types of this kind that can only be in the Universe in our world. It may be alien planet creatures. In such a line Sarahu is also an alien planet creature. But we cannot measure his art with modest power.

Right, Sarahu Universe is not the one I need to conjure up to be a Universe wonderful person. Because the truth is, the world is clear. Or like him, if we have all kinds of types in our world, we'll be able to make the Universe wonderful.
