Effect of Yoga on Menopause A Psychosomatic Approach

Dr Jyoti Manish Bandewar
Professor And HOD
MUHS

ABSTRACT: After observing the problem facing women, reading the articals and assessment, it seems Yoga is an effective intervention for pre peri and menapausal symptoms. Further rigorous RCT are needed to have specific benefits. By this review tried to throw a light on another aspect of yoga other than “ASTANG YOGA”. The “SHATCHAKRA” Wheels of light or energy, the “Centre of Consciousness” that controls physical mental emotional and spiritual health of person. These can be activated by certain yogasan that influence positive effect on woman’s body and mind. (1) These are the points situated in human body that can be stimulated by yogasan and as they get empowered they have a positive energetic effect on mind and body that help to improve body condition and minimize the hazards of menapausal symptoms, Help to synthetsize the active chargers in body to feel good.

KEYWORDS: MENAPAUSE, YOGA, SHATCHAKRA WHEELS OF ENERGY...

::INTRODUCTION::

A natural phenomenon of aging due to reduced Sex Hormones and less active ovaries there is atresia of reproductive organs resulting in complete caesation of menstrual cycles is Menopause.

After caesation of menses the body and mind state changes. Prone to health issues and many of diseases. As the pre peri or post menapausal period is a state of woman same for working or housewives. They live there 1/3 of life with this condition. Situation and condition whatever may be, the symptoms in woman need more attention, as they make her suffer at home or at the workplace. The severity and character may vary person to person...mainly MOODSWINGS, HOT FLASHES, IRRITABILITY, FORGOTFULNESS, WEIGHT GAIN, SEXUAL PROBLEMS occurs which again are responsible for HEALTH ISSUES like INSOMNIA, ANXIETY, DEPRESSION, URINARY PROBLEMS, ACHES and PAINS...

Hormonal therapy like estrogen and progesterone replacements (HRT) increases risk of malignancy and cardiac disorder. As they are responsible for rise in insulin and atherogenic metabolism. So to avoid this Nonhormonal Ayurvedic Rasayan Chikitsa, Diet monitering mild exercise and yoga are becoming the need for.

Yoga practice controls the SHATCHAKRA responsible for neurological controll of body The Hath yoga, patanjal yogvidya ,.. enhances the body function and mindset by activation and alteration of cognitive function by these chakra according to there postion and controls. (3)
Meditation increase plasma melatonin level it helps to improve the mental condition of woman.(4,5,6)
