Vidhyaashram First Grade College Mysore, India

Abstract

Around 10000 years ago, the proto-agricultural practices of our intelligent ancestors developed into the primary fixed agrarian settlements. The planning of labor changed radically at this time. Labor on the land became organized around collective tasks linked with the cycles of the seasons—agriculture and animal husbandry—and around tasks related to the establishment, maintenance, and growth of fixed settlements. However, it's within the nineteenth century within the ranks of the military first, and therefore the offices needed to manage large empires and kingdoms, that a replacement concept starts appearing on the scene. It’s challenging to search out a precise moment when Work became a job. Change is the only constant. The identical thing is applicable to jobs, especially within the coming years.

Over centuries, immeasurable job opportunities have inherent existence and countless jobs have faded into nothingness. In 2020, pandemic—millions of people across the world have suffered and their jobs have been taken away. And now, everyone seems to be worried about the long run, especially the upcoming generation. The pandemic has changed the face of the schools, colleges, institutions, employment sector, restaurants, and other businesses. Many more businesses in the list which has shut down completely, most popular jobs have become redundant, and what not! Technology and intelligence have become more focused. During this light, new career opportunities are supposed to rise within the future. In this article, I will speak about the seven most profitable jobs in 2022. Be careful for them so you will be able to earn more money than you have ever imagined.

Keywords: Popular Jobs, Vacancy, Best Career, more salary, Work, work condition, less stress job.

Introduction

In the most primitive stages of human civilization, work was confined to simple responsibilities involving the foremost basic of human needs: food, clothing, child care, and shelter. A division of labor likely resulted when some characters showed ability, particularly in tasks, like hunting animals or gathering plants for food. As a way of the food supply, prehistoric peoples could organize the work of scavenging and hunting and, later, agriculture. Initially, there was no widespread geographic division of labor, however, because populations were very thin and isolated. The uncertain availability of food allowed little excess for exchange, and there have been few contacts with groups in several places which helped them in obtaining different foods and other essentials. The overwhelming majority of the world’s population was engaged in farming but sadly we saw a
tremendous change at the beginning of the 19th century where industrial employment took primacy over agricultural work in many countries across the world.

By the 21st century, the service sector had come to represent the fastest-growing area, as well as the economy of one country, became stronger day by day. Which resulted in the increase of the workforce within the world’s most advanced economies. In the United States and other developing countries, as an example, the number of individuals engaged in service occupations in the 1950s already exceeded the number of those employed in industry, and also the proportion increased thereafter with the rapid change in technology and intelligence.

REVIEW OF LITERATURE

The quality and quantity of domestic servants declined drastically within no time in the developed nation and the concept of full-time live-in domestic help almost disappeared. On the opposite hand, the number of central and state government employees grew dramatically as government entities, from local to regional to national, took on new tasks. Slowly Public sectors were handed over to Private sectors resulting in high competition and progress.

But unfortunately, COVID-19 has given a blow to economies all around the world. Even countries like the USA, Spain, and Italy have been badly mutilated, the worst hit in America with unemployment spiking to 25%. The Pandemic has caused tremors for the Indian economy as well. Indian economy had been growing since the beginning of the 21st century and due to the pandemic, the Indian economy has been impacted adversely. Our economy was depended on four values namely manufacturing, capital flow, exports, and consumptions (Chandra, Covid-19: Rebooting the Indian Economy?, 2021).

The essential reforms are not just foreseen; they are definitely very much necessary to create a ‘New India’ thereby enabling all Indians to lead better lives as this will bring about a fundamental change for the better. The new economy should be much more equitable and should provide good jobs and opportunities for our billion-strong workforce. The new economy which we all are anticipating to create should be much more transparent, innovation driven, feasible in nature, and globally cost-competitive (Abhilash, Covid-19: Rebooting the Indian Economy?, 2021).

“A strong economy begins with a very strong government, well-educated workforce and humanity”. Development starts in mind, executed on society and triumphs over the globe. The competitive world demands the epiphany of development in every stature (Chandra, Nicaragua- The Dawn of New City of Progress, 2018).

BEST CAREER OPTIONS IN 2022

1. **Dropshipping**: It is a new retail business technique where they don’t keep the products which they want to sell. They purchase the item from a 3rd party and then it will be delivered to the customer directly. Because of its unique technique, the vendor doesn’t have to handle the merchandise directly. Dropshipping is a great business model for aspirant entrepreneurs (Abhilash, THE FUTURE OF E-COMMERCE IN INDIA, 2021).
2. **Blogging:** 'Blog' and 'blogging' are now used for sharing on social media and content creation, especially shares content on regular basis, usually the content is long-form and one creates and put it on the social platform. So, one could be maintaining a blog on Instagram or Facebook. There are essentially two measures of blogging
   a) Popularity through citations.
   b) Popularity through affiliation.

In the year 2010, blogging had become such an obsession that a new blog was made every second of every minute of every hour of every day. Investigators, researchers, scholar has actively analyzed the dynamics of how blogs become popular by conducting various investigations. But frankly speaking in 21st century bloggy is considered as a very good source of income.

**Conclusion**

Over centuries, immeasurable job opportunities have inherent existence and countless jobs have faded into nothingness. In 2020, pandemic - Millions of people across the world have suffered and their jobs have been taken away. And now, everyone seems to be worried about the long run, especially the upcoming generation. Although you may think you are too young to concern about your forthcoming career opportunity, it is significant for you to start thinking about your life after high school so that you can take the necessary steps to go in any career you may choose. It can seem irresistible and tiresome to choose a career before you complete high school, but always keep in mind that it is never too late to change your career path.
