- A clear understanding of consequences of turnover allows America to know the importance of this study.

Research Methodology and database: - Type of analysis

For this purpose of study, I have adopted Descriptive analysis, which has surveys and inquiring enquiries of various sorts. The most important purpose of Descriptive analysis is that the description of the because it exists at this time. The most characteristics of this kind of analysis area unit that the investigator has no management over the variables. It will solely report what is going on or what's happening. The sample of the population is studied typically by a survey during this approach either by a form methodology or observation to work out its characteristics.

Research Instrument

The analysis instrument utilized in this study is “structured questionnaire”. Structured questionnaires area unit those during which their area unit preset queries with reference to the facet, that the investigator collects information. The queries area unit conferred with constant contents and same order to any or all respondents.
Questionnaire Design
“Questionnaire is taken into account because the heart of a survey operation”. Before finalizing the form style, a pilot study was conducted to check the questionnaires. Supported the feedback of the pilot study elaborate questionnaires with each open-ended and shut all over queries were finalized.

Data Collection:
Data refers to info or facts. It includes numerical figures, non-numerical figures, descriptive facts, and qualitative and quantitative info. The task of information assortment begins when (an analysis search an enquiry Questa pursuit probe an exploration groundwork hanta research look) drawback has been outlined and research set up has been determined. the character of (the information the info the information) is each Primary and Secondary data.

➢ Primary Data: The first information area unit people who area unit collected through form and direct personal interview. The form was framed in such a way to get correct info, hierarchical fitly for the study. All the questionnaires were collected through personal contact from the respondents.

➢ Secondary Data: Secondary information has been collected through auditory communication (through interviews). Secondary information concerning the corporate profile and alternative details were collected from the corporate web site, company documents, periodicals and magazines.

LIMITATIONS OF THE STUDY:
➢ Converting qualitative information into quantitative information might usually cause inaccurate results.
➢ The respondents might not have expressed their robust negative feelings concerning the policies which end within the error of central tendency.
➢ Few respondents were reluctant whereas respondent the queries.
➢ Getting opinion for open all over queries was found troublesome.

RETENTION INVOLVES 5 MAJOR THINGS:
1. Compensation
2. Environment
3. Growth
4. Relationship Support

EMPLOYEE RETENTION METHODS
Some of the Employee retention plans:
✓ Training and Development
✓ Employee profit Schemes
✓ Effective communication process-Outlook categorical courier.
✓ Performance Evaluation/Assessment
✓ Transparency
✓ Recognition Programs
1. Gender of the employees:

<table>
<thead>
<tr>
<th>GENDER</th>
<th>NO. OF RESPONDENTS</th>
<th>PERCENTAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>MALE</td>
<td>60</td>
<td>60%</td>
</tr>
<tr>
<td>FEMALE</td>
<td>40</td>
<td>40%</td>
</tr>
<tr>
<td>TOTAL</td>
<td>100</td>
<td>100%</td>
</tr>
</tbody>
</table>

From the table it is inferred that out of total respondents
- 60% square measure male and
- 40% square measure female.

2. Sample classification based on the age of the respondents:

<table>
<thead>
<tr>
<th>AGE</th>
<th>NO. OF RESPONDENTS</th>
<th>PERCENTAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 26</td>
<td>11</td>
<td>11%</td>
</tr>
<tr>
<td>26-35</td>
<td>23</td>
<td>23%</td>
</tr>
<tr>
<td>36-45</td>
<td>28</td>
<td>28%</td>
</tr>
<tr>
<td>Above 45</td>
<td>38</td>
<td>38%</td>
</tr>
<tr>
<td>Total</td>
<td>100</td>
<td>100%</td>
</tr>
</tbody>
</table>
From the table it is inferred that

- 11% of the respondents come back below the class but twenty six yrs.
- 23% of the respondents falls below 26-35 yrs.
- 28% you look after the respondents come back below the class of 36-45 yrs.
- 38% of the respondents square measure on top of forty five years.

3. Sample classification supported the academic qualification of the respondents:

<table>
<thead>
<tr>
<th>EDUCATION</th>
<th>NO. OF RESPONDENTS</th>
<th>PERCENTAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>10th</td>
<td>6</td>
<td>6%</td>
</tr>
<tr>
<td>12th</td>
<td>10</td>
<td>10%</td>
</tr>
<tr>
<td>Diploma</td>
<td>14</td>
<td>14%</td>
</tr>
<tr>
<td>UG</td>
<td>24</td>
<td>24%</td>
</tr>
<tr>
<td>PG</td>
<td>18</td>
<td>18%</td>
</tr>
<tr>
<td>Others</td>
<td>28</td>
<td>28%</td>
</tr>
<tr>
<td>Total</td>
<td>100</td>
<td>100%</td>
</tr>
</tbody>
</table>

CHART: 3

INTERPRETATION:

From the table it is inferred that

- 6% of the respondents has studied tenth std
- 10% has studied twelfth std
- 14% of the respondents square measure certification holders
- 24% of the respondents square measure below Graduates
- 18% square measure Post Graduates and
- 28% of them have done different courses
