#### Role of Color Therapy

- Mental relaxation and treat various psychological and physical diseases
- Have positive stimulating effects on every system
- Stimulate the Main chakras or energy centers -of the body.

### Value: Tints and Shades<sup>6</sup>

- The daintiness or murkiness of a shading is called value
- You can discover the estimations of a shading by making its tints and shades.
- Tints are light qualities that are made by

- blending a shading in with white. For Example pink is a tint of red, and light blue is a tint of blue.
- Shades are dim qualities that are made by blending a shading in with dark. Maroon is a shade of red, and naval force is a shade of blue.

#### Types of color<sup>5,6</sup>

- The fundamental hues utilized in shading treatment are equivalent to the seven shades of a rainbow.
- Three Primary Colors (Ps): Red, Yellow, Blue.

Fig. 2: Primary colors

Three Secondary Colors (S'): Orange, Green, Violet.

Fig. 3: Secondary colors

Table: 1 Chromo therapy on mind and body 16

Six Tertiary Colors (Ts): Red-Orange, Yellow-Orange, Yellow-Green, Blue-Green, Blue-Violet, Red-Violet, which are shaped by blending an essential in with an optional.

Fig. 4: Tertiary colors.

#### Method of Treatment<sup>1,2,3</sup>

# Method

Treatment utilizing hues is easy to the point that even a man of normal comprehension can utilize this helpful framework. It takes less time at a reasonable cost, practically none to recover.

The accompanying strategies can be utilized for treating infections under this restorative framework.

Uncovering body discontinuously in the daylight for brief stretches. Range of the daylight contains

all the hues in it, and introduction of the body before the daylight gives it an opportunity to ingest the shading required by it. Shades of the light are the real solution for the sicknesses: warmth of the daylight is additional thing, which the body gets.

- Have a glass container of the necessary shading.
- b. Subsequent to purging it with high temp water, fill it with refined water or with water that has been sanitized by baling.
- c. Let one fourth of the jug stay vacant.
- d. In the event that the container of the necessary shading isn't accessible.
- e. Take a conventional straightforward glass bottle and enwrap it in cellophane paper of required shading in such a way the container is secured from all sides utilizing straightforward sticky tape.

- f. Place this container in the daylight, saving it on a wooden surface for four to six hours. The best an ideal opportunity to treat water with shaded beams is from 10 am till 4pm.
- g. Accumulation of droplets in the empty surface of the bottle is an indication that the water has been charged enough.
- h. Keep the container appropriately made sure about with plug. On the off chance that jug of many shading were to be charged, don't put the near another so no jug be over shadowed with a container or an alternate shading.
- i. Dosage: Par adults: 2-ounce
- j. Achromatized Water for children: 1-ounce. For babies:1-table spoon and for infants one tea spoon.
